Acknowledgments

The Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2002 Status of Armed Forces Surveys: Workplace and Gender Relations* (Form 2002GB) which was conducted for the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). DMDC's survey program is conducted under the leadership of Anita Lancaster, Assistant Director for Program Management, and Timothy Elig, Chief of the Survey and Program Evaluation Division.

DMDC's Program Evaluation Branch, under the guidance of Eric Wetzel, Branch Chief, was responsible for the questionnaire. The lead developer on this survey was Rachel N. Lipari. Important contributors to survey development also include James Love (ODUSD[EO]) and researchers from the University of Illinois at Urbana-Champaign, including Louise F. Fitzgerald, Fritz Drasgow, and Alayne J. Ormerod.

DMDC's Survey Technology Branch, under the guidance of James Caplan, Branch Chief, was responsible for survey operations. The lead analyst on this survey was Elizabeth J. Willis who was supported by Consortium Research Fellow, Sally S. Mohamed. Data Recognition Corporation (DRC) performed data collection and preparation for this survey.

DMDC's Personnel Survey Branch, under the guidance of Barbara J. George, Branch Chief, was responsible for statistical methodology. Bob Hamilton, Chief of the Programming Branch, and Carole Massey and Susan Reinhold, from his staff, supported the sampling and weighting tasks. Nonresponse analyses and calculation of weights were performed by Westat.

The authors would also like to thank Lee Howell, Regan Klein, and Amber Beam (Consortium Research Fellows) and Lindsay Rock (SRA) for their support in the development and finalization of this codebook.

2002 STATUS OF THE ARMED FORCES SURVEYS – WORKPLACE AND GENDER RELATIONS ADMINISTRATION, DATASETS, AND CODEBOOK

Introduction

The *Human Resource Strategic Assessment Program* (HRSAP), located at Defense Manpower Data Center (DMDC), consists of both Web-based and paper-and-pencil surveys to support the personnel needs of the Under Secretary of Defense for Personnel and Readiness. These surveys assess the attitudes and opinions of the entire Department of Defense (DOD) community—active, reserve, civilian employees, and family members—on a wide range of personnel issues. The Web-based survey program, known as the Status of Forces Surveys (SOFS) provides timely data on active, reserve, and civilian employees. The paper-and-pencil surveys are used to obtain data on sensitive topics (e.g., sexual harassment) and from populations with limited Internet access (e.g., spouses of active duty and Reserve members).

This report provides information on the administration of the *2002 Status of Armed Forces Surveys: Workplace and Gender Relations* (Form 2002GB), hereinafter referred to as Form 2002GB.

The 2002 WGR utilized both modes of administration—the Web as well as paper-and-pencil—and was designed to document the extent to which Service members report experiencing unwanted, uninvited sexual attention, the details surrounding those events (e.g., where they occur), and Service members' perceptions of the effectiveness of sexual harassment policies, training, and programs. In addition, the 2002 WGR contains measures of general workplace behaviors. These latter constructs have been analyzed and results are available in a separate report (Williams & Mohamed, 2003). Data were collected by mail and Web, between December 2001 and April 2002. The sample consisted of 60,415 active duty service members. A total of 19,960 eligible members returned usable surveys, which represent an adjusted weighted response rate of 36.1%.

Overview of Report

The next section of this report describes the procedures used to develop the instrument, design the sample, conduct the survey, process the data and prepare analysis weights. Along with Appendices A and B, the methods section is the documentation of how the survey was conducted. George and Kroeger (2003) provide details on sampling and weighting.

The third section of the report describes the survey analysis file layout and key variables. This section and the remaining appendices (C-J) address issues in the analysis of the survey data. Conventions for variable naming and construction are introduced in this section with details given in Appendices C (annotated questionnaire), D (explanation of coding), and I (explanation of key analytic variables). Explanations for the groupings of variables seen in the positional list of variables in Appendix F are discussed in this section as well as a description of information available in Appendix G for each variable. Appendix G contains details for variables in the same order that the variables are listed in Appendix F. In addition to the variables available on the

public-release file, Appendix G contains details for the confidential variables that had to be suppressed to preserve the privacy of survey respondents and nonrespondents. Confidential variables are identified and listed in Appendices E and F. Key concepts required for the analysis of complex survey data and the structure of records in the survey analysis files are introduced in this section. Examples of analyses are given in Appendix J. The SAS code used to construct the analytic variables are included in Appendix I. Appendix H provides the record layout for the public-release flat file.

Method

Survey Instrument

A copy of the 16-page *2002 Status of the Armed Forces Surveys – Workplace and Gender Relations* (Form 2002GB) is provided in Appendix A. The survey can be grouped into six sections.

- *Background* – includes information on gender, race/ethnicity, education, duty status, Service, paygrade and length of time in service.
- *Workplace Information* – includes questions on time at permanent duty station, supervisors, leadership, and coworkers.
- *Mentoring* – includes questions on use of mentors and their background and helpfulness.
- *Readiness, Health, and Well-Being* – includes questions on individual preparedness and physical and emotional health.
- *Gender-Related Experiences in Military* – includes questions on the extent to which gender experiences were reported and, if reported, members' satisfaction with the complaint process and outcome.
- *Personnel Policy and Practices* – includes questions on the amount of training on sexual harassment, members' assessment of the effectiveness of training received, and service member's views on current policies designed to prevent or reduce sexual harassment.

Survey items were adopted, adapted, or generated from one or more of the following sources:

- The 1995 *Status of the Armed Forces Survey – Gender Issues – Form B*
- Concerns identified by personnel from various policy offices within the office of the Under Secretary of Defense for Personnel & Readiness, representatives from the Services, and
- Focus groups conducted with military personnel similar to those in the sample.

Multiple focus groups were conducted with military personnel. Paper-and-pencil surveys were administered jointly by researchers from the University of Illinois and the Defense Manpower Data Center (DMDC) at two different military installations in the fall of 1999 and the winter of 2000. Each site represented a different branch of the military. Participants were volunteered from within their units. Data collection took place in a mass-testing format with groups ranging from 1 to approximately 190 personnel. A total of 737 active duty personnel participated in these pretest.

Sample

The population of inferential interest for the WGR- Form 2002GB consisted of all active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard, up to and including paygrade O-6 with at least 6 months of service at the time the first questionnaire was mailed. The sample frame included those members who were on active duty in May 2001. Final eligibility was limited to those 1) in the December 2001 Active Duty Master File (ADMF) and 2) who were also in the September 2001 Defense Enrollment Eligibility Reporting System (DEERS) Medical point in time (PIT) extract. Sampled members were flagged as ineligible (9.77% of the sample), and were excluded from all survey mailings, if they were either not in the ADMF or were ineligible for benefits in DEERS (5,903).

The initial sample for the WGR – Form 2002GB consisted of a non-proportional stratified, single stage random sample of 60,415 individuals, of whom 56,521 were determined to be eligible members of the population. The sample design considered requirements for analyses by Service, gender, paygrade group, and racial/ethnic group membership. Details of the sample design and expected precision levels are reported by Elig (2003) and are summarized below.

Stratification Variables

The sampling frame was constructed using the five stratification variables listed in Table 1. These five variables were used to create stratification cells. A single variable, GB01CELL, was created as an index variable for the strata.

Table 1.
Stratification Variables

Dimension of Stratification	Levels
Service	Army Navy Marine Corps Air Force Coast Guard
Gender	Male Female
Paygrade Group	E1 to E3 E4 E5 to E6 E7 to E9 WO1 to WO5 O1 to O3 O4 to O6
Race/Ethnic Category	Minority Non-Minority
Occupational PERSTEMPO	High Low

Researchers identified subgroup breakouts (i.e., domains) that would be important when survey results were provided to policy officials. These reporting domains were defined by using the 14 demographic variables shown in Table 2. For four demographic characteristics, multiple versions of variables were created that differed in the level of detail. Less detailed variables were used to define domains for analyses within the five Services than were used to define domains at the DoD level.

Next, Elig (2003) determined the number of people who would be sampled for each stratum using a sample-planning tool developed for DMDC (Kavee & Mason, 1997). A formal mathematical procedure (Chromy, 1987) based on Karush-Kuhn-Tucker theory is used in the sample-planning tool to determine an optimized sample size and allocation—a sample that would achieve at minimal cost the precision levels required for each analytic domain. The Kuhn-Tucker theory provides an optimal solution to satisfy precision constraints (e.g., ± 5 percentage points) imposed on estimates of prevalence rates in key reporting domains. Researchers iteratively modified the inputs to the sample-planning tool to arrive at acceptable precision levels for reporting domains that would be of particular interest to policy officials.

Table 2.
Factors Defining Key Reporting Domains

Factors	Levels
Service*	Army Navy Marine Corps Air Force Coast Guard
Gender*	Male Female
Paygrade Group 1*	E1-E3 E4 E5-E6 E7-E9 W1-W5 O1-O3 O4-O6
Race/ethnic Category*	Minority Non-minority
Occupation PERSTEMPO*	High Low
Paygrade Group 2	E1-E9 W1-W5 O1-O6
Paygrade Group 3	E1-E3 E4-E5 E6-E9 W1-W5 O1-O3 O4-O6
Paygrade Group 4	E1-E3 E4 E5-E6 E7-E9 All Officers
CinCs	America Europe Pacific Central South

	Europe Asia & Pacific Islands Other
Regions-Collapsed	US & US territories, Other, Unknown Europe Asia & Pacific Islands
Race Code	White Asian & Pacific Islander Black Native American & Alaskan Native Other
Race/Ethnic Code	Native American & Alaskan Native Asian & Pacific Islander (Non-Hispanic) Black (Non-Hispanic) White Hispanic Other

**Stratification Variable*

Constructing the Frame and Drawing the Sample

DMDC's May 2001 Active Duty Master Edit File (ADMF) was used in developing the sampling frame, constructing strata, and determining the sample size and allocation. The specified definition of the population, described above, resulted in a sampling frame with 1,390,935 eligible members. A non-proportional stratified, single stage random sample of 60,415 members was selected to receive the WGR Form - 2002GB. Table 3 presents a summary of the sample allocation by Service.

Table 3.
WGR – Form 2002GB Sample Allocation

	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
Gender

Note. Counts for unknown are not included.

Respondents

When the survey fielding closed on April 23, 2002, DMDC had received 19,960 usable surveys. See Tables 4 and Table 5 for a summary of these respondents, unweighted and weighted.

Table 4.
Respondents

	Total	Army	Navy	Marine Corps	Air Force	Coast Guard

Low	430,975	125,444	118,177	36,008	139,924	11,421

Note. Counts for unknown are not included.

Determining Response Status

The original sample file contained 60,415 sample members. Of those, 3,894 were flagged as ineligible, leaving 56,521 members eligible for mailing. Losses to the drawn sample are listed in Table 6. Sample members were lost from the sample for three main reasons: (1) self-reported or other ineligibility for the survey, (2) an inability to locate the sample member, and (3) refusal to participate in the survey or other failure to respond to the survey. A total of 5,925 sample members (10%) were lost from the final sample through classification as ineligible, most of these ineligible (3,984) were determined using the September 2001 DEERS PIT extract. Elimination of ineligibles resulted in decreasing the sample to 90% (N=54,490) of its original size.

Table 6.
Frequency Counts and Percents of the Final Usable Sample Relative to the Drawn Sample

	Sample counts		Weighted estimates of population	
	n	%	n	%
Drawn sample & population	60,415	100%	1,390,935	100%
Ineligible in September 2001 DEERS and December 2001 ADMF	5,903	9.77%	129,087	9.28%
Self-reported ineligible	22	.04%	330	.02%
Total: Ineligible	5,925	9.81%	129,417	9.30%
Eligible sample	54,490	90.19%	1,261,518	90.70%
Total: Not located	1,320	2.18%	35,765	2.57%
Located sample	53,170	88.01%	1,225,753	88.13%
Nonresponse				
Returned blank	181	.30%	4,955	.36%
Incomplete Return	856	1.42%	20,553	1.48%
Did not return a Survey	32,173	53.25%	745,202	53.58%
Total: Nonresponse				
Total nonresponse (unknown nonrespondents)	33,210	54.97%	770,710	55.42%
Usable Responses	19,960	33.04%	455,052	32.71%

Note. Percentages reported for usable responses represent the yield of usable responses from the survey procedures, but not response rates as typically reported for surveys.

This is both the population frame count and the sum of base weights from the sample.

Less than 2% of the drawn sample (1,320 of 60,415) was lost because the sample members could not be located. Personnel records for this group had missing, incomplete, or out-of-date addresses, and steps designed to obtain complete, current addresses for these records were unsuccessful.

Losses attributable to either ineligibility or nonlocatability resulted in a sample that was 88% as large as the drawn sample. Individuals in this remaining sample may be further categorized as nonrespondents versus respondents. Nonrespondents included the following groups: sample members who contacted the operations contractor (by mail, fax, e-mail or telephone) and asked to have their names removed from the survey mailing list, and sample members who did not return a survey.

Respondents included all sample members who returned at least one survey with 50% of applicable items completed and at least one valid answer marked on Question 55. At the

conclusion of the survey fielding, 19,960 eligible, locatable sample members had returned usable surveys.

Location, Response, and Completion Rates

The Council of American Survey Research Organizations (CASRO) noted that varying operational definitions of response rates can lead to problems or confusion (e.g., when awarding contracts requiring pre-specified response rates or when interpreting the results of a survey). As a result, CASRO formed a task force to recommend guidelines for standardizing the operational definitions of response rates.

Beginning in 1995, DMDC standardized its methods for calculating response rates and completion rates using procedures patterned after those advocated by CASRO. More specifically, the new DMDC procedures closely follow CASRO's Sample Type II design (see Council of American Survey Research Organizations, 1982). Table 7 provides the CASRO-adjusted located and eligible sample counts for the Form 2002GB survey.

Table 8 provides location, response, and completion rate information for the Form 2002GB Survey. The location rate is defined as the proportion of eligible sample members that were locatable. The response rate is defined as the proportion of eligible sample members that returned usable surveys, while the completion rate is defined as the proportion of the located sample that returned usable surveys.

Table 7.
CASRO-adjusted Located and Eligible Sample Counts

	Sample		Population	
	Observed Counts	% of Drawn Sample	Weighted Estimates	% of Weighted Sample
Located sample	53,170	88.01%	1,225,753	88.12%
Ineligible among those who did not return a survey	34	0.06%	511	0.04%
Other ineligible	0	0%	0	0%
Total estimated ineligible	34	0.06%	511	0.04%
Adjusted located sample	53,136	87.95%	1,225,242	88.09%
Eligible sample	54,490	90.19%	1,261,519	90.70%
Ineligible among those not located	1	0.00%	25	0.00%
Ineligible among those who did not return a survey	34	0.06%	511	0.04%
Other ineligible	0	0%	0	0%
Total estimated ineligible	35	0.06%	535	0.04%
Adjusted eligible sample	54,455	90.13%	1,260,983	90.66%

Note. These adjustments follow the CASRO approach of projecting the observed ineligibility rate onto sample members who are not located or are non-respondents.

Table 8.
Eligible Sample Location, Response, and Completion Rates

Type of Rate	Computation	Observed Rates	Weighted Rates
Location rate	Adjusted located sample / Adjusted eligible sample	97.58%	97.17%
Completion rate	Usable responses / Adjusted located sample	37.56%	37.14%
Response rate	Usable responses / Adjusted eligible sample	36.65%	36.09%

Note. The rates in this table are computed from the information in Table 1.

Survey Development and Administration

The survey was printed by DRC as a machine-readable optical character read (OCR) form. Each form had a unique lithocode number printed on the front and back covers of the survey.

Web Survey

A Web version of the survey was hosted on DRC's secure website so that sample members could complete the survey online. At the entry point to the survey, members were also able to update name/address information, request a paper survey, or enter their reason for refusing to take the survey. The Privacy Notice and a page of FAQ's were also posted on the website.

Survey Administration

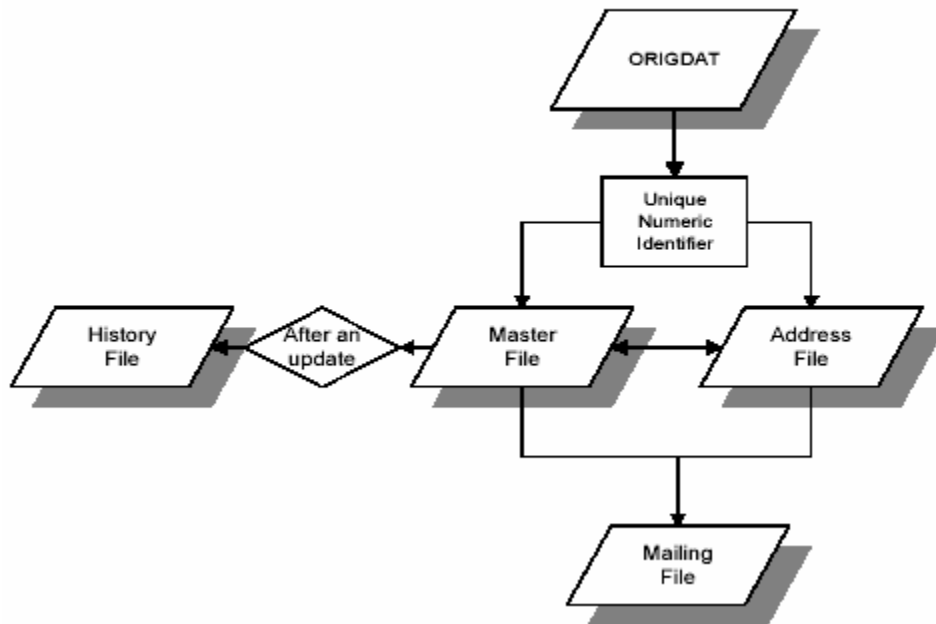

The survey administration process began in December 2001, with the mailout of notification letters to all sample members (minus original ineligible). Three weeks later, sample members received a survey with a cover letter. Two weeks after the first survey mailing, reminder/thank-you letters were sent to all sample members. Two weeks after the reminder/thank you letter mailing, a second survey with a new cover letter was mailed to each sample member who had neither returned a survey (paper or web) nor been deemed ineligible for survey participation. Four weeks after the second survey mailing, a third survey with a new cover letter was mailed to each sample member who had neither returned a survey (paper or Web). (Appendix A contains a copy of the survey and Appendix B contains copies of the survey letters.) The survey field was closed on April 23, 2002. Sample members' records for which completed surveys were received were flagged as returned in the Survey Control System (SCS). The SCS and the scanned data were used to create the public-release data file (described below).

Survey Control System

The Survey Control System (SCS) is a relational database that was used to monitor all sample member transactions over the course of the data collection. The datasets in the SCS include data such as sample members' names and addresses, but does not contain data obtained from the survey responses.

DRC used the SCS to store and update data, monitor mailings, respond to documents returned as postal non-deliverables (PNDs), and determine survey participation and eligibility status. The SCS consists of five datasets: the ORIGDAT file, the MASTER file, the HISTORY file, the MAILING file, and the ADDRESS file. The files are linked relationally by INRECNO, a unique individual record that was assigned to each sample member when their record was loaded into the Survey Control System. Figure 1 displays the interrelationships among those datasets and each of the five SCS files is described briefly below.

Figure 1.
Survey Control System

ORIGDAT file. The ORIGDAT file consists of 60,415 records, one record for each member of the sample. It is the original sampling frame file sent to DRC by DMDC. The original file was loaded onto DRC’s computer system and converted to a SAS® dataset.

ADDRESS file. The ADDRESS file tracked the addresses that were maintained for each sample member. The ADDRESS file contains one record for each address for each sample member (e.g., if there were five addresses located for one sample member during the survey administration, that sample member has five records in the ADDRESS file). Each record is uniquely identified by the combination of INRECNO and ADDRNO (the sequential order of receipt of the sample member’s address). Additionally, each record contains the sample member’s address, the source of the address, and an address priority code. If a sample member has one address record in the ADDRESS file, the address number ADDRNO for that record is one. The sequential address number assigned to a given address for a sample member did not fluctuate with changes in addresses caused by updating efforts.

The priority code assigned to a given address number for a sample member was used to determine the “best” or “highest priority” address for the sample member at any given time. It was originally determined by the source of the address. Address updates obtained directly from a sample member received a priority number of one. The order of priority of address sources from “highest priority” to “lowest priority” is as follows, respectively:

1. updates directly from a sample member (call, fax, e-mail, web update or letter)
2. address corrections from the U.S. postal service (ACS [electronic address change service], ACRs [address correction requests], and ODFs [out-of-date-forwarded mail])
3. NCOA-updated addresses
4. credit bureau-updated addresses
5. DEERS residential addresses
6. DEERS unit addresses

The priority code assigned to an address number changed as new addresses were obtained through address-updating procedures. For instance, if a sample member initially had only one address record in the ADDRESS file (identified as address number one), then that address number was assigned a priority code that indicated it was the “highest priority address” and was to be used for mailings. If “address number one” was identified by the operations contractor as “unusable” (e.g., postal non-deliverable), then the priority code assigned to “address number one” was changed to indicate that the address was invalid. Address priorities may also have changed in response to information that the address “got through” to the sample member (i.e., it generated a telephone call, fax, e-mail, web update or survey return from the sample member). If the sample member faxed in a change of address or a credit bureau forwarded an updated address for that sample member, the new address was added as address number two. Upon entry of a new address, the SCS searched the ADDRESS file for duplicate addresses for the same sample member and gave duplicate addresses an invalid priority code. The source of each updated address was identified and the appropriate priority for each source was assigned to each updated “address number.”

MASTER file. The MASTER file is the file from which the SCS selected records for upcoming survey mailings. This file includes a record for each member of the sample and was created by extracting data from each record in the ORIGDAT file. Each MASTER record includes the sample member’s INRECNO and the address number which currently has been assigned the “highest priority code” from the corresponding records in the ADDRESS file. The MASTER file updates are made through an automated process (e.g., updating the address number in use after the receipt of a postal non-deliverable) or manual key entry (e.g., updating information in response to a telephone call from a sample member). As new information was received for a particular record (including changes to the priority codes assigned to address numbers), the SCS updated the MASTER record and added a new record to the HISTORY file containing the outdated information from the MASTER file.

HISTORY file. The HISTORY file chronicle’s changes that occurred to the MASTER file. Each HISTORY record is a subset of an outdated MASTER record with the addition of a date and time stamp as the record is updated. That is, a HISTORY record was created when there was a name, address, paygrade, or eligibility status change in the MASTER file. Thus, the HISTORY file contains as many observations as there were updates to the MASTER file.

MAILING file. The MAILING file tracked all of the survey mailings. This file contains one record for each item mailed during the survey administration. Each MAILING record includes the INRECNO, address number used, date of mailing, mailing status, type of mailing, and the mailing identification code (MIC). For mailings that contained a survey, the MIC is the unique litho code printed on the survey included in that mailing. For mailings that did not contain a survey, the MIC is a unique code number created by the SCS and printed on the mailed letter as a tracking device for that mailing.

Address-Update Procedures

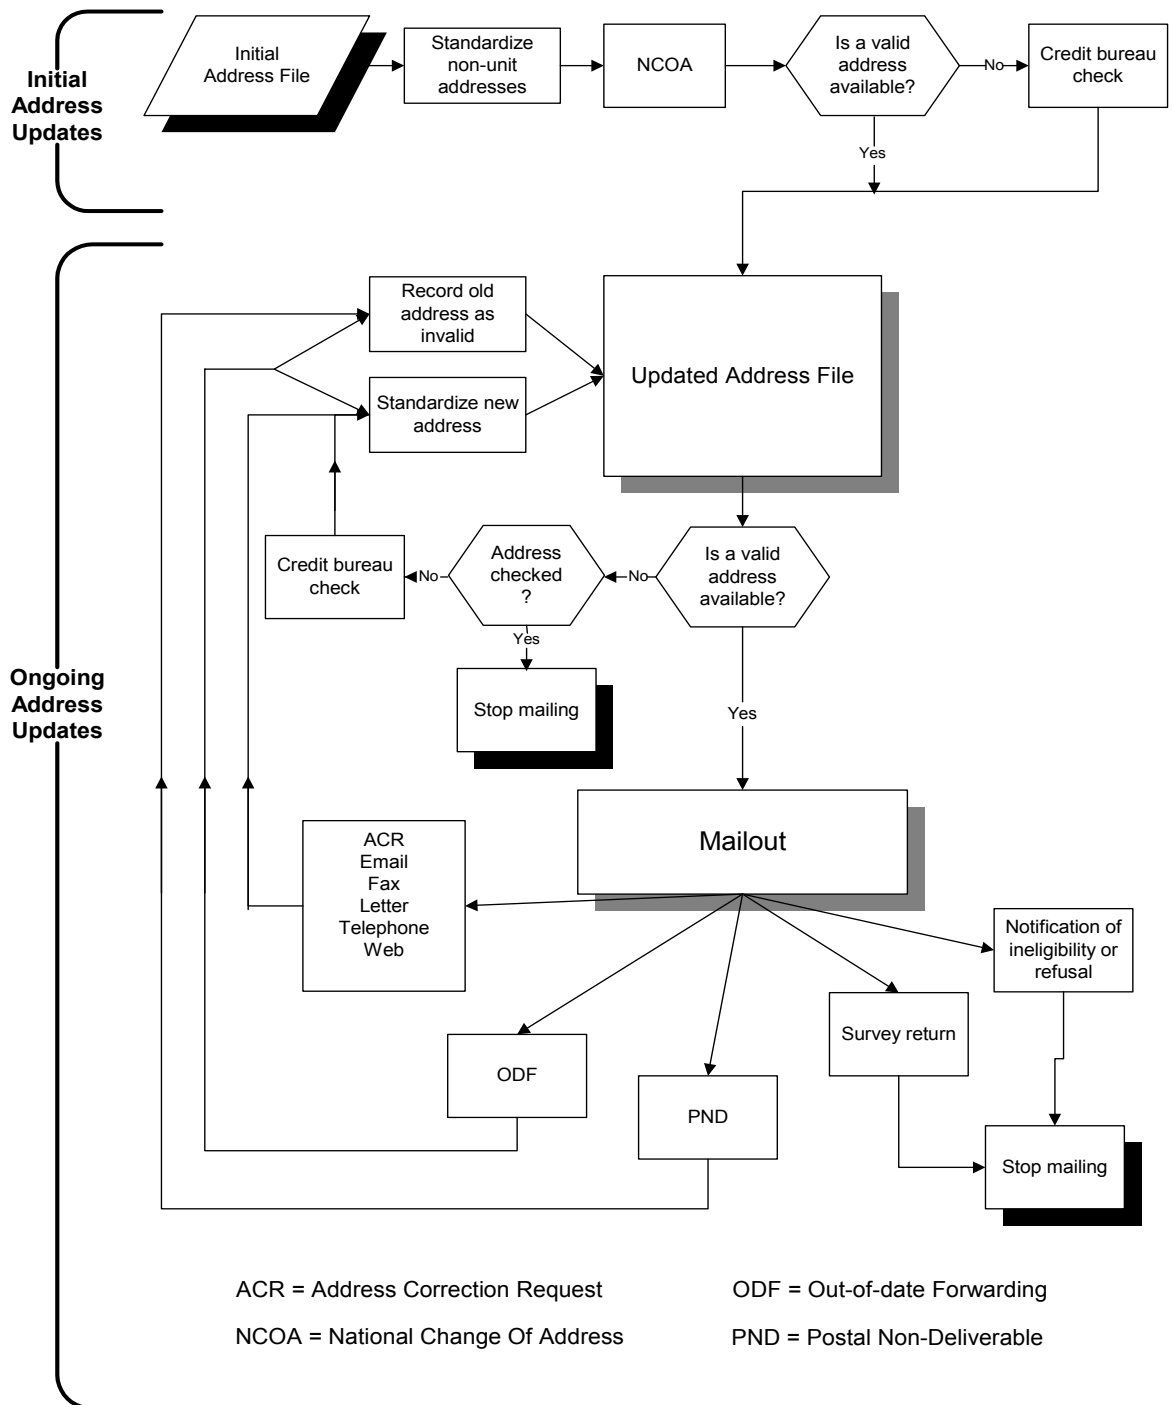

Initial Address Updates

Prior to the first mailing, DRC ran all domestic residential addresses through Group 1 software to be formatted to conform to U.S. Postal Service standards. Once the addresses were standardized, they were sent to an outside vendor where they were checked against the National Change of Address (NCOA) database. The NCOA software updated the address records (in standardized format) based on change-of-address cards filed with the U.S. Postal Service. The updated NCOA address file was returned to DRC and integrated into the SCS. The NCOA-updated addresses were added to the ADDRESS file and became the current address number with the “highest priority code assigned” in the MASTER file.

After the standardized, updated addresses had been added to the SCS, another file was compiled of sample member records that still had incomplete addresses or addresses identified by NCOA as undocumented moves (i.e., the sample member had moved but NCOA did not have a new address). DRC sent copies of this file to three credit bureaus (Experian, Trans Union, and CSC Credit Services) to determine whether a complete, up-to-date address for these sample members could be found. The file was sent first to Experian. Any records for which Experian could not provide updated addresses were then sent simultaneously to Trans Union and CSC. The results were integrated into the SCS, again updating records in the ADDRESS file.

Ongoing address updates. Address update procedures also occurred when (a) a survey document was returned as undeliverable, (b) a sample member self-reported a name, rank, or address change via the telephone, e-mail, web, or fax, or (c) the postal service forwarded address correction information. Figure 2 outlines these address updating procedures.

Figure 2.
Addressing Updating Procedures

As a new address was entered into the ADDRESS file for each sample member, its source (NCOA, credit bureau, postal ACR or ACS, telephone call, fax, e-mail, letter, web) was identified, a new address number was created to correspond to each address and a priority code was assigned to each address number. The priority assigned to address numbers was based upon the source of the updates. An address update from a sample member's telephone call, fax, e-mail, web or letter was assigned a priority code of one. Subsequent updates, such as from a credit bureau, received a lower priority than contact directly from the sample member. At any given time, the current address used corresponded to the address number with the highest priority code.

If all known addresses for a sample member were returned PND, the sample member's record in the MASTER file was flagged "no address available." All "no address available" records were forwarded to the three credit bureaus. (Again, the file was sent first to Experian, then to Trans Union and CSC.) The credit bureaus returned files containing addresses for each submitted record, with the date on which the credit bureau received the address. If more than one address for a sample member was received from credit bureaus, the address number corresponding to the address with the most recent receipt date received the highest priority code. If one or more of the credit bureaus returned a previously unattempted address, the MASTER and ADDRESS files were updated and a re-mail was sent to the sample member. If none of the vendors had an updated address for the sample member, DRC designated the sample member "nonlocatable" and stopped further mailings.

Processing of Updates

Updates from Sample Members

Updates from sample members could be communicated via the toll-free telephone number (either by speaking to DRC's Call Center staff or by leaving a voice mail message). In addition, sample members could mail, fax or e-mail updates or go to the survey website and enter updates. The updates made on the website were loaded to the system every three days (to coincide with the mailing/remailing schedule). Other updates were entered into the Survey Control System by DRC's Call Center staff by the next morning.

Updates from the U.S. Postal Service

There are several types of address updates provided by the postal service. They are detailed below; each includes a description of the processing steps.

1. *Postal Non-Deliverable Mail (PND)*: The sample member moved and no forwarding address was available. The mail piece was returned to DRC. DRC removed the letter from the envelope and scanned it to capture the Mailing Identification Code (MIC) in the lower right corner. A file of the MICs was loaded to the Survey Control System so the records could be updated as PND. This was done every three days (to coincide with the mailing/remailing schedule). If the sample member had another address on file (e.g., the unit address), that address was used. If not, the Social Security Number was sent to the credit bureaus in search of a new address.

2. *Address Change Service* (ACS; electronic): About six weeks prior to the first mailing, DRC applied to the postal service for the ACS. The postal service assigned a participant code, which was placed in the address block of the letter. DRC requested semi-weekly files, which the postal service provided on diskette via Express Mail. DRC loaded the files upon receipt or before another mailing was prepared. (Note that ACS is only used when sample sizes are large enough [e.g., 10,000 or more] to meet the postal service minimum volume processed each week.)
3. *Address Correction Requests* (ACR; hard-copy): Some post offices are not equipped to provide address corrections via ACS (the electronic service), so they provided the corrections via hard copy cards that were sent to DRC. The corrections were key-entered by DRC's Call Center staff, typically by close of business the next day but no later than prior to the preparation of the next mailing.

Survey Materials and Their Distribution

Each eligible sample member received at most five original mailings: a notification letter, a Wave 1 survey with cover letter, a reminder/thank you letter, a Wave 2 survey with cover letter, and a Wave 3 survey with cover letter. The notification and reminder/thank you mailings contained only a letter. Each of the other three "wave" mailings included a cover letter, a survey, and a folded pre-addressed business-reply envelope.

General Mailing Procedures

Prior to every mailing, the SCS searched the records in the MASTER file to identify which records should be excluded (e.g., sample members self-reported as ineligible for survey participation, sample members who had already submitted paper or web surveys, and members with no valid addresses available). For remails (sent between mailings), the SCS identified only those records that had been updated since the prior mailing. More specifically, the SCS identified records that had resulted in PNDs or had been manually flagged for remailing (e.g., in response to a sample member calling the operations contractor stating she or he had received a reminder/thank you letter but had not received a survey, etc.).

Once all records for a particular mailing or remailing were identified, the SCS processed the records based on whether or not the mailing would include a survey form. If the mailing group was large enough to lead to a cost savings from presorting, the records were run through Group 1 postal software to sort the records according to first-class presort postal regulations. After this procedure, a unique Mailing Identification Code (MIC) was assigned to each record. The MIC was assigned either from the survey lithocode list if a survey form was sent or independently if only a letter was sent.

Ticket Numbers for Web Survey Access

Prior to the first mailing, a list of ticket numbers for web survey access was randomly generated. One secure ticket number was assigned to each sample member and remained linked to that member for the duration of the project. That is, while a member's MIC or lithocode changed with each mailing as described previously, the member's ticket number did not change. The member's unique ticket number was printed (along with the survey URL) in each letter sent

to that individual. A member could not access the web survey without using his or her ticket number.

Description of Letters

DMDC provided DRC with the text, letterhead, and signatures for the cover letters. These letters explained why the survey was being conducted, how the survey information would be used, and why participation was important. (See Appendix B for copies of the letters.) The letters were approved and printed on letterhead from the Under Secretary of Defense and letterhead from the U.S. Department of Transportation, United States Coast Guard. The letters were signed by Dr. David S. C. Chu, Under Secretary of Defense, and W. R. Somerville, U.S. Coast Guard Assistant Commandant for Civil Rights.

The DoD letterhead and signature were printed in blue, while the Coast Guard letterhead and signature were printed in black. The text and recipient information of all letters were printed in black. In addition to including a name and address (which was also used as the mailing information for the window envelopes), each letter included a personalized salutation. The salutation addressed each sample member by his/her rank. For example, a letter to a Navy E5 with the last name Smith would have included the salutation "Dear Petty Officer Smith." Similarly, an Army O3 named Jones would have received a letter starting "Dear Captain Jones." The address block also included service branch; for example, "Petty Officer John Smith USN" or "Captain Mary Jones USA."

Inserting process

If the mailing included only letters (no survey forms), the letters were folded and machine inserted into #10 window envelopes and sent by first class mail. Mailings that included a survey followed the same procedure through the letter printing process. The MIC on the cover letter was used to pair the letter with its matching lithocoded survey. During the matching process, the survey, cover letter, and a folded business reply envelope were inserted into a 9 x 12 window envelope. Ten percent of the completed envelopes were opened and visually checked during the inserting process to ensure that the MIC printed on the letter and the lithocode printed on the survey matched. If a mismatch was found, the inserting process was halted and envelopes were opened in sequence until all mismatched surveys and letters were identified. Surveys and letters were then matched correctly and reinserted. Machine inserting was then resumed. This procedure ensured that each survey was sent to the person designated to receive it. All survey packets were sent by first class mail.

Mailouts

The first mailout was the notification letter. DMDC uses notification letters for three reasons. First, contacting potential respondents multiple times is perhaps the most effective means of increasing survey response rates (Fox, Crask, & Kim, 1988; Yammarino, Skinner, & Childers, 1991). Second, the U.S. Postal Service does not always forward the large envelopes that are used to mail surveys despite the envelopes' first class postage and request to forward. However, forwarding is more routine for letters in standard-sized business envelopes. Third, it is

less expensive to send an initial notification letter, have that letter returned PND, and correct the address than it is to start the process by mailing and remailing the survey.

The second mailout was the Wave 1 survey mailing; this was followed by three further mailouts designed to increase response rates. A reminder/thank you letter was sent to all eligible sample members with usable addresses. Survey mailouts for Waves 2 and 3 provided sample members who had lost or discarded the earlier survey(s) with additional opportunities to participate. Again, each letter included the web survey URL and the individual member's unique ticket number so that respondents could access the survey online.

The status of each mailing was tracked throughout the data collection so that address-correction information could be incorporated into all relevant mailings. When a mail piece came back PND, the next mail piece was sent to a new address (if one could be obtained during the mailing period). For first-, second- and third-wave surveys that came back PND, remails were completed if a newer/updated address could be found.

Table 9 lists the mailing dates and return results for each of the survey mailouts and remailings. The notification letter, inserted into a #10 window envelope, notified sample members that they would be receiving a survey and encouraged their participation. The notification letter also offered members the option of updating their address on the survey web site and informed them that the web survey would be available on December 26, 2001, the same date as the start of the Wave 1 survey mailing. The initial mailing contained 56,438 letters (52,555 Department of Defense and 3,882 Coast Guard); the records for this mailing were selected on December 4, 2001. The mailing was completed on December 7, 2001.

The Wave 1 survey mailing was sent to 56,414 sample members (52,534 DoD and 3,880 CG). The records were selected for the mailing on December 21, 2001. The mailing began December 26, 2001 and was completed January 2, 2002. The letter and a survey booklet were inserted into a 9" x 12" window envelope along with a folded 9" x 12" business reply envelope. The letter requested sample members' participation in the survey via either paper or World Wide Web.

A reminder/thank you letter was sent to 56,400 sample members (52,520 DoD and 3,880 CG). The records were selected for this mailing on January 8, 2002. The mailing was completed on January 9, 2002. The letter, inserted into a #10 window envelope, thanked sample members for returning the survey if they had done so, and reminded them to complete and return the survey or complete it online if they had not yet done so.

The Wave 2 survey mailing was sent to 50,036 sample members (46,660 DoD and 3,376 CG) from January 23 to January 25, 2002. Records were selected on January 22, 2002. The cover letter, a survey booklet and a folded 9" x 12" business reply envelope were inserted into a 9" x 12" window envelope. The letter again requested participation in the survey.

Due to lower-than-anticipated response rates, additional materials were needed to fulfill Wave 3 main mailings and remails. (DRC had originally ordered 10,000 over the quantity bid for survey booklets, 9 x 12 jumbo window envelopes, 9 x 12 BREs and DoD letterhead, but

inventory still fell short of need.) DRC and its vendors were able to produce the additional materials quickly so that the Wave 3 mailing period was lengthened by only one day.

The Wave 3 survey mailing was sent to 41,067 sample members (38,482 DoD and 2,585 CG) from February 20, 2002 to February 27, 2002. Records were selected on February 15, 2002. The cover letter, a survey booklet and a folded 9" x 12" business reply envelope were inserted into a 9" x 12" window envelope. The letter again requested participation in the survey.

Table 9.

Mailings: Print File Creation Dates and Number of Mailings Sent, Returned, and PND

Mailing Numbers and Groups	Print File Creation Date*	Mail Drop Date	Number Sent	Number of PNDs	Number of Returns
1. Notification Domestic DoD	12/4/01	12/7/01	52,547	8,366

Note Print file creation date: This is the date records were identified for inclusion in the mailing and written to a print file.

Processing Returned Surveys

The processing of returned paper surveys involved opening the surveys; sorting into complete, blank, and damaged batches by receipt date; barcode scanning and OCR scanning of the survey forms; key-entering of unscannable data; and coding of the scanned and key-entered data.

Web data were downloaded nightly by DRC through an automated routine. Separate files were maintained for survey responses and comments. Web data were checked for valid entries for write-in grids. Each web survey was matched back to the sample member's INRECNO using the unique ticket number assigned to that member. After the close of the field period, web returns were checked for completeness according to DMDC guidelines.

Scanner Pretest

Scanner pretesting was done early so that any problems detected in the scannable forms could be corrected before the forms were mailed. As soon as a copy of the printed survey instrument was available, DRC began writing and testing programs to capture the survey data on paper and on the web. To test the initial scanning programs, DRC ran a "22-record check" (or pretest). DMDC created representative data for 22 surveys and DRC scanned, edited, and re-coded these data according to the data-capture procedures. The resulting scanned data were

reviewed by DMDC. Coding revisions were requested by DMDC and implemented by DRC prior to the “50-record check” described below.

Web Pretest

DRC tested the web survey data collection prior to making the survey available to DMDC for testing. DMDC entered their 22 test records using unique test ticket numbers on the DRC external test server. The test data was downloaded, validated, and coded before delivery to DMDC. DMDC reviewed the test data and DRC applied the same coding revisions previously requested for the paper record check.

Creating the Scored Dataset

Upon receipt, returned paper surveys were visually checked and separated into three groups: blank forms, forms with one or more items completed, and forms otherwise damaged or unscannable. Blank forms were further divided into batches (or groups of documents to be scanned) according to the reason that the form was returned blank (e.g., receipt of more than one survey, respondent deceased, no reason given). The reason for the blank return was captured in the variable BLKREAS in the SCS. The reasons listed in the variable BLKREAS originated strictly from survey returns. Other variables such as FLAG_FIN and SCSINEL indicate reasons for a blank survey return that was obtained from other sources (i.e., telephone calls, etc.) in addition to reasons given on a survey return. All blank forms were optically scanned so that their lithocodes could be tracked and the number of returns updated.

Prior to scanning, survey form pages were separated, stacked, and assigned a batch number. If the sample member included any extraneous materials, the MIC was written on the materials, and the materials were forwarded to DMDC. As the surveys were scanned, the SCS recorded each survey’s batch number, serial number and scan date. The surveys were machine edited for light marks, multiple marks, alignment, and correct lithocodes. If the respondent had cut out or obliterated the barcode and lithocode so that the lithocode was unreadable (thus rendering the respondent unidentifiable), the survey was forwarded to DMDC as white mail.

The scanned survey forms were boxed by batch number. Each box was labeled with batch number and project number to facilitate locating individual processed forms. Forms were stored for a period of six months after the project completion date and were destroyed upon receipt of written approval from DMDC.

As stated earlier, Web data were automatically downloaded nightly. The status of each survey could change until the respondent submitted a complete survey. There are four conditions (or states) for web surveys: “1” is “never accessed,” “2” is “accessed” (i.e., the respondent opened the survey and exited without making changes), “3” is “save and exit” (i.e., the respondent made some changes and clicked on the save and exit button when leaving the survey), and “4” is “submitted” (i.e., the respondent had completed the survey and sent it for processing). Web surveys with status 2, 3 and 4 are included in the survey returns with final status identified for each web return. All web data were validated after the close of the field period for inclusion in the final datasets.

DMDC Coding Scheme

To convert the raw scanned and web data into the item scores that appear in the public-release data file, DMDC provided DRC with an annotated copy of the survey form and the coding notes contained in Appendix D. A guiding assumption in designing the coding scheme was that the analysts creating the dataset would not be the only people analyzing the data. DMDC datasets often are analyzed by people in government, private-sector, and academic organizations. Care is taken in organizing and documenting DMDC surveys so that secondary analysts can use the data and be reasonably certain that they understand how the data are coded and what limitations the data have. Moreover, every attempt is made to capture all information from completed surveys and preserve the data so that secondary analysts can later create variables that were not anticipated by DMDC researchers. To accomplish these goals, DMDC subscribes to a variety of coding conventions for all of its surveys. Appendix D provides in-depth coverage of these coding conventions.

Keying Open-Ended Items

The survey contained six “other specify” comments and one open-ended comment. For paper surveys, the text responses from the “other specify” and open-ended response boxes were entered verbatim into a SAS dataset that is linked by lithocode to the scanned survey data. For web surveys, the “other specify” and open-ended comments were collected in a comment file and linked to the web survey data by ticket number. All text data (for both paper and web) in the SAS files for “other specify” and open-ended items were spell-checked. Proper names and location names were replaced with “(name),” and “(location)” respectively.

For open-ended items on paper surveys, the scanned data file contains a flag indicating whether the respondent wrote anything in response to the item. The data validation process compared the written responses to the corresponding flags in the scanned data to ensure that these files were consistent; discrepancies were investigated and resolved where possible. Discrepancies existed where (1) the scanned data indicated presence of a comment but no comment was there, and (2) a comment was keyed although the scanned data did not indicate the presence of a comment.

Fifty-Record Check.

After receiving the first 50 returned surveys (50 each paper and web), DRC ran two “50-record checks.” DRC downloaded, validated, and re-coded 50 web surveys. DRC also scanned, edited, and re-coded 50 paper surveys. DMDC checked the resulting data against the original paper surveys to determine if there were any unanticipated problems in the coding or scanning procedures (e.g., the scanner could not pick up lightly marked response boxes, or respondents were consistently answering in an unexpected manner). Minor corrections to these procedures were necessary as a result of this check and were reviewed by DMDC prior to production of the initial SAS dataset. At the completion of both 50-record checks, DRC scanned the full set of returned surveys and processed the submitted web surveys. The data were then cleaned and edited.

Data Cleaning and Editing

Where there were duplicate responses for the same INRECNO, the first survey received was scanned and edited as usual and included in the scanned data file provided to DMDC. The second survey received was also scanned and edited as usual but was written to a separate file created just for duplicate receipts. That file was also provided to DMDC. The same logic applied to duplicate receipts where one was paper and one was web complete; the first received was included in the main dataset and the later receipt was included in the duplicate file.

As paper surveys were received, they were batched for scanning. The separated survey pages were scanned as individual sheets. The scanner printed (via ink jet) a batch and serial number on each sheet, using the same number for all sheets within a document. Once the surveys were scanned, they were edited for light marks and/or multiple responses. Where the respondent's intent was clear, the data were corrected. When the respondent's intent was not clear, the data were left unedited. Next, a matchback process was performed to check the data against the sample file to ensure that the lithocode was properly scanned and matched the original data record.

Web surveys were matched back to sample members by matching the ticket number to INRECNO and subsequently to the respondent. Because the web survey did not allow multiple or lightly marked responses, there was no need for editing the data as was done for paper returns. However, as stated earlier, all text entries were spell-checked and edited to remove identifying information.

At the completion of data cleaning and editing, DRC provided DMDC with two files of scored data—the first containing original survey returns and the second containing duplicate returns from sample members ($n = 301$). DRC also provided tables of item frequencies and percentages for the original returns file (see Appendix G). DMDC reviewed two draft versions and a final version of these materials. Upon acceptance of the final version, the file of original returns was modified to create a public-release file. The public-release data file excludes variables from the original SCS file that identify individuals or otherwise compromise the anonymity and confidentiality of sample members. The verbatim open-ended text responses are also not included in the public-release file.

Survey Analysis Files

This section (a) provides an overview of requirements for analysis of the data, (b) documents the structure of survey analysis files (c) describes the assembly of the analysis files, and (d) provides an overview of the variables in the survey analysis files.

Estimation

Data were collected from a non-proportional stratified, single stage random sample. Responses were weighted up to population totals adjusting for differential sampling and response rates in demographically homogenous groups. In general, the procedures used to compute sample estimates of population parameters (including population totals, means, proportions, tests of hypotheses and regression relations) and their associated variances are derived from the

probability structure that gives rise to the observations. As with other surveys that involve complex probability structures, most of the parameter estimates of interest in this survey take the form of non-linear statistics. Examples include domain means and proportions where the denominator values are unknown and must be estimated from the sample data. The estimator takes the form of a ratio of random variables (i.e., the ratio of the estimated numerator and denominator totals or counts). In general, ratio estimates are not unbiased and their variances cannot be expressed in closed form. The bias in a ratio estimate depends on the variance associated with the denominator total or count and can usually be ignored in samples having a large number of observations. As a working rule, the bias may be assumed negligible if the number of observations on which the estimate is based exceeds 30 or is otherwise large enough so that the coefficient of variation $[SE(x)/x]$ of the denominator is less than .10 (cf., Cochran, 1977, pp. 153-165).

Approximations must, however, be found for the variances. The approximations commonly take the form of Taylor series linearizations or replicate methods such as those based on resampling methods. Variables have been included in the analyses files so that variance estimates can be based on Taylor series linearizations computed by SUDAAN for a stratified, without replacement design. Replicate methods can also be used to estimate the variances. Replicate weights (using the jackknife method of linearization) have been prepared. Appendix J gives examples of analyses using these methods.

Many of the standard statistical software packages, such as SPSS and older versions of SAS, do not properly compute variance estimates from weighted data that were collected with a design other than simple random sampling. Analyzing the Form 2002GB datasets with the proper use of PSW0 as the weighting factor in standard statistical programs will result in accurate point estimates but will not result in accurate variance estimates. Wolter (1985) provides a detailed discussion on methods used for variance estimation from sample surveys including replication, Taylor series approximation, and analytic methods.

Data Structure

Care was taken in the preparation of the survey analysis files to provide public access to data from the survey with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity. As described below, some detailed variables have been deleted from the public-release files either because (a) they are typically needed only to analyze survey methods and not needed to analyze the survey data or (b) they provide too great a chance of identifying an individual. For the latter reason, some demographic variables are available on public files only in a collapsed version.

In addition to a public-release file, a confidential file (containing a more complete set of variables than the public-release file) has been prepared for internal DMDC use. These files were prepared as SAS system files. An ASCII (Operating System or OS) flat file was prepared from the public-release SAS system file. File names are indicated in Table 10.

Table 10.
Analysis File Names

Type of File	File Name
Public-release File – SAS	WGR02PUB.SD2
Confidential File – SAS	WGR02CON.SD2
Public-release File – OS	WGR02PUB.DAT

The structure of the confidential file is shown in Figure 3. The confidential file contains the public-release file plus additional confidential variables.

All variables in the confidential file are documented in this report. Appendices E and F list all variables with a notation to indicate which variables are confidential, and show where each variable is documented. Intermediate weighting variables that appear only in the confidential file are documented by George and Kroeger (2003). Variables that appear in collapsed form in the public-release part of the file and in a fuller version only in the confidential file are discussed later.

Analyses

Both the confidential file and public-release file contain 60,415 records, one for every sampled individual. As depicted in Figure 3, these 60,415 records can be divided into three subgroups. The first subgroup, nonrespondents, includes all records indicated by ELIGFLGW=3, where no usable response was received or no information was received to indicate ineligibility (n= 40,433).

Assignment of a record to the other two subgroups was based on whether (a) an individual returned a “completed” survey; and (b) the person was eligible to be included in the population of interest (i.e., was found to be on active duty in the ADMF files in May 2001. Final eligibility was limited to those in the December 2001 Active Duty Master File (ADMF) and who were also in the September 2001 Defense Enrollment Eligibility Reporting System (DEERS) Medical point in time (PIT) extract and did not contact DRC to indicate that they were ineligible).

These two subgroups of records are required for analyses: records for study subjects determined to be ineligible (known ineligible), and records for study subjects who returned usable surveys and are assumed to be eligible (eligible respondents). Both the eligible respondents (ELIGFLGW = 1) and known ineligible (ELIGFLGW = 2) are included because both types of records were used to develop weights that sum to the population total, and both types of records are needed to compute accurate variance estimates by the Taylor series linearization method implemented by SUDAAN.

Figure 3.
The Structure of the Confidential File

Subgroups	Public-release File	Confidential and Detailed Methodological Variables	Number of Records in Subgroup
Nonrespondents (ELIGFLGW=3)			40,433
Known Ineligible Sample (ELIGFLGW=2)			22
Eligible Respondents (ELIGFLW=1)			19,960

Note. The shaded portion represents the subset of the data typically required for analysis.

Variables in the Survey Analysis Files

Public Release File

The variables in the public-release file fall into five categories: (a) derived from survey responses, (b) created by the operations contractor (DRC) to document survey operations, (c) created by the analysis contractor (Westat) to analyze the weighted dataset, (d) created by DMDC for analysis, and (e) extracted from administrative personnel records. Variables are grouped in these categories in Appendix F.

Information gathered on the survey. These variables came directly from the survey or were constructed using only information from the survey. There is at least one variable for every item in the survey except for a few items that had to be removed to preserve confidentiality. The annotated questionnaire (see Appendix C) contains the item names, the values used to code the pre-specified alternatives, and references to applicable coding notes in Appendix D. Appendix I provides information on how DMDC evaluated the special values used for variables in survey skip patterns and documents the treatment of these values in DMDC analyses reported.

Information on weighting. Derivation of weights is discussed by George and Kroeger (2003). See Appendix J for examples of analyses using these variables:

ELIGFLGW Eligibility flag

POPTVSTR Taylor series variance strata population

SMPTVSTR Taylor's series achieved sample size in variance strata

TVSTR	Taylor's series variance strata
PSTSTR	Final raking cell
PSW0	Final raking weight
PSW1-PSW170	Final raking weight for replicate weights 1-170

Variables constructed for analysis. Certain demographic variables, including some information collected on the survey form, had to be censored to preserve the anonymity promised to survey respondents and nonrespondents. For example, RS9901 are recodings of S9901. An “R” as the first letter of a variable listed in sections of Appendices E and F is an indication that the variable has been recoded to preserve anonymity of respondents and that a more complete variable is available only on the confidential analysis file.

Certain key demographic variables were constructed for DMDC analyses. These analytic variables, starting with “X”, are based primarily on self-reported information from the survey. In cases where the self-reported information was missing on member Service, paygrade, location, or respondent gender, data were imputed from member administrative records.

Two scales were constructed for race ethnicity and employment status. The race and ethnicity questions were combined and are reported in accordance with U.S. Office of Management and Budget Bulletin 00-02 (2000) guidance for aggregation and allocation of multiple race responses for use in civil rights monitoring and enforcement.

The SAS code used in constructing these analytic variables are included in Appendix I. One of the key demographic variables (i.e., SRSRETH1) is included in the confidential analytical variable section of the file. One other variable (i.e., R1XRETH1) is a recoding of the actual variable used in DMDC analysis — variables that are only contained on the confidential file because of the possibility of them being used in combination with other variables to identify individuals.

Appendix I also documents many of the decisions made in the analyses reported. For a large number of survey items, analysts must make decisions on the treatment of special codes used to indicate inconsistencies in the survey data, especially on respondent failures to follow skip pattern directions. Skip flags indicate if the skip directions were followed.

Information from records. While most of the variables used in sample design and selection are too detailed to be in the public-release file (see the later section on confidential variables), some items from the administrative records are included in the public-release file.

Confidential File

In addition to variables on the public-release file, the confidential file has five additional categories of variables: (a) the uncensored version of survey items that appear in a collapsed form in the public-release section, (b) the uncensored version of key demographic variables used in analyses that appear in a collapsed form in the public-release section; (c) detailed variables

created by DRC to document operations, (d) detailed variables used in sampling, and (e) detailed variables used in weighting. Variables are grouped in these categories in Appendices E and F.

Confidential variables—survey data. This section of the confidential file contains the original full version of survey variables that had to be recoded for the public-release file to preserve confidentiality. To the extent possible, recoded versions of these variables are in the public-release file section for variables constructed for analysis.

Confidential variables—analysis data. This section of the confidential file contains the original full version of analytic variables constructed by DMDC. To the extent possible, recoded versions of these variables are in the public-release file section for variables constructed for analysis.

Confidential variables—operations data. This section of the confidential file contains operational variables created by DRC. These variables are useful for methodological studies and/or were used by Westat in determining eligibility and response status.

The identifying variables describe how the record was processed once a survey was returned. The variables BATCH, SERIAL, and LITHO uniquely identify each returned survey. LITHO is the lithocode scanned from the survey. BATCH and SERIAL are the codes printed on the survey during scanning to identify the scan batch number and scan order of each survey. These numbers can be used to retrieve the paper copy of a survey for a short time after it has been scanned (e.g., should researchers want to check electronically-stored information against the respondent's answer on the paper survey). SCANDATE is the date the survey was scanned and INRECNO is the unique identification number assigned to each record/spouse. MAILING identifies which survey (i.e., the first-, second-, or third-wave mailing) the respondent returned. DUPRET and DUPRET2 indicate the receipt of multiple returns. DUPRET2 includes blank returns in the multiple count; DUPRET excludes these returns.

The classification variables describe how individual sample member's records were grouped and indexed. FLAG_FIN indicates the final disposition status of a sample member (i.e., survey returned, blank survey returned, not locatable, or no return). Several other classification variables were used to categorize a survey's final disposition. These variables are: BLKREAS, SCSINEL, and REFUSE. BLKREAS codes the reason given by the sample member for returning a blank survey, SCSINEL indicates the reason given by the sample member for being ineligible, and REFUSE indicates whether a sample member refused to complete a survey.

Confidential variables—sampling and record data. This section of the confidential file contains administrative file variables and constructed variables used in determining the sampling design. It also includes the sampling strata identifiers and counts.

Confidential variables—weighting. This section of the confidential file contains variables used in analysis of nonresponse and in the construction of the weights.

Figure 4.
Annotated Example of a Table from Appendix G

¹STATUS OF THE ARMED FORCES SURVEYS - Workplace and Gender Relations

Indicate the extent to which you are satisfied with each of the following.

² GB0216I ³ - Quality of medical care for yourself

⁴ OS DATA			⁵ SAS DATA			
COLS	LENGTH		FORMAT NAME	TYPE	LENGTH	INFORMAT
0049-0050	2		GSTSFl_	NUM	4	STDOS2

⁶ FREQ	⁷ PERCENT	⁸ OS VALUE	⁹ SAS VALUE	¹⁰ MEANING
399	0.7	-9	.	No response
4	0.0	-8	.A	Multiple response
39180	64.9	-1	.B	No survey return
1541	2.6	1	1	Very dissatisfied
3394	5.6	2	2	Dissatisfied
3660	6.1	3	3	Neither satisfied nor dissatisfied
8835	14.6	4	4	Satisfied
3402	5.6	5	5	Very satisfied
¹¹ 60415	¹¹ 100.1	TOTALS		

¹²PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

Using Appendix G. Regardless of whether analysts use all or only portions of the database, all analysts should replicate the results found in the tables in Appendix G. It is only by replicating these results that analysts can be sure that they are reading the data correctly. An annotated example of an Appendix G table is listed in Figure 4.

1. Codebook title and item text. The codebook title is the same for every table in Appendix G of this codebook. It lists both the general study and the specific survey form being summarized. If applicable, the indented text under the title presents the verbatim question or instructions that accompany a specific item in the survey.

2. Variable name. The variable name for a survey item is up to eight characters in length and corresponds to the variable name that is used in the SAS-based, public-release data file. The conventions for naming survey-derived variables are documented in Appendix C. Appendix F contains a full listing of the public-release file variables, as well as short descriptions of what the variables document.

3. Survey item text. For survey items, this text is the verbatim item wording. For other variables, this text provides a verbal description of the variable.

4. Location of the item on the OS data file. This block provides the location of the variable on the OS (ASCII) data file. The OS data block documents (a) the starting and ending column numbers where the data are stored and (b) the number of columns that the data occupy.

5. SAS data file information. This block indicates format name, variable type, length, and informat of the data in the SAS data file. The last block indicates the informat appropriate for reading the data from the OS data file.

6. Counts of item value responses. This column indicates the number of sample members who fall into the category corresponding to each value for the variable. The count provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 60,415 records in the accompanying database. Before running complex statistical analyses, analysts are encouraged to re-create these frequency tables. Re-creating the counts minimally ensures that the data are being correctly read by the analysts' computers and programs.

7. Respondent percentages for each value. This column indicates the percentage of sample members who marked each variable value. The percentages are calculated by dividing the row value in the "FREQ" column by the total listed at the bottom of the "FREQ" column. The percentages provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 60,415 records in the accompanying database.

8. Response OS values. This column presents the OS (ASCII) code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix D. For example, all negative values are found in Appendix D.

9. Response SAS values. This column presents the SAS code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix D. For example, all negative values are found in Appendix D.

10. Explanation of the item value codes. This column presents brief verbal explanations of the OS and SAS coding for each survey item. If the coded information corresponds to survey response alternatives, the text in the table is the verbatim response from the survey instrument. More detailed explanations are found in either the annotated survey form or in Appendix D.

11. Total of response frequencies and percents. The number appearing at the bottom of the "FREQ" column is the total number of sample members in the public-release file. This number is the same for every table in this codebook. That is, every sample member in the database is accounted for on every variable even if the variable indicates only that the information was missing for that sample member. The number appearing at the bottom of the "PERCENT" column is typically 100.0. Rounding error, however, occasionally causes the total percentage to be slightly above or below 100.0.

12. Messages to analysts. The messages alert analysts to situations specific to a variable including (a) rounding errors resulting in a total percentage other than 100 percent, (b) the variable having values that are "too numerous to list," (c) extraction of the variable from another specified database, (d) creation of the variable from two or more variables specified in the message, and (e) further clarification of the survey item corresponding to the variable.

13. Codebook page number. This is the Appendix G page number corresponding to a specific variable. Appendix F identifies the page number in Appendix G where the variable can be found.

APPENDIX A

STATUS OF THE ARMED FORCES WORKPLACE AND GENDER RELATIONS SURVEY (FORM 2002GB)

RCS: DD-P&R(A) 1947
Exp. 12/21/03
DMDC Survey No. 02-0001

STATUS OF THE ARMED FORCES SURVEYS

Workplace and Gender Relations (Form 2002GB)

DEFENSE MANPOWER DATA CENTER
ATTN: SURVEY PROCESSING ACTIVITY
DATA RECOGNITION CORPORATION
P.O. BOX 5720
MINNETONKA, MN 55343

COMPLETION INSTRUCTIONS

- This is not a test, so take your time.
- Select answers you believe are most appropriate.
- Use a blue or black pen.
- Please PRINT where applicable.
- Place an "X" in the appropriate box or boxes.

RIGHT

WRONG

- To change an answer, completely black out the wrong answer and put an "X" in the correct box as shown below.

CORRECT ANSWER

INCORRECT ANSWER

- Do not make any marks outside of the response and write-in boxes.

MAILING INSTRUCTIONS

- PLEASE RETURN YOUR COMPLETED SURVEY IN THE BUSINESS REPLY ENVELOPE. (If you misplaced the envelope, mail the survey to DMDC, c/o Data Recognition Corp., PO Box 5720, Minnetonka, MN 55343).
- IF YOU ARE RETURNING THE SURVEY FROM ANOTHER COUNTRY, BE SURE TO RETURN THE BUSINESS REPLY ENVELOPE ONLY THROUGH A U.S. GOVERNMENT MAIL ROOM OR POST OFFICE.
- FOREIGN POSTAL SYSTEMS WILL NOT DELIVER BUSINESS REPLY MAIL.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this statement informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 USC Sections 136 and 2358.

PRINCIPAL PURPOSE(S): Information collected in this survey will be used to report attitudes and perceptions of members of the Armed Forces about programs and policies. Information provided will assist in the formulation of policies to improve the working environment.

ROUTINE USE(S): None.

DISCLOSURE: Voluntary. However, maximum participation is encouraged so that data will be complete and representative. Ticket numbers and serial numbers on your survey are used to determine if you have responded and to use record data to properly analyze the survey data. Personal identifying information is not used in any reports. Only group statistics will be reported.

COPYRIGHTED MATERIAL

Items 35.a through 35.p are used by permission of the copyright holder, The Gallup Organization, 901 F Street N.W., Washington, D.C. 20004. Items 36.c through 36.i are used by permission of the copyright holder, International Survey Research (ISR), 303 East Ohio Street, Chicago, IL 60611.

BACKGROUND

1. Are you . . . ?

- ☐ Male
- ☐ Female

2. What is the highest degree or level of school that you have completed? *Mark the one answer that describes the highest grade or degree that you have completed.*

- ☐ Less than 12 years of school (no diploma)
- ☐ GED or other high school equivalency certificate
- ☐ High school diploma
- ☐ Less than 2 years of college credits, but no college degree
- ☐ 2-year college degree (AA/AS)
- ☐ More than 2 years of college credits, but no 4-year college degree
- ☐ 4-year college degree (BA/BS)
- ☐ Some graduate school, but no graduate degree
- ☐ Master's, doctoral or professional school degree (MA/MS/PhD/MD/JD/DVM)

3. Are you Spanish/Hispanic/Latino? *Mark "No" if not Spanish/Hispanic/Latino.*

- ☐ No, not Spanish/Hispanic/Latino
- ☐ Yes, Mexican, Mexican-American, Chicano
- ☐ Yes, Puerto Rican
- ☐ Yes, Cuban
- ☐ Yes, other Spanish/Hispanic/Latino

4. What is your race? *Mark one or more races to indicate what you consider yourself to be.*

- ☐ White
- ☐ Black or African American
- ☐ American Indian or Alaska Native
- ☐ Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese)
- ☐ Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian or Chamorro)
- ☐ Some other race (*Please specify below.*)

Please print.

5. What is your marital status?

- ☐ Never married
- ☐ Married
- ☐ Separated
- ☐ Divorced
- ☐ Widowed

6. In what Service are you?

- ☐ Army
- ☐ Navy
- ☐ Marine Corps
- ☐ Air Force
- ☐ Coast Guard

7. What is your current paygrade? *Mark one.*

- | | | | |
|------------------------------|------------------------------|------------------------------|---------------------------------------|
| <input type="checkbox"/> E-1 | <input type="checkbox"/> E-6 | <input type="checkbox"/> W-1 | <input type="checkbox"/> O-1/O1E |

| <input type="checkbox"/> E-3 | <input type="checkbox"/> E-8 | <input type="checkbox"/> W-3 | <input type="checkbox"/> O-3/O3E |
| <input type="checkbox"/> E-4 | <input type="checkbox"/> E-9 | <input type="checkbox"/> W-4 | <input type="checkbox"/> O-4 |
| <input type="checkbox"/> E-5 | | <input type="checkbox"/> W-5 | <input type="checkbox"/> O-5 |
| | | | <input type="checkbox"/> O-6 or above |

8. How many years of active-duty service have you **COMPLETED** (including enlisted, warrant officer, and commissioned officer time)? *To indicate less than one year, enter "00". To indicate thirty-five or more, enter "35".*

YEARS

9. In which term of service are you serving now? *Do not count extensions as separate terms of enlistment.*

- ☐ You are on indefinite status ⇒ **IF INDEFINITE STATUS, GO TO QUESTION 11**
- ☐ You are an officer serving an obligation
- ☐ 1st enlistment
- ☐ 2nd or later enlistment

10. How likely is it that you would be allowed to stay on active duty at the end of your current term or service obligation?

- | | |
|--|--|
| <input type="checkbox"/> Very likely | <input type="checkbox"/> Unlikely |
| <input type="checkbox"/> Likely | <input type="checkbox"/> Very unlikely |
| <input type="checkbox"/> Neither likely nor unlikely | |

11. Assuming you could stay on active duty, how likely is it that you would choose to do so?

- | | |
|--|--|
| <input type="checkbox"/> Very likely | <input type="checkbox"/> Unlikely |
| <input type="checkbox"/> Likely | <input type="checkbox"/> Very unlikely |
| <input type="checkbox"/> Neither likely nor unlikely | |

12. If you could stay on active duty as long as you want, how likely is it that you would choose to serve in the military for at least 20 years?

- ☐ Does not apply, you already have 20 or more years of service
- ☐ Very likely
- ☐ Likely
- ☐ Neither likely nor unlikely
- ☐ Unlikely
- ☐ Very unlikely

13. When you leave active duty, how many total years of service do you expect to have completed? *To indicate less than one year, enter "00". To indicate thirty-five or more, enter "35".*

YEARS

14. In general, has your life been better or worse than you expected when you first entered the military?

- | | |
|--|---|
| <input type="checkbox"/> Much better | <input type="checkbox"/> Somewhat worse |
| <input type="checkbox"/> Somewhat better | <input type="checkbox"/> Much worse |
| <input type="checkbox"/> About what you expected | <input type="checkbox"/> Don't remember |

15. In general, has your work been better or worse than you expected when you first entered the military?

- | | |
|--|---|
| <input type="checkbox"/> Much better | <input type="checkbox"/> Somewhat worse |
| <input type="checkbox"/> Somewhat better | <input type="checkbox"/> Much worse |
| <input type="checkbox"/> About what you expected | <input type="checkbox"/> Don't remember |

16. Indicate the extent to which you are satisfied with each of the following.

	Don't know or does not apply	Very satisfied	Satisfied	Neither satisfied nor dissatisfied	Dissatisfied	Very dissatisfied
a. Basic Pay	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Special and incentive pays including bonuses	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Basic Allowance for Subsistence (BAS)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Basic Allowance for Housing (BAH)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Retirement pay you would get ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Cost of living adjustments (COLA) to retirement pay	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Availability of medical care for yourself	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Availability of medical care for your family	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Quality of medical care for yourself	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. Quality of medical care for your family	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. Out of pocket costs for medical care	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
l. Availability of childcare	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
m. Quality of childcare	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
n. Affordability of childcare	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
o. Family support services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
p. Quality of your current residence .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
q. Quality of your work environment (i.e., space, cleanliness, and maintenance and repair)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
r. Opportunities for civilian education	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
s. Opportunities for professional development	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
t. Level of care and concern shown by supervisors for subordinates ..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
u. Quality of leadership	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
v. Your career, in general	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- ◆ 17. Indicate the extent to which you agree or disagree with the following statements about your Service.

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
--	----------------	-------	----------------------------	----------	-------------------

- | | | | | | |
|---|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| a. Being a member of your Service inspires you to do the best job you can | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. You are willing to make sacrifices to help your Service | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. You are glad that you are part of your Service | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. You are NOT willing to put yourself out to help your Service | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

18. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? Mark "Yes" or "No" for each item.

- | | Yes | No |
|---|--------------------------|--------------------------|
| a. Thought seriously about leaving the military | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Wondered what life might be like as a civilian | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Discussed leaving and/or civilian opportunities with family or friends | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Talked about leaving with your immediate supervisor | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Gathered information on education programs or colleges | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Gathered information about civilian job options (for example, read newspaper ads, attended a job fair) | <input type="checkbox"/> | <input type="checkbox"/> |
| g. Attended a program that helps people prepare for civilian employment | <input type="checkbox"/> | <input type="checkbox"/> |
| h. Prepared a resume | <input type="checkbox"/> | <input type="checkbox"/> |
| i. Applied for a job | <input type="checkbox"/> | <input type="checkbox"/> |
| j. Interviewed for a job | <input type="checkbox"/> | <input type="checkbox"/> |

19. If you had a friend considering active duty military service, would you recommend that he/she join? Mark "Yes" or "No" for each item.

- | a. A male friend | b. A female friend |
|------------------------------|------------------------------|
| <input type="checkbox"/> Yes | <input type="checkbox"/> Yes |
| <input type="checkbox"/> No | <input type="checkbox"/> No |

20. Do you have children aged 10 or older with whom you talk about careers, jobs, and education?

- ☐ Yes ⇒ IF YES, CONTINUE WITH QUESTION 21
☐ No ⇒ IF NO, GO TO QUESTION 23

21. When you talk with your children about their future, do you encourage them to consider the military?

- ☐ Yes
☐ No

22. When you talk with your children about their possible career choices, how positive or negative are you about ...

	Very positive	Positive	Neither positive nor negative	Negative	Very negative
--	---------------	----------	-------------------------------	----------	---------------

- | | | | | | |
|--|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| a. The military, in general? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Career opportunities in the military? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Serving in the military, but not as a career? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Part-time (National Guard/Reserve) opportunities in the military? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Career opportunities as a civilian federal government employee? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Career opportunities in the civilian sector? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| g. Seeking a college education? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

23. During the last 12 months, where have you served most of your active-duty time?

- ☐ In one of the 50 states, DC, Puerto Rico, a U.S. Territory or possession
☐ Please print the two-letter postal abbreviation - for example "AK" for Alaska
☐ Europe (e.g., Bosnia-Herzegovina, Germany, Italy, Serbia, United Kingdom)
☐ Former Soviet Union (e.g., Russia, Tajikistan, Uzbekistan)
☐ East Asia and Pacific (e.g., Australia, Japan, Korea)
☐ North Africa, Near East, or South Asia (e.g., Bahrain, Diego Garcia, Kuwait, Saudi Arabia)
☐ Sub-Saharan Africa (e.g., Kenya, South Africa)
☐ Western Hemisphere (e.g., Cuba, Honduras, Peru)

24. During the last 12 months, where have you lived most of your active-duty time?

- ☐ Aboard ship
☐ Barracks/dorm (including BEQ or BOQ)
☐ Military family housing, on base
☐ Military family housing, off base
☐ Civilian housing you own or pay mortgage on
☐ Military or civilian housing you rent, off base
☐ Other

In this survey, the definition of "military duties" includes deployments, TDYs/TADs, training, military education, time at sea, and field exercises/alerts.

25. In the past 12 months, have you been away from your permanent duty station/homeport overnight because of your military duties?

- ☐ Yes ⇒ IF YES, CONTINUE WITH QUESTION 26
☐ No ⇒ IF NO, GO TO QUESTION 29

26. During the past 12 months, how many separate times were you away from your permanent duty station/homeport for at least one night because of your military duties?

- | | |
|--------------------------------------|---|
| <input type="checkbox"/> 1 - 2 times | <input type="checkbox"/> 9 - 10 times |
| <input type="checkbox"/> 3 - 4 times | <input type="checkbox"/> 11 - 12 times |
| <input type="checkbox"/> 5 - 6 times | <input type="checkbox"/> 13 - 24 times |
| <input type="checkbox"/> 7 - 8 times | <input type="checkbox"/> 25 times or more |

27. During the past 12 months, how long were you away from your permanent duty station/homeport for the following military duties? *Assign each of your nights away to only one type of military duty.*

	10 to 12 months	7 months to less than 10 months	5 months to less than 7 months	3 months to less than 5 months	1 month to less than 3 months	Less than 1 month	None
a. Operation Enduring Freedom..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Peacekeeping or other contingency operation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Foreign humanitarian assistance mission	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Unit training at combat training center.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Counter drug operations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

g. Time at sea for scheduled deployments (other than for the above)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Other time at sea (other than for the above)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Joint training/field exercises/alerts (other than for the above)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. Military education (other than for the above)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. Other TDYs/TADs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

28. In the past 12 months, what was the total length of time you were away from your permanent duty station/homeport because of your military duties? *Add up all nights away from your permanent duty station.*

- ☐ Less than 1 month
☐ 1 month to less than 3 months
☐ 3 months to less than 5 months
☐ 5 months to less than 7 months
☐ 7 months to less than 10 months
☐ 10 to 12 months

YOUR WORKPLACE

- If you have been at your current duty location (ship) for one month or more, answer the questions on Workplace for your current duty location (ship), even if you are not permanently stationed at that location.
- Otherwise, answer the questions for the last duty location where you were located for at least a month.

29. How many months have you completed at your duty location/ship during your current tour? To indicate ninety-nine or more, enter "99".

MONTHS

30. Is this location your permanent duty location/ship?

- ☐ Yes
☐ No, you are TDY/TAD attending training
☐ No, you are TDY/TAD for reasons other than training

31. Are you currently . . . Mark "Yes" or "No" for each item.

	Yes	No
a. A student in a military course?	<input type="checkbox"/>	<input type="checkbox"/>
b. Serving aboard a ship at sea?	<input type="checkbox"/>	<input type="checkbox"/>
c. In the shore part of a ship/shore rotation?	<input type="checkbox"/>	<input type="checkbox"/>
d. In a military occupational specialty (e.g., MOS/AFSC/Rating) not usually held by persons of your gender?	<input type="checkbox"/>	<input type="checkbox"/>
e. In a work environment where members of your gender are uncommon?	<input type="checkbox"/>	<input type="checkbox"/>
f. On a deployment that will keep you away from home for at least 30 consecutive days?	<input type="checkbox"/>	<input type="checkbox"/>

32. What is the gender of your immediate supervisor?

- ☐ Male
☐ Female

33. What is the paygrade of your immediate supervisor?

- | | | |
|---------------------------------------|------------------------------|---------------------------------------|
| <input type="checkbox"/> E-4 or below | <input type="checkbox"/> W-1 | <input type="checkbox"/> O-1/O1E |
| <input type="checkbox"/> E-5 | <input type="checkbox"/> W-2 | <input type="checkbox"/> O-2/O2E |
| <input type="checkbox"/> E-6 | <input type="checkbox"/> W-3 | <input type="checkbox"/> O-3/O3E |
| <input type="checkbox"/> E-7 | <input type="checkbox"/> W-4 | <input type="checkbox"/> O-4 |
| <input type="checkbox"/> E-8 | <input type="checkbox"/> W-5 | <input type="checkbox"/> O-5 |
| <input type="checkbox"/> E-9 | | <input type="checkbox"/> O-6 or above |
- ☐ Civilian GS-1 to GS-6 (or equivalent)
☐ Civilian GS-7 to GS-11 (or equivalent)
☐ Civilian GS-12 or above (or equivalent)

◆ 34. Which of the following statements best describes the gender mix of your current work group, that is, the people with whom you work on a day-to-day basis?

- ☐ All men
- ☐ Almost entirely men
- ☐ More men than women
- ☐ About equal numbers of men and women
- ☐ More women than men
- ☐ Almost entirely women
- ☐ All women

35. To what extent do you agree or disagree with the following statements about your workplace?

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
a. I know what is expected of me at work	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. I have the materials and equipment I need to do my work right	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. At work, I have the opportunity to do what I do best every day	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. In the last 7 days, I have received recognition or praise for doing good work	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. My supervisor, or someone at work, seems to care about me as a person	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. There is someone at work who encourages my development	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. At work, my opinions seem to count	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. The mission/purpose of my Service makes me feel my job is important ..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. My coworkers are committed to doing quality work	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. I have a best friend at work	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. In the last 6 months, someone at work has talked to me about my progress	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
l. This last year, I have had opportunities at work to learn and to grow	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
m. At my workplace, a person's job opportunities and promotions are based only on work-related characteristics	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
n. My supervisor helps everyone in my work group feel included	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
o. I trust my supervisor to deal fairly with issues of equal treatment at my workplace	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
p. At my workplace, all employees are kept well informed about issues and decisions that affect them	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

36. Please indicate whether you agree or disagree with the following statements.

	Agree	Tend to agree	?	Tend to disagree	Disagree
a. My chain of command keeps me informed about important issues	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. If I make a request through channels in my work group, I know somebody will listen	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. My Service has established a climate where the truth can be taken up the chain of command without fear of reprisal	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. I find it very difficult to balance my work and personal responsibilities ..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Priorities or work objectives are changed so frequently, I have trouble getting my work done	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. My supervisor encourages people to learn from mistakes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. My supervisor has sufficient authority	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. I believe my Service's core values are clear	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Leadership generally understands the problems we face on our jobs ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

37. How much do you agree or disagree with each of the following statements about your immediate supervisor? *The term "work group" refers to the people with whom you work on a day-to-day basis.*

	Don't know	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
a. Handling the technical-skills part of the job (fully understands the capabilities and limitations of equipment in the work group; demonstrates knowledge of tactical skills)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Handling the people-skills part of the job (demonstrates effective interpersonal skills, listens attentively, demonstrates concern for individuals)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Handling the conceptual-skills part of the job (thinks through decisions, recognizes and balances competing requirements, uses analytical techniques to solve problems) ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

37. Continued

	Don't know	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
d. Communicating (provides clear direction, explains ideas so that they are easily understood, listens well, keeps others informed, and writes well)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Decision making (makes sound decisions in a timely manner, includes all relevant information in decisions and can generate innovative solutions to unique problems)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Motivating (creates a supportive work environment, inspires people to do their best, acknowledges the good performance of others, and disciplines in a firm, fair, and consistent manner).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Developing (encourages the professional growth of subordinates, is an effective teacher, uses counseling to provide feedback, provides the opportunity to learn, and delegates authority).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Building (builds cohesive teams, gains the cooperation of all team members, encourages and participates in organizational and work group activities, focuses the work group on mission accomplishment)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Learning (encourages open discussion that improves the organization, willingly accepts new challenges, helps the work group adapt to changing circumstances, recognizes personal limitations). .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. Planning and organizing (develops effective plans to achieve organizational goals, anticipates how different plans will look when executed, sets clear priorities, willingly modifies plans when circumstances change). . . .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. Executing (completes assigned missions to standard, monitors the execution of plans to identify problems, is capable of refining plans to exploit unforeseen opportunities)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
l. Assessing (accurately assesses the work group's strengths and weaknesses, conducts effective in-progress reviews and after-action reviews, takes time to find out what subordinate units are doing).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

38. To what extent do you agree or disagree with the following statements about your work group?

	Don't know	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
a. The leaders in your work group set high standards for Service members in terms of good behavior and discipline	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. The leaders in your work group are more interested in looking good than being good	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. You are impressed with the quality of leadership in your work group. .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. You would go for help with a personal problem to people in your chain of command	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. The leaders in your work group are not concerned with the way Service members treat each other as long as the job gets done	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. The leaders in your work group are more interested in furthering their careers than in the well-being of their Service members . .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Leaders in your work group treat Service members with respect . . .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Leaders most often get willing and whole-hearted cooperation from the Service members in your work group	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. The NCOs/petty officers in your chain of command are a good source of support for Service members	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

39. To what extent do you agree or disagree with the following statements about . . .

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
THE PEOPLE YOU WORK WITH					
a. There is very little conflict among your coworkers.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. You like your coworkers.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Your coworkers put in the effort required for their jobs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. You are satisfied with the relationships you have with your coworkers	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. The people in your work group tend to get along	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. The people in your work group are willing to help each other.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

◆ 39. Continued

Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree

|---|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| g. Your work provides you with a sense of pride | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| h. Your work makes good use of your skills | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| i. Your present assignment is good for your military career | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| j. You like the kind of work you do | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| k. Your job gives you the chance to acquire valuable skills | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| l. You are satisfied with your job as a whole | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

40. How often during the past 12 months have you been in workplace situations where military personnel, civilian employees, and/or contractor employees have targeted you with any of the following behaviors?

Very often	Often	Sometimes	Once or twice	Never
------------	-------	-----------	---------------	-------

- | | | | | | |
|---|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| a. Using an angry tone of voice | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Avoiding you | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Making you look bad | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Yelling or raising one's voice | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Withholding information from you ... | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Swearing directed at you | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| g. Talking about you behind your back . | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| h. Insulting, criticizing you (including sarcasm) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| i. Saying offensive or crude things about you | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| j. Flaunting status or power over you . | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

MENTORING

41. In your opinion, have you ever had a mentor while in the military?

- ☐ Yes, you have one now. ⇒ **IF YES, CONTINUE WITH QUESTION 42**
- ☐ Yes, you had one, but you don't have one now. ⇒ **IF YES, CONTINUE WITH QUESTION 42**
- ☐ No, but you would have liked one. ⇒ **IF NO, GO TO QUESTION 45**
- ☐ No, and you never wanted one. ⇒ **IF NO, GO TO QUESTION 45**
- ☐ No, you do not know what a mentor is. ⇒ **IF NO, GO TO QUESTION 45**

42. Who is your current mentor (or, if you have no current mentor, who was your most recent mentor)? **Mark one.**

- ☐ A commissioned officer
- ☐ A warrant officer
- ☐ An NCO/petty officer
- ☐ A junior enlisted Service member
- ☐ A DoD civilian
- ☐ Other (Please specify below.)

Please print.

43. Is your current mentor (or was your most recent mentor) . . . ? **Mark one.**

- ☐ Your rater
- ☐ Your senior rater
- ☐ A person who is/was higher in rank than you, but not your rater or your senior rater
- ☐ A person who is/was at your same rank
- ☐ A person who is/was lower in rank than you
- ☐ A person who is not or was not in the military at the time the mentoring was provided

44. If your current mentor (or if none now, your most recent mentor) provides the following assistance, how helpful is/was each to you? **Please mark one answer for each statement.**

Extremely helpful	Very helpful	Moderately helpful	Slightly helpful	Not at all helpful	Not provided
-------------------	--------------	--------------------	------------------	--------------------	--------------

- | | | | | | |
|--|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| a. Teaches job skills | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Gives feedback on your job performance | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Assigns challenging tasks | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Helps develop your skills/competencies for future assignments | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Provides support and encouragement | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Provides personal and social guidance | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| g. Provides career guidance | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| h. Demonstrates trust | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| i. Acts as a role model | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| j. Protects you | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| k. Invites you to observe activities at his/her level | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| l. Instills Service core values | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| m. Provides moral/ethical guidance.. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| n. Teaches/advises on organizational politics | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| o. Provides sponsorship/contacts to advance your career | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| p. Assists in obtaining future assignments | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

READINESS, HEALTH, AND WELL-BEING

45. Taking into account your training and experience, how well prepared are you to perform your wartime job?

- | | |
|---|---|
| <input type="checkbox"/> Very well prepared | <input type="checkbox"/> Poorly prepared |
| <input type="checkbox"/> Well prepared | <input type="checkbox"/> Very poorly prepared |
| <input type="checkbox"/> Neither well nor poorly prepared | |

46. How well prepared are you physically to perform your wartime job?

- | | |
|---|---|
| <input type="checkbox"/> Very well prepared | <input type="checkbox"/> Poorly prepared |
| <input type="checkbox"/> Well prepared | <input type="checkbox"/> Very poorly prepared |
| <input type="checkbox"/> Neither well nor poorly prepared | |

47. Not including injuries, how many days in the past 12 months have you been too sick to do your job?

- | | |
|--------------------------------------|--|
| <input type="checkbox"/> 0 | <input type="checkbox"/> 11 - 15 days |
| <input type="checkbox"/> 1 - 5 days | <input type="checkbox"/> 16 - 20 days |
| <input type="checkbox"/> 6 - 10 days | <input type="checkbox"/> 21 or more days |

48. How many days in the past 12 months have you been unable to do your job because of an injury suffered at work?

- | | |
|--------------------------------------|--|
| <input type="checkbox"/> 0 | <input type="checkbox"/> 11 - 15 days |
| <input type="checkbox"/> 1 - 5 days | <input type="checkbox"/> 16 - 20 days |
| <input type="checkbox"/> 6 - 10 days | <input type="checkbox"/> 21 or more days |

49. How many days in the past 12 months have you been unable to do your job because of an injury suffered outside of work?

- | | |
|--------------------------------------|--|
| <input type="checkbox"/> 0 | <input type="checkbox"/> 11 - 15 days |
| <input type="checkbox"/> 1 - 5 days | <input type="checkbox"/> 16 - 20 days |
| <input type="checkbox"/> 6 - 10 days | <input type="checkbox"/> 21 or more days |

50. How true or false is each of the following statements for you? *Please mark one answer for each statement.*

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|--------------------------|
| | Definitely true | | | |
| | Mostly true | | | |
| | Mostly false | | | |
| | Definitely false | | | |
| a. I am as healthy as anybody I know | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. I seem to get sick a little easier than other people | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. I expect my health to get worse | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. My health is excellent | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

51. How much of the time during the past 4 weeks have you had any of the following problems with your work or other regular daily activities as a result of your physical health? *Please mark one answer for each statement.*

- | | | | | |
|--|----------------------------|--------------------------|--------------------------|--------------------------|
| | All or most of the time | | | |
| | A good bit of the time | | | |
| | Some of the time | | | |
| | Little or none of the time | | | |
| a. Cut down on the amount of time you spent on work or other activities | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Accomplished less than you would like. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Were limited in the kind of work or other activities you do | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Had difficulty performing the work or other activities you do (for example, it took extra effort) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

52. How much of the time during the past 4 weeks have you had any of the following problems with your work or other regular daily activities as a result of emotional problems (such as feeling depressed or anxious)? *Please mark one answer for each statement.*

- | | | | | |
|---|----------------------------|--------------------------|--------------------------|--------------------------|
| | All or most of the time | | | |
| | A good bit of the time | | | |
| | Some of the time | | | |
| | Little or none of the time | | | |
| a. Cut down on the amount of time you spent on work or other activities | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Accomplished less than you would like. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Didn't do work or other activities as carefully as usual | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

53. How much of the time during the past 4 weeks have you ... *Please mark one answer for each statement.*

- | | | | | |
|---|----------------------------|--------------------------|--------------------------|--------------------------|
| | All or most of the time | | | |
| | A good bit of the time | | | |
| | Some of the time | | | |
| | Little or none of the time | | | |
| a. Felt calm and peaceful? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Been a very nervous person? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Felt so down in the dumps that nothing could cheer you up? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Felt downhearted and blue? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Been a happy person? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

GENDER RELATED EXPERIENCES IN THE MILITARY IN THE PAST 12 MONTHS

54. During the past 12 months, did any of the following happen to you? If it did, do you believe your gender was a factor? *Mark only one answer for each statement.*

Yes, and your gender was a factor
Yes, but your gender was NOT a factor
No, or does not apply

- | | | | |
|--|-----------------------------------|---------------------------------------|--------------------------|
| | Yes, and your gender was a factor | Yes, but your gender was NOT a factor | No, or does not apply |
| a. You were rated lower than you deserved on your last evaluation | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Your last evaluation contained unjustified negative comments | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. You were held to a higher performance standard than others | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. You did not get an award or decoration given to others in similar circumstances .. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Your current assignment has not made use of your job skills | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Your current assignment is not good for your career if you continue in the military | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| g. You did not receive day-to-day, short-term tasks that would have helped you prepare for advancement | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| h. You did not have a professional relationship with someone who advised (mentored) you on career development or advancement | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| i. You did not learn-until it was too late-of opportunities that would have helped your career | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| j. You were unable to get straight answers about your promotion possibilities | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| k. You were excluded from social events important to career development and being kept informed | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| l. You did not get a job assignment that you wanted and for which you were qualified | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| m. If you answered "Yes, and your gender was a factor" to "l" above, was this assignment legally open to women? | | | |
| | <input type="checkbox"/> No | <input type="checkbox"/> Yes | |
| n. Have you had any other adverse personnel actions in the past 12 months? (If "Yes," please specify below.) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Please print.

55. In this question you are asked about sex/gender related talk and/or behavior that was unwanted, uninvited, and in which you did not participate willingly.

How often during the past 12 months have you been in situations involving

- Military Personnel
 - on- or off-duty
 - on- or off-installation or ship; and/or
- Civilian Employees and/or Contractors
 - In your workplace or on your installation/ship

where one or more of these individuals (of either gender) . . .

- | | | | | | |
|---|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| | Very often | Often | Sometimes | Once or twice | Never |
| a. Repeatedly told sexual stories or jokes that were offensive to you? ... | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Referred to people of your gender in insulting or offensive terms? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Made unwelcome attempts to draw you into a discussion of sexual matters (for example, attempted to discuss or comment on your sex life)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Treated you "differently" because of your gender (for example, mistreated, slighted, or ignored you)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Made offensive remarks about your appearance, body, or sexual activities? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| f. Made gestures or used body language of a sexual nature that embarrassed or offended you? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| g. Made offensive sexist remarks (for example, suggesting that people of your gender are not suited for the kind of work you do)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| h. Made unwanted attempts to establish a romantic sexual relationship with you despite your efforts to discourage it? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| i. Put you down or was condescending to you because of your gender? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| j. Continued to ask you for dates, drinks, dinner, etc., even though you said "No"? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| k. Made you feel like you were being bribed with some sort of reward or special treatment to engage in sexual behavior? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| l. Made you feel threatened with some sort of retaliation for not being sexually cooperative (for example, by mentioning an upcoming review)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

55. Continued

	Very often	Often	Sometimes	Once or twice	Never
m. Touched you in a way that made you feel uncomfortable?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
n. Made unwanted attempts to stroke, fondle, or kiss you?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
o. Treated you badly for refusing to have sex?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
p. Implied faster promotions or better treatment if you were sexually cooperative?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
q. Attempted to have sex with you without your consent or against your will, but was not successful? ...	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
r. Had sex with you without your consent or against your will?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
s. Other unwanted gender-related behavior? (Unless you mark "Never," please describe below.) ...	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Please print.

56. Do you consider ANY of the behaviors (a through s) which YOU MARKED AS HAPPENING TO YOU in Question 55 to have been sexual harassment?

- ☒ None were sexual harassment ⇒ **CONTINUE WITH QUESTION 57**
- ☒ Some were sexual harassment; some were not sexual harassment ⇒ **CONTINUE WITH QUESTION 57**
- ☒ All were sexual harassment ⇒ **CONTINUE WITH QUESTION 57**
- ☒ Does not apply—I marked "Never" to every item in Question 55 ⇒ **GO TO QUESTION 76**

One Situation with the Greatest Effect

57. Think about the situation(s) you experienced during the past 12 months that involved the behaviors you marked in Question 55. Now pick the SITUATION THAT HAD THE GREATEST EFFECT ON YOU.

57. Continued

What did the person(s) do during this situation?
Mark one answer for each behavior.

	Did this	Did not do this
a. Repeatedly told sexual stories or jokes that were offensive to you	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. Referred to people of your gender in insulting or offensive terms	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Made unwelcome attempts to draw you into a discussion of sexual matters (for example, attempted to discuss or comment on your sex life)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
d. Treated you "differently" because of your gender (for example, mistreated, slighted, or ignored you)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
e. Made offensive remarks about your appearance, body, or sexual activities	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
f. Made gestures or used body language of a sexual nature that embarrassed or offended you	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
g. Made offensive sexist remarks (for example, suggesting that people of your gender are not suited for the kind of work you do)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
h. Made unwanted attempts to establish a romantic sexual relationship with you despite your efforts to discourage it	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
i. Put you down or was condescending to you because of your gender	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
j. Continued to ask you for dates, drinks, dinner, etc., even though you said "No"	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
k. Made you feel like you were being bribed with some sort of reward or special treatment to engage in sexual behavior	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
l. Made you feel threatened with some sort of retaliation for not being sexually cooperative (for example, by mentioning an upcoming review)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
m. Touched you in a way that made you feel uncomfortable	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
n. Made unwanted attempts to stroke, fondle, or kiss you	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
o. Treated you badly for refusing to have sex ..	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
p. Implied faster promotions or better treatment if you were sexually cooperative ..	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
q. Attempted to have sex with you without your consent or against your will, but was not successful	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
r. Had sex with you without your consent or against your will	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
s. Other unwanted gender-related behavior (If you mark "Did this," please describe below.)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Please print.

The remaining questions in this section refer to the one situation that had the greatest effect on you - Question 57.

58. To what degree was this situation . . .

	Extremely	Very	Moderately	Slightly	Not at all
a. Annoying?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Offensive?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Disturbing?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Threatening?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Embarrassing?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Frightening?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

59. Where and when did this situation occur?

	All of it	Most of it	Some of it	None of it
a. At a military installation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. At work (the place where you perform your military duties)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. During duty hours	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. In the local community around an installation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

60. What was the gender of the person(s) involved?

- ☐ Male
☐ Female
☐ Both males and females were involved
☐ Gender unknown

61. Was the person(s) involved . . . Mark "Yes" or "No" for each.

	Yes	No
a. Your immediate military supervisor?	<input type="checkbox"/>	<input type="checkbox"/>
b. Your immediate civilian supervisor?	<input type="checkbox"/>	<input type="checkbox"/>
c. Your unit commander?	<input type="checkbox"/>	<input type="checkbox"/>
d. Other military person(s) of higher rank/grade than you?	<input type="checkbox"/>	<input type="checkbox"/>
e. Other civilian employee(s) of higher rank/grade than you?	<input type="checkbox"/>	<input type="checkbox"/>
f. Your military coworker(s)?	<input type="checkbox"/>	<input type="checkbox"/>
g. Your civilian coworker(s)?	<input type="checkbox"/>	<input type="checkbox"/>
h. Your military subordinate(s)?	<input type="checkbox"/>	<input type="checkbox"/>
i. Your civilian subordinate(s)?	<input type="checkbox"/>	<input type="checkbox"/>
j. Your military training instructor?	<input type="checkbox"/>	<input type="checkbox"/>
k. Your civilian training instructor?	<input type="checkbox"/>	<input type="checkbox"/>
l. Other military person(s)?	<input type="checkbox"/>	<input type="checkbox"/>
m. Other civilian person(s)?	<input type="checkbox"/>	<input type="checkbox"/>
n. Other or unknown person(s)?	<input type="checkbox"/>	<input type="checkbox"/>

62. During the course of the situation you have in mind, how often did the event(s) occur?

- ☐ Once
☐ Occasionally
☐ Frequently
☐ Almost every day
☐ More than once a day

63. How long did this situation last, or if continuing, how long has it been going on?

- ☐ Less than 1 week
☐ 1 week to less than 1 month
☐ 1 month to less than 3 months
☐ 3 months to less than 6 months
☐ 6 months to less than 9 months
☐ 9 months to less than 12 months
☐ 12 months or more

64. Is the situation still going on?

- ☐ Yes
☐ No

65. To what extent did you . . .

	Very large extent	Large extent	Moderate extent	Small extent	Not at all
a. Try to avoid the person(s) who bothered you?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Try to forget it?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Tell the person(s) you didn't like what he or she was doing?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Stay out of the person's or persons' way?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Tell yourself it was not really important?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Talk to some of your <u>family</u> about the situation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Talk to some of your <u>coworkers</u> about the situation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Talk to some of your <u>friends</u> about the situation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Talk to a <u>chaplain or counselor</u> about the situation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. Try to avoid being alone with the person(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. Tell the person(s) to stop?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
l. Just put up with it?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
m. Ask the person(s) to leave you alone?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
n. Blame yourself for what happened?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
o. Assume the person(s) meant well?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
p. Pray about it?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
q. Pretend not to notice, hoping the person(s) would leave you alone?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
r. Do something else in response to the situation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

66. Did you report this situation to any of the following installation/Service/DoD individuals or organizations? Mark "Yes" or "No" for each.

	Yes	No
a. Your immediate supervisor	<input type="checkbox"/>	<input type="checkbox"/>
b. Someone else in your chain-of-command (including your commanding officer)	<input type="checkbox"/>	<input type="checkbox"/>
c. Supervisor(s) of the person(s) who did it ..	<input type="checkbox"/>	<input type="checkbox"/>
d. Special military office responsible for handling these kinds of complaints (for example, Military Equal Opportunity or Civil Rights Office)	<input type="checkbox"/>	<input type="checkbox"/>
e. Other installation/Service/DoD person or office with responsibility for follow-up ..	<input type="checkbox"/>	<input type="checkbox"/>

67. Did you answer "Yes" to at least one item in Question 66?

- ☐ Yes ⇒ IF YES, CONTINUE WITH QUESTION 68
☐ No ⇒ IF NO, GO TO QUESTION 74

68. What actions were taken in response to your report? Mark "Yes," "No," or "Don't know" for each.

	Don't know	No	Yes
a. Person(s) who bothered you was/were talked to about the behavior	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Your complaint was/is being investigated .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. You were encouraged to drop the complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Your complaint was discounted or not taken seriously (for example, you were told that's just the way it is, not to overreact, etc.)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. No action was taken	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

69. How satisfied are you with the following aspects of the reporting process?

	Very satisfied	Satisfied	Neither satisfied nor dissatisfied	Dissatisfied	Very dissatisfied
a. Availability of information about how to file a complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Treatment by personnel handling your complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Amount of time it took/is taking to resolve your complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. How well you are/were kept informed about the progress of your complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Degree to which your privacy is/was being protected	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

70. Is the action still being processed?

- ☐ Yes ⇒ IF YES, GO TO QUESTION 73
☐ No ⇒ IF NO, GO TO QUESTION 71

71. What was the outcome of your complaint? Mark "Yes," "No," or "Don't know" for each.

	Don't know	No	Yes
a. They found your complaint to be true	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. They found your complaint to be untrue ..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. They were unable to determine whether your complaint was true or not	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. The outcome of your complaint was explained to you	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. The situation was corrected	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Some action was taken against the person(s) who bothered you	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Nothing was done about the complaint ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Action was taken against you	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

72. How satisfied were you with the outcome of your complaint?

- ☐ Very satisfied
☐ Satisfied
☐ Neither satisfied nor dissatisfied
☐ Dissatisfied
☐ Very dissatisfied

→ If you were dissatisfied/very dissatisfied with the outcome of your complaint, please specify why below.

Please print.

73. Did you report all of the behaviors you marked in Question 57 to one of the installation/Service/DoD individuals or organizations listed in Question 66?

- ☐ Yes ⇒ IF YES, GO TO QUESTION 75
☐ No ⇒ IF NO, CONTINUE WITH QUESTION 74

74. What were your reasons for not reporting behaviors to any of the installation/Service/DoD individuals or organizations in Question 66? Mark "Yes" or "No" for each.

	Yes	No
a. Was not important enough to report	<input type="checkbox"/>	<input type="checkbox"/>
b. You did not know how to report	<input type="checkbox"/>	<input type="checkbox"/>
c. You felt uncomfortable making a report ...	<input type="checkbox"/>	<input type="checkbox"/>
d. You took care of the problem yourself	<input type="checkbox"/>	<input type="checkbox"/>
e. You talked to someone informally in your chain-of-command	<input type="checkbox"/>	<input type="checkbox"/>
f. You did not think anything would be done if you reported	<input type="checkbox"/>	<input type="checkbox"/>
g. You thought you would not be believed if you reported	<input type="checkbox"/>	<input type="checkbox"/>
h. You thought your coworkers would be angry if you reported	<input type="checkbox"/>	<input type="checkbox"/>
i. You wanted to fit in	<input type="checkbox"/>	<input type="checkbox"/>

74. Continued

	Yes	No
j. You thought reporting would take too much time and effort	<input type="checkbox"/>	<input type="checkbox"/>
k. You thought you would be labeled a troublemaker if you reported	<input type="checkbox"/>	<input type="checkbox"/>
l. A <u>peer</u> talked you out of making a formal complaint	<input type="checkbox"/>	<input type="checkbox"/>
m. A <u>supervisor</u> talked you out of making a formal complaint	<input type="checkbox"/>	<input type="checkbox"/>
n. You did not want to hurt the person's or persons' feelings, family, or career.....	<input type="checkbox"/>	<input type="checkbox"/>
o. You thought your performance evaluation or chance for promotion would suffer if you reported	<input type="checkbox"/>	<input type="checkbox"/>
p. You were afraid of retaliation from the <u>person(s) who did it</u>	<input type="checkbox"/>	<input type="checkbox"/>
q. You were afraid of retaliation or reprisals from <u>friends/associates of the person(s) who did it</u>	<input type="checkbox"/>	<input type="checkbox"/>
r. You were afraid of retaliation or reprisals from <u>your supervisors or chain-of-command</u>	<input type="checkbox"/>	<input type="checkbox"/>
s. Some other reason	<input type="checkbox"/>	<input type="checkbox"/>

75. Sometimes people may have problems at work after a situation like the one you experienced. Did any of the following things happen as a result of the situation or how you responded to it? Mark "Yes," "No," or "Don't know" for each.

	Don't know	No	Yes
a. You were ignored by others at work	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. You were blamed for the situation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. People gossiped about you in an unkind or negative way	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. You lost perks/privileges that you had before	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. You were given less favorable job duties..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. You were denied an opportunity for training	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. You were given an unfair performance evaluation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. You were unfairly disciplined	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. You were denied a promotion	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. You were transferred to a less desirable job	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. You were unfairly demoted	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
l. You were mistreated in some other way ..	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

OTHER WORKPLACE EXPERIENCES

The following items describe situations that sometimes happen in the workplace. What do you think would happen at your duty station in situations like these?

76. Suppose that a coworker at your duty station were to talk a lot at work about sex, trying to get others to talk about it, too. Mark if you "agree" or "disagree" with each of the following statements.

Strongly agree
Agree
Neither agree nor disagree
Disagree
Strongly disagree

If a coworker at your duty station were to do this ...

a. Others in the unit would not care ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. The coworker would get in trouble with his or her supervisor	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Others in the unit would tell the coworker to stop	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Leadership would ignore it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If another coworker were to complain about this ...

e. The complaint would be taken seriously	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. It would be risky for the person making the complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Some corrective action would be taken	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Other coworkers would treat the person who made the complaint badly	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. The complaint would be ignored	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

77. Suppose that a coworker at your duty station were to keep asking others for dates even after they have made it clear that they were not interested. Mark if you "agree" or "disagree" with each of the following statements.

Strongly agree
Agree
Neither agree nor disagree
Disagree
Strongly disagree

If a coworker at your duty station were to do this ...

a. Others in the unit would not care ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. The coworker would get in trouble with his or her supervisor	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Others in the unit would tell the coworker to stop	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Leadership would ignore it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If another coworker were to complain about this ...

e. The complaint would be taken seriously	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. It would be risky for the person making the complaint	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Some corrective action would be taken	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Other coworkers would treat the person who made the complaint badly	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. The complaint would be ignored	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

78. Suppose that a supervisor at your duty station were to suggest that the way to get along and get good assignments is to be sexually cooperative to him/her. *Mark if you "agree" or "disagree" with each of the following statements.*

Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
----------------	-------	----------------------------	----------	-------------------

If a supervisor at your duty station were to do this . . .

IN YOUR SERVICE

o. An advice/hotline available for reporting sexual harassment complaints?.....

84. Do you think sexual harassment is more of a problem inside the military or more of a problem outside the military?

- ☒ More of a problem inside the military
- ☒ More of a problem outside the military
- ☒ Same/no difference

85. In your opinion, has sexual harassment in our nation become more or less of a problem over the last 4 years?

- ☒ Less of a problem today
- ☒ About the same as 4 years ago
- ☒ More of a problem today

86. In your opinion, has sexual harassment in the military become more or less of a problem over the last 4 years?

- ☐ Don't know, you have been in the military less than 4 years
- ☐ Less of a problem today
- ☐ About the same as 4 years ago
- ☐ More of a problem today

87. In your opinion, how often does sexual harassment occur in the military now, as compared with a few years ago?

☒ Don't know, you have been in the military less than 4 years

☒ Much less often

☒ Less often

☒ About the same

☒ More often

☒ Much more often

88. Would you like to know the results of this survey? *If you are interested in being notified when a brief summary of the results is available on the Web, please print your e-mail address below. This e-mail address will be used for no other purpose than this notification.*

89. On what date did you complete this survey?

COMMENTS

90. If you have comments or concerns that you were not able to express in answering this survey, please print them in the space provided. Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. If you want to report a harassment problem, information about how to do so is available through your command Equal Opportunity or Civil Rights Office.

THANK YOU FOR YOUR TIME AND ASSISTANCE

Dear Petty Officer Avans:

You have been selected to participate in the *Status of the Armed Forces Surveys: Workplace and Gender Relations (Form 2002GB)* and should receive a survey in the mail in the next few weeks. This survey will ask for your attitudes and opinions on a variety of topics related to your workplace and gender relations in the Services. The information obtained from this survey will assist senior policy makers in responding to Congress and in improving the workplace for all Service members.

I urge you to complete your survey when it arrives. This is your opportunity to provide input into the formulation of policies that directly affect you and other Service members. I assure you that your responses will be kept confidential. Only group statistics will be compiled and reported. No information about you as an individual will be released.

If the address on this mailing is incorrect or your address will soon change, please take a moment to inform the Survey Processing Center of the correct address. You may register your new address by calling the Survey Processing Center toll-free at 1-800-881-5307. This toll-free line is provided for recording address changes only. If you prefer, you may also mark the address changes on this letter and mail it to DMDC Survey Processing Center, Data Recognition Corporation, 8900 Wyoming Avenue North, Brooklyn Park, MN 55445. You can also send your changes via electronic mail to 2002GB@datarecognitioncorp.com or facsimile at 1-763-493-4956, or you can register address changes online at <http://www.drc-instantaccess.com/DMDC-2002GB> with the **Ticket Number** from the bottom right of this letter.

In all communications with the Survey Processing Center, please include your Ticket Number shown at the bottom right of this letter.

Thank you for your time and assistance in this important effort.

Sincerely,

W. R. Somerville

January 23, 2002

Dear Senior Master Sergeant Bolding:

Several weeks ago, you were asked to participate in the *Status of the Armed Forces Surveys: Workplace and Gender Relations (Form 2002GB)*. Your participation is very important. The survey results will help the Department of Defense and the Armed Services to assess progress in promoting equality and fairness in the military and to identify areas where improvements are needed. This is your opportunity to provide input in the formulation of policies that directly affect you and other Service members.

A duplicate survey is enclosed in case you misplaced your original questionnaire. If you have already completed and returned your questionnaire, please discard this duplicate survey and accept my thanks. If you have not yet responded, please fill out the questionnaire and return it in the provided postage-paid envelope or complete the survey on the Web at:

<http://www.drc-instantaccess.com/DMDC-2002GB>

To take this survey online you will need to enter this **Ticket Number: 3EANNF7J**. It is not necessary for you to complete the online survey in one sitting.

Your time and cooperation are appreciated.

Sincerely,

Enclosure:

December 26, 2001

Dear Petty Officer Schaefer:

The Department of Defense is seeking your help in gathering important information about workplace and gender-relations issues in the Armed Forces. You were selected in a scientific sample of Service members to participate in this study. The information you and other Service members provide will be used both to evaluate policies and programs and to identify areas where improvements are needed.

Completing this survey should take about 30 to 45 minutes of your time. Please provide frank responses to the survey questions. I assure you your responses will be kept confidential. Only group statistics will be compiled and reported. Obviously, while the survey process is underway, survey administrators must know your identity to provide you with the survey materials. This information will be used only in administering the survey. No information about an individual will be released.

Should you prefer, you may use the Internet to complete this survey. To take this survey online you will need to enter this **Ticket Number: 7F93FJU9**. Simply go to the Web address below and input your **Ticket Number**. You will not need to take the survey in one sitting. The website has been set up to allow you to start and stop, as necessary.

<http://www.drc-instantaccess.com/DMDC-2002GB>

If you choose to complete the paper survey, please return it at your earliest convenience in the enclosed pre-addressed, postage-paid envelope. If you have any questions, you may send electronic mail to 2002GB@datarecognitioncorp.com or leave a message any time, toll-free, at 1-800-881-5307. Except on the website, in all communication with the Survey Processing Center please include the mailing number from the lower right corner of this letter.

Thank you in advance for your time and cooperation in completing this survey.

Sincerely,

Sincerely,
David V. C. Chan

Dear Petty Officer Earles:

We recently mailed you a letter asking you to participate (either via paper survey or the Internet), in the *Status of the Armed Forces Surveys: Workplace and Gender Relations (Form 2002GB)*. If you have already completed the survey, thank you. If you haven't had a chance to complete the survey or were thinking about not participating, I would like to ask you to reconsider. Your participation is crucial. You were scientifically selected, as part of a small group of people, to participate in this survey. Therefore, your answers will represent the views of many others like yourself.

The Web version of the survey can be accessed at:

<http://www.drc-instantaccess.com/DMDC-2002GB>

It is not necessary for you to complete the survey in one sitting. To take this survey online you will need to enter this **Ticket Number: FTYPMTKT**

If you prefer to respond via the paper survey but have not received a copy, please take a moment to inform the Survey Processing Center of your correct address. You may register your new address by calling the Survey Processing Center any time, toll-free, at 1-800-881-5307. You may also e-mail your address changes to 2002GB@datarecognitioncorp.com or via the Survey Processing Center's Web page at <http://www.drc-instantaccess.com/DMDC-2002GB> (enter Ticket Number listed above) or via facsimile at 1-763-493-4956. You may also mark the address changes on this letter and mail it to DMDC Survey Processing Center, Data Recognition Corporation, 8900 Wyoming Avenue North, Brooklyn Park, MN 55445. Except on the website, in all communication with the Survey Processing Center please include the mailing number from the lower right corner of this letter.

Your time and cooperation in this very important effort are greatly appreciated.

Sincerely,

Dear Chief Petty Officer Sirois:

Several weeks ago, you were asked to participate in the *Status of the Armed Forces Surveys: Workplace and Gender Relations (Form 2002GB)*. Your participation is very important. The survey results will help the Department of Defense and the Armed Services to assess progress in promoting equality and fairness in the military and to identify areas where improvements are needed. This is your opportunity to provide input in the formulation of policies that directly affect you and other Service members.

A duplicate survey is enclosed in case you misplaced your original questionnaire. If you have already completed and returned your questionnaire, please discard this duplicate survey and accept my thanks. If you have not yet responded, please fill out the questionnaire and return it in the provided postage-paid envelope or complete the survey on the Web at:

<http://www.drc-instantaccess.com/DMDC-2002GB>

To take this survey online you will need to enter this **Ticket Number: F9AH3K4X**. It is not necessary for you to complete the online survey in one sitting.

Your time and cooperation are appreciated.

Sincerely,

A handwritten signature in cursive script that reads "W. R. Somerville".

Dear Sergeant Thomas:

Recently, you were asked to participate in the *Status of the Armed Forces Surveys: Workplace and Gender Relations (Form 2002GB)*. Your completed questionnaire had not been received by the Survey Processing Center at the time this letter was prepared. Because your views and opinions are important, I urge you to take this final opportunity to complete the survey.

The survey findings will be reviewed by senior Defense officials and used in the formulation of military personnel policies. We have sent the survey to a scientifically selected sample of people so that the survey findings can accurately represent the opinions and attitudes of all personnel. However, the success of this method is dependent on you, and others like you, who are willing to complete and return the questionnaire.

If you have already completed the survey, we thank you for your time and cooperation. If you have not already done so, please take time to complete the questionnaire and return it in the postage-paid envelope or complete the survey via the Internet. To access the Web version of the survey, go to the following web address:

<http://www.drc-instantaccess.com/DMDC-2002GB>

To take this survey online you will need to enter this **Ticket Number: 3337XHUK**. For your views to be included in the survey results, your survey must be received within three weeks of receiving this letter. The results of the survey will also be on the Web after a summary is prepared.

Thank you for your participation in this important effort.

Sincerely,

David S. C. Chu
Under Secretary of Defense
(Personnel and Readiness)

Dear Seaman Sliman:

The Department of Defense is seeking your help in gathering important information about workplace and gender-relations issues in the Armed Forces. You were selected in a scientific sample of Service members to participate in this study. The information you and other Service members provide will be used both to evaluate policies and programs and to identify areas where improvements are needed.

Completing this survey should take about 30 to 45 minutes of your time. Please provide frank responses to the survey questions. I assure you your responses will be kept confidential. Only group statistics will be compiled and reported. Obviously, while the survey process is underway, survey administrators must know your identity to provide you with the survey materials. This information will be used only in administering the survey. No information about an individual will be released.

Should you prefer, you may use the Internet to complete this survey. To take this survey online you will need to enter this **Ticket Number: FEAMW3FX**. Simply go to the Web address below and input your **Ticket Number**. You will not need to take the survey in one sitting. The website has been set up to allow you to start and stop, as necessary.

<http://www.drc-instantaccess.com/DMDC-2002GB>

If you choose to complete the paper survey, please return it at your earliest convenience in the enclosed pre-addressed, postage-paid envelope. If you have any questions, you may send electronic mail to 2002GB@datarecognitioncorp.com or leave a message any time, toll-free, at 1-800-881-5307. Except on the website, in all communication with the Survey Processing Center please include the mailing number from the lower right corner of this letter.

Thank you in advance for your time and cooperation in completing this survey.

Sincerely,

ANNOTATED QUESTIONNAIRE

STATUS OF THE ARMED FORCES SURVEYS

Workplace and Gender Relations (Form 2002GB)

ANNOTATED QUESTIONNAIRE

COMPLETION INSTRUCTIONS

- This is not a test, so take your time.
- Select answers you believe are most appropriate.
- Use a blue or black pen.
- Please PRINT where applicable.
- Place an "X" in the appropriate box or boxes.

Right	Wrong
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> <input type="checkbox"/>
- To change an answer, completely black out the wrong answer and put an "X" in the correct box as shown below.

Correct answer	Incorrect answer
<input checked="" type="checkbox"/>	<input type="checkbox"/>
- Do not make any marks outside of the response and write-in boxes.

MAILING INSTRUCTIONS

- PLEASE RETURN YOUR COMPLETED SURVEY IN THE BUSINESS REPLY ENVELOPE. (If you misplaced the envelope, mail the survey to DMDC, c/o Data Recognition Corp., 5900 Baker Rd., Minnetonka, MN 55345-5967).
- IF YOU ARE RETURNING THE SURVEY FROM ANOTHER COUNTRY, BE SURE TO RETURN THE BUSINESS REPLY ENVELOPE ONLY THROUGH A U.S. GOVERNMENT MAIL ROOM OR POST OFFICE.
- FOREIGN POSTAL SYSTEMS WILL NOT DELIVER BUSINESS REPLY MAIL.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this statement informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 USC Sections 136 and 2358.

PRINCIPAL PURPOSE(S): Information collected in this survey will be used to report attitudes and perceptions of members of the Armed Forces about programs and policies. Information provided will assist in the formulation of policies to improve the working environment.

ROUTINE USE(S): None.

DISCLOSURE: Voluntary. However, maximum participation is encouraged so that data will be complete and representative. Ticket numbers and serial numbers on your survey are used to determine you have responded and to use record data to properly analyze the survey data. Personal identifying information is not used in any reports. Only group statistics will be reported.

The remaining questions in this section refer to the one situation that had the greatest effect on you – Question 57.

GB0258A-F

58. To what degree was this situation . . .

4 Extremely
3 Very
2 Moderately
1 Slightly
0 Not at all

- a. Annoying?
- b. Offensive?
- c. Disturbing?
- d. Threatening?
- e. Embarrassing?
- f. Frightening?

GB0259A-D

59. Where and when did this situation occur?

3 All of it
2 Most of it
1 Some of it
0 None of it

- a. At a military installation
- b. At work (the place where you perform your military duties)
- c. During duty hours
- d. In the local community around an installation

GB0260

60. What was the gender of the person(s) involved?

- 1. ☐ Male
- 2. ☐ Female
- 3. ☐ Both males and females were involved
- 4. ☐ Gender unknown

GB0261A-N

61. Was the person(s) involved... Mark "Yes" or "No" for each.

1 Yes 0 No

- a. Your immediate military supervisor?
- b. Your immediate civilian supervisor?
- c. Your unit commander?
- d. Other military person(s) of higher rank/grade than you?
- e. Other civilian employee(s) of higher rank/grade than you?
- f. Your military coworker(s)?
- g. Your civilian coworker(s)?
- h. Your military subordinate(s)?
- i. Your civilian subordinate(s)?
- j. Your military training instructor?
- k. Your civilian training instructor?
- l. Other military person(s)?
- m. Other civilian person(s)?
- n. Other or unknown person(s)

GB0262

62. During the course of the situation you have in mind, how often did the event(s) occur?

- 1 ☐ Once
- 2 ☐ Occasionally
- 3 ☐ Frequently
- 4 ☐ Almost every day
- 5 ☐ More than once a day

GB0263

63. How long did this situation last, or if continuing, how long has it been going on?

- 1 ☐ Less than 1 week
- 2 ☐ 1 week to less than 1 month
- 3 ☐ 1 month to less than 3 months
- 4 ☐ 3 months to less than 6 months
- 5 ☐ 6 months to less than 9 months
- 6 ☐ 9 months to less than 12 months
- 7 ☐ 12 months or more

GB0264

64. Is the situation still going on?

- 1 ☐ Yes
- 0 ☐ No

GB0265A-R

65. To what extent did you ...

4 Very large extent
3 Large extent
2 Moderate extent
1 Small extent
0 Not at all

- a. Try to avoid the person(s) who bothered you?
- b. Try to forget it?
- c. Tell the person(s) you didn't like what he or she was doing?
- d. Stay out of the person's or persons' way?
- e. Tell yourself it was not really important?
- f. Talk to some of your family about the situation?
- g. Talk to some of your coworkers about the situation?
- h. Talk to some of your friends about the situation?
- i. Talk to a chaplain or counselor about the situation?
- j. Try to avoid being alone with the person(s)?
- k. Tell the person(s) to stop?
- l. Just put up with it?
- m. Ask the person(s) to leave you alone?
- n. Blame yourself for what happened?
- o. Assume the person(s) meant well?
- p. Pray about it?
- q. Pretend not to notice, hoping the person(s) would leave you alone?
- r. Do something else in response to the situation? (Please specify below.)

66. Did you report this situation to any of the following installation/Service/DoD individuals or organizations? Mark "Yes" or "No" for each.

- | | 1
Yes | 0
No |
|--|--------------------------|--------------------------|
| a. Your immediate supervisor | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Someone else in your chain-of-command (including your commanding officer) | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Supervisor(s) of the person(s) who did it | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Special military office responsible for handling these kinds of complaints (for example, Military Equal Opportunity or Civil Rights Office) | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Other installation/Service/DoD person or office with responsibility for follow-up | <input type="checkbox"/> | <input type="checkbox"/> |

GB0267, GB0267SK, Note 20

67. Did you answer "Yes" to at least one item in Question 66?

1. ☐ Yes⇒IF YES, CONTINUE WITH QUESTION 68
 0. ☐ No⇒IF NO, GO TO QUESTION 74

GB0268A-E

68. What actions were taken in response to your report? ? Mark "Yes," "No," or "Don't know" for each.

- | | 99
Don't know | 0
No | 1
Yes |
|---|--------------------------|--------------------------|--------------------------|
| a. Person(s) who bothered you was/were talked to about the behavior. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Your complaint was/is being investigated. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. You were encouraged to drop the complaint. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. Your complaint was discounted or not taken seriously (for example, you were told that's just the way it is, not to overreact, etc.). | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. No action was taken. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

GB0269A-E

69. How satisfied are you with the following aspects of the reporting process?

- | | 5
Very satisfied | 4
Satisfied | 3
Neither satisfied nor dissatisfied | 2
Dissatisfied | 1
Very dissatisfied |
|---|--------------------------|--------------------------|---|--------------------------|--------------------------|
| a. Availability of information about how to file a complaint | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b. Treatment by personnel handling your complaint | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| c. Amount of time it took/is taking to resolve your complaint | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| d. How well you are/were kept informed about the progress of your complaint | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| e. Degree to which your privacy is/was being protected | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

OTHER WORKPLACE EXPERIENCES

The following items describe situations that sometimes happen in the workplace. What do you think would happen at your duty station in situations like these?

GB0276A-I

76. Suppose that a coworker at your duty station were to talk a lot at work about sex, trying to get others to talk about it, too. Mark if you "agree" or "disagree" with each of the following statements.

5.....Strongly agree
 4.....Agree |
 3.....Neither agree nor disagree | |
 2.....Disagree | | |
 1.....Strongly disagree | | | |

If a coworker at your duty station were to do this . . .

a. Others in the unit would not care.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. The coworker would get in trouble with his or her supervisor.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Others in the unit would tell the coworker to stop.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Leadership would ignore it.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If another coworker were to complain about this . . .

e. The complaint would be taken seriously.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. It would be risky for the person making the complaint.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Some corrective action would be taken.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Other coworkers would treat the person who made the complaint badly.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. The complaint would be ignored.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

GB0277A-I

77. Suppose a coworker at your duty station were to keep asking others for dates even after they have made it clear that they are not interested. Mark if you "agree" or "disagree" with each of the following statements.

5.....Strongly agree
 4.....Agree |
 3.....Neither agree nor disagree | |
 2.....Disagree | | |
 1.....Strongly disagree | | | |

If a coworker at your duty station were to do this . . .

a. Others in the unit would not care.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. The coworker would get in trouble with his or her supervisor.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Others in the unit would tell the coworker to stop.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Leadership would ignore it.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If another coworker were to complain about this . . .

e. The complaint would be taken seriously.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. It would be risky for the person making the complaint.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Some corrective action would be taken.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Other coworkers would treat the person who made the complaint badly.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. The complaint would be ignored.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

78. Suppose a supervisor at your duty station were to suggest that the way to get along and get good assignments is to be sexually cooperative to him/her. Mark if you "agree" or "disagree" with each of the following statements.

5.....Strongly agree
 4.....Agree |
 3.....Neither agree nor disagree | |
 2.....Disagree | | |
 1.....Strongly disagree | | | |

If a supervisor at your duty station were to do this . . .

- a. Others in the unit would not care. ☐☐☐☐☐
 b. The supervisor would get in trouble with his or her supervisor. ☐☐☐☐☐
 c. Others in the unit would tell the supervisor to stop. ☐☐☐☐☐
 d. Leadership would ignore it. ☐☐☐☐☐

If a coworker were to complain about this . . .

- e. The complaint would be taken seriously. ☐☐☐☐☐
 f. It would be risky for the person making the complaint. ☐☐☐☐☐
 g. Some corrective action would be taken. ☐☐☐☐☐
 h. Other coworkers would treat the person who made the complaint badly. ☐☐☐☐☐
 i. The complaint would be ignored. ☐☐☐☐☐

PERSONNEL POLICY AND PRACTICES

79. Please give your opinion about whether the persons below make honest and reasonable efforts to stop sexual harassment, regardless of what is said officially. Mark "Yes," "No," or "Don't know" for each.

99.....Don't know
 0.....No |
 1.....Yes | |

- a. Senior leadership of my Service ☐☐☐☐☐
 b. Senior leadership of my installation/ship ☐☐☐☐☐
 c. My immediate supervisor ☐☐☐☐☐

80. Have you had any training during the past 12 months on topics related to sexual harassment?

1. ☐ Yes⇒IF YES, CONTINUE WITH QUESTION 81
 0. ☐ No⇒IF NO, GO TO QUESTION 83

81. In the past 12 months, how many times have you had training on topics related to sexual harassment? To indicate "9" or more, enter "9"

HOURS

82. My Service's training . . . Mark if you "agree" or "disagree" with each of the following statements.

5.....Strongly agree
 4.....Agree |
 3.....Neither agree nor disagree | |
 2.....Disagree | | |
 1.....Strongly disagree | | | |

- a. Provides a good understanding of what words and actions are considered sexual harassment. ☐☐☐☐☐
 b. Teaches that sexual harassment reduces the cohesion and effectiveness of your Service as a whole. ☐☐☐☐☐
 c. Teaches that sexual harassment makes it difficult for individual Service members to perform their duties. ☐☐☐☐☐
 d. Identifies behaviors that are offensive to others and should not be tolerated. ☐☐☐☐☐
 e. Gives useful tools for dealing with sexual harassment. ☐☐☐☐☐
 f. Makes you feel it is safe to complain about unwanted, sex-related attention. ☐☐☐☐☐
 g. Provides information about policies, procedures, and consequences of sexual harassment. ☐☐☐☐☐

83. To what extent is/are...

IN YOUR UNIT/WORKGROUP

- a.. Policies forbidding sexual harassment publicized? ☐☐☐☐☐
 b. Complaint procedures related to sexual harassment publicized? ☐☐☐☐☐
 c. Complaints about sexual harassment taken seriously no matter who files them? ☐☐☐☐☐
 d. Enlisted members required to attend formal sexual harassment training? ☐☐☐☐☐
 e. Officers required to attend formal sexual harassment training? ☐☐☐☐☐
 f. Leaders consistently model respectful behavior to both male and female personnel? ☐☐☐☐☐
 g. Male supervisors asking female officers or NCOs/petty officers from other workgroups to "deal with" problems involving female subordinates? ☐☐☐☐☐

- h. Policies forbidding sexual harassment publicized? ☐ ☐ ☐ ☐ ☐
- i. Complaint procedures related to sexual harassment publicized? ☐ ☐ ☐ ☐ ☐
- j. Complaints about sexual harassment taken seriously no matter who files them? ☐ ☐ ☐ ☐ ☐
- k. There a specific office with the authority to investigate sexual harassment complaints? ☐ ☐ ☐ ☐ ☐
- l. Enlisted members required to attend formal sexual harassment training? ☐ ☐ ☐ ☐ ☐
- m. Officers required to attend formal sexual harassment training? ☐ ☐ ☐ ☐ ☐
- n. Leaders consistently model respectful behavior to both male and female personnel? ☐ ☐ ☐ ☐ ☐

o. An advice/hotline available for reporting sexual harassment complaints? ☐ ☐ ☐ ☐ ☐

88. Would you like to know the results of this survey? *If you are interested in being notified when a brief summary of the results is available on the Web, please print your e-mail address below. This e-mail address will be used for no other purpose than this notification.*

[illegible]

89. On what date did you complete this survey?

Y	Y	Y	Y	M	M	D	D
---	---	---	---	---	---	---	---

90. If you have comments or concerns that you were not able to express in answering this survey, please print them in the space provided. Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. If you want to report a harassment problem, information about how do to so is available through your command Equal Opportunity or Civil Rights Office.

[illegible]

84. Do you think sexual harassment is more of a problem inside the military or more of a problem outside the military?

- 3 ☒ More of a problem inside the military
1 ☒ More of a problem outside the military
2 ☒ Same/no difference

85. In your opinion, has sexual harassment in our nation become more or less of a problem over the last 4 years?

- 1 ☐ Less of a problem today
2 ☐ About the same as 4 years ago
3 ☐ More of a problem today

86. In your opinion, has sexual harassment in the military become more or less of a problem over the last 4 years?

- 71 ☐ Don't know, you have been in the military less than 4 years
- 1 ☐ Less of a problem today
- 2 ☐ About the same as 4 years ago
- 3 ☐ More of a problem today

87. In your opinion, how often does sexual harassment occur in the military now, as compared with a few years ago?

71. ☒ Don't know, you have 2 ☒ Less often
been in the military less 3 ☒ About the same
than 4 years 4 ☒ More often
1 ☒ Much less often 5 ☒ Much more often

APPENDIX D

CODING SCHEME FOR THE STATUS OF THE ARMED FORCES SURVEYS FORM 2002GB – WORKPLACE AND GENDER RELATIONS

APPENDIX D: Coding Scheme for the STATUS OF THE ARMED FORCES SURVEYS FORM 2002GB – Workplace and Gender Relations

The guiding premise of coding this and other DMDC surveys is that the analysts creating the dataset will not be the only ones analyzing the data. DMDC rarely collects data only for immediate use or to answer one question. Different people, both at DMDC and other organizations (government, academic, and private-sector), analyze DMDC datasets repeatedly over time. Every care is taken in organizing and documenting DMDC surveys so secondary analysts can be reasonably certain they understand both how the data are coded and the limitations of the data. This appendix describes (a) variable naming conventions, (b) how data are captured from the survey instrument, and (c) the edit process to create survey response variables for the analysis file.

Variable Naming

In responding to a customer's request for information, DMDC often uses multiple data sources. Information on a particular topic could be obtained from different surveys or from a survey that has been repeated over a number of years. For example, a customer might be interested in organizational commitment items included in a survey of active duty members members in 1999 and in an exit survey in 2000. Conventions discussed below are being used as a means for facilitating such analyses.

Non-survey-derived Variables

Variable names for non-survey-derived variables tend to be character strings that aid in remembering the meanings of the variables. Two important conventions were used in naming variables.

A variable name from DMDC record files was used only if the data, values, and value labels were identical to those from an official DMDC data file. When data were added to an analysis file unchanged from record data, the same variable name, values, and value labels were used. For example, SERVICE is a field in the ADMF and RCCPDS that indicates the member's service; since the variable in the survey data file is identical to that in the record data from the month that the sample was drawn, the same variable name and labels were used. In contrast, the variable CSERVICE has slightly different values and value labels, and consequently was given a variable name that is not used in the official records so as not to confuse analysts who work routinely with record data.

Beginning a variable name with "X" indicates it is a special crossing (marginal) variable for key analyses. "X variables" typically involve using record data to impute values for missing data in survey items. X variables may also require collapsing or recoding to missing is performed to preserve confidentiality of respondents. (See Appendix I for the programming that was used to compute X variables.)

Survey-derived Variables

Identical demographic items are used across many DMDC surveys. Each time these items are used, identical variable names and values are used. The variable names for this group of demographic items start with “SR” (mnemonic for self reported). The following items in this survey fall into this category: SRSEX (for gender), SRED (for education), SRRACEA-F (for race) and SRHISP (for Hispanic ethnicity). COMMENT (for a flag indicating if a comment has been entered) and SRDATE (for the date the survey was completed) are other standard variables across DMDC surveys.

Variable names for items that are not standardized across DMDC surveys start with 1 or 2 letters to represent the survey, followed by 2 digits to represent the year the data are gathered, and end with 4 or 5 numbers/letters corresponding to the survey questionnaire item. Because of how sorting is done, leading zeros are used so items are ordered from 01 through 99. Typically, the last one or two of the 4 or 5 item-number digits are either not used or contain letter(s) representing one of the sub-items within the question. The basic naming conventions are implemented as follows for Form 2002GB:

- The first and second positions are “GB” for the basic variables¹ for items appearing in Form GB.
- The third and fourth characters after the GB are “02” to indicate these data came from a survey in 2002.
- The fifth and sixth characters are item numbers in the survey from 02 through 90.
- Letters following the numbers for multi-part items usually represent the sub-item. The exceptions, summarized here, are further explained in Table D-3:
 - Specify flags (ending in a “SP”) represent whether information has been written in a specify box. For example, when respondents to this survey indicate on Question 42 that they had some other type of mentor, they are directed to specify the other type in the write-in area. GB0242SP is a flag variable indicating whether text was entered in the write-in area, and whether the presence of text in this area is consistent with how the basic question was answered. The specify flags for short write-ins are verified by visual inspection whenever the scan-editing program detects something in the specify boxes. Certain types of entries are ignored: (1) unintelligible entries like lines, squiggles, or multiple XXXs; and (2) negative replies like, *nothing*, *none*, *no*, *NA*, and *not applicable*.
 - Skip pattern flags (ending in “SK”) represent data quality for questions directing respondents to skip later questions if they respond to a question in a certain way. For example, if respondents to this survey indicate on Question 20 that they do not have children aged 10 or older with whom they talk about careers, jobs, and education, then

¹ While most final edited variables start with G, variables may also start with a “U” to indicate that they are not edited for skip pattern consistency or an “R” to indicate that they have been recoded from the basic variable.

respondents are directed to skip Questions 21 and 22. GB0220SK is a flag variable indicating if Questions 21 and 22 are answered consistently with the skip directions.

- Consistency flags (ending in “CN”) represent data quality for certain questions for which consistency can be unambiguously compared. For example, if respondents to this survey indicate on Question 8 that they have 10 years of service, it would be inconsistent to say in Question 13 that they will complete anything less than 10 years of service. GB0213CN is a flag variable indicating if Questions 8 and 13 are answered consistently.

Value Coding and Formats

Datasets were prepared as SAS² system files. An OS or flat file version of the public release file was then prepared from the SAS system file. This section describes how values were treated in creating the SAS system files and notes any differences in the flat file.

In the SAS system files, variables were declared as numeric unless they contained true alphabetic characters. Although numeric variables can take more storage space, many statistical and logical operations can be done only with variables that are declared as numeric. Values for alphabetic variables were input with \$CHARww. formats to preserve leading, embedded, and trailing blanks.

Raw-Data Encoding Process

The survey forms were processed with image scanning and intelligent character recognition (ICR) technology. After an optical image was made of each page of the survey, a computer program compared each optical image to a template.

- The software assigned codes to fields created for the survey items.
- The software flagged any item that would result in an error code (for missing or multiple response) rather than a valid response code.
- Intelligent character recognition software was used with the template to resolve entries in boxes such as those provided for Question 8. The software flagged for onscreen determination any entries in boxes that could not be resolved with a high degree of certainty.

The surveys were then edited by a person who would see an image of the survey pages on a computer monitor. Each problem item flagged by the computer was highlighted on the screen. If the editor could not determine the correct response to problem-flagged items, then the paper form was pulled and the editor checked it. The editor also typed the text of all the short specify items during this pass.³ Through this stage, each item was evaluated individually and codes were assigned according to only what was marked in a single item. These codes are based on the

² SAS is a trademark of the SAS Institute, Inc.

³ The long comment item at the end of the questionnaire was keyed in a separate process. The comments data are confidential to preserve privacy and are not merged into the returns dataset.

position of mark(s) in only one item and are found on the annotated form in Appendix C. The resulting file was then transferred to DRC programmer/analysts for validation and creation of the returns datasets.

Data cleaning and editing can be thought of as occurring in five coding steps. In practice, these steps may not be strictly linear, nor neatly match the processing steps discussed above. However, they are a convenient framework to understand the meaning of the codes.

1. Each response is coded with one of three types of standard codes: valid response option value (see Coding Annotation of the survey form in Appendix C), no response (-9), or multiple-response error (-8).
2. Specify flag variables are created, and codes are assigned to indicate if respondents wrote in responses correctly where fill-in boxes were used.
3. Skip flag variables are created, and codes are assigned to indicate if respondents completed the skip pattern correctly.
4. Special codes for valid skips are assigned to variables within skip patterns using a “forward coding” process.
5. Text code variables are created, and codes are assigned based on the content coding of the text entries.

In the coding sequence, coding in the third and later steps builds on prior steps and usually involves values in multiple items to resolve edits.

The next sections discuss the assignment of missing value codes, the special treatment of data variables, and the editing of skip patterns during steps 3 and 4.

Missing Data Codes

The instructions used to assign missing data codes and other special codes are shown in five tables. In these tables, the value labels associated with each assigned code are shown in italicized text. These are the SAS format labels used in the SAS dataset.

- Table D-1 contains basic SAS and flat file missing data codes.
- Table D-2 contains SAS and flat file missing data codes for dates.
- Table D-3 contains standard coding notes for flag variables.
- Table D-4 contains SAS and flat file special not-applicable codes.
- Table D-5 provides special coding notes for items involving skip patterns or other non-obvious coding.

The codes presented in Table D-1 are general missing data codes that have been adopted in recent years for use on DMDC surveys. (Standards for date variables are in Table D-2.) Both tables have separate columns for values used for SAS system files and flat files. The biggest difference between the flat files and SAS system files is in the treatment of missing values. The flat file codes differ from the SAS codes because SAS implements special missing codes and formats that may not be compatible with other statistical analysis software such as SPSS⁴.

⁴ SPSS is a trademark of SPSS Inc.

Table D-1
Basic SAS and Flat File Missing Data Codes

SAS File		Flat File		Description
Numeric	Alpha	Numeric	Alpha	
.	.	-9	.	<i>No response (Missing)</i>
.A	.A	-8	.A	<i>Multiple response error</i>
.O	.O	-7	.O	<i>Out-of-range error</i>
.N	.N	-6	.N	<i>Not applicable (valid skip)</i>
.F	.F	-5	.F	<i>Variable not on survey form.</i> This value is reserved for multiple form surveys. (Not used for this survey.)
.I	.I	-4	.I	<i>Incomplete grid error or illegible.</i> Used when the meaning or content of the respondent's answer could not be determined.
.G	.G	-3	.G	<i>No match on official records.</i> Reserved for use on surveys that cannot be matched back to original records. (Not used for this survey.)
.M	.M	-2	.M	<i>Missing continuation.</i> Respondent's answer to this item is inconsistent with his/her answering items in a skip pattern started with this item.
.B	.B	-1	.B	<i>Blank/no survey.</i> Filler values for survey variables when either a blank survey is returned or no survey is returned. Survey control system variables retain their assigned values.
99	DK	99	DK	<i>Don't know*</i>

Notes. *Use of 'Don't know' as a response is not exactly missing data. It is, however, given special treatment because it lacks precision and is *sometimes* excluded when calculating percentages. If an analyst decides to exclude this response when calculating percentages, it should be re-coded as missing. Also, it is often useful to sum (across items) the number of times 'Don't know' is used as a response.

Table D- 2
SAS and Flat File Missing Data Codes for Dates

SAS File		Flat File		Description
Recoded value	Value read from input	YYYYMMDD	MMYYYYYY	
.	-54908	18090902	SEP1809	<i>No response (invalid skip)</i>
.A	-55304	18080802	AUG1808	<i>Multiple response error</i>
.O	-55702	18070702	JUL1807	<i>Out-of-range error</i>
.N	-56096	18060602	JUN1806	<i>Not applicable (valid skip)</i>
.I	-56887	18040402	APR1804	<i>Incomplete grid error or illegible.</i> Used when the meaning or content of the respondent's answer could not be determined.
.B	-58073	18020202	JAN1802	<i>Blank/no survey.</i> Filler value for survey variables when either a blank survey is returned or no survey is returned. Survey control system variables retain their assigned values.

Note. Exact dates are formatted YYYYMMDD⁵ (SAS input format YYMMDD8.). Because SAS stores dates as the number of days from a standard date of 1 January 1960, special dates have to be used to indicate specific types of missing or error data (see Table D-2). The column headed YYYYMMDD shows how special missing data values for SRDATE are formatted in the flat file for this survey.⁶ When SAS reads a date value from a flat file, it stores that date as the value in the column headed “Value read from input.” SAS “if-then” statements are used to recode those values to the special missing value codes in the first column of Table D-2. This conversion has already been done in the DMDC SAS files for this survey and SRDATE1 has the values shown under the “Recoded value” column.

⁵ Similarly, dates given as months and years would be formatted as MONYYYYY (e.g., AUG1993). When input by SAS format MONYY7., month/year/dates are stored as if they specified the first day of the month.

⁶ While there are no variables in this survey where only a month and year are entered, the column MMYYYYYY is included in this table to illustrate how the coding works for this type of variable in other surveys.

SAS can represent up to 27 missing data values for numeric variables as either a period or a period-letter combination. While SAS can read alphas representing missing data in a raw data field declared to be numeric, other programs such as SPSS do not accept alpha characters in numeric fields. Missing numeric data are represented in the flat files by negative numbers that can be declared as missing values. For example, a multiple response error in flat files is coded as a “-8”, which can be declared as a missing value when the data are input in SPSS—in the SAS file, the value “.A” is used to represent a multiple response error.

Data requirements of SUDAAN⁷ were also considered in coding. Primarily this means avoiding in coding the use of a zero, which has a special use for certain procedures in SUDAAN, for a variable that will be used as an independent variable.

Many types of missing data are common to scannable surveys and are self-explanatory. In general, missing data are coded as “-9” (SAS: .) when respondents skip the item invalidly; and multiple response errors are coded as “-8” (SAS: .A). Incomplete responses in grids that could not be resolved by visual inspection are coded as “-4” (SAS: .I). Out-of-range responses in grids (e.g., number of days or weeks in a year larger than 365 or 52, respectively) are coded as “-7” (SAS: .O).

For a single item that contains a response alternative of “Not applicable”, a missing data code of “-6” (SAS: .N) is typically used. When multiple items can be affected by a skip pattern or when item(s) have multiple ways to be not applicable, other specific codes are used. This type of coding is discussed later in the section entitled “Skip Pattern Coding.” That later section also explains using the code “-2” (SAS: .M) to denote missing continuations.

Multiple survey forms or modes (e.g., paper and web) are sometimes used in a single effort, and the data from all the related forms may be combined into a single dataset for analysis. Questions may appear in one form or mode but not in another. In a combined dataset, a code of “-5” (SAS: .F) indicates missing data for variables not on the form completed by a respondent.

Records are included in the files for sampled members regardless of whether or not they returned a survey. If a member did not return a survey or returned a blank survey, every survey variable is assigned a value of “-1” (SAS: .B).

Standard Flag Variables

This survey employs three standard flag variables: specify flags, skip pattern flags and consistency flags. In the second edit step, specify flags are set in accordance with Table D-3. In the third edit step, skip flags are set in the manner discussed in Table D-3; however, the specifics for each skip flag are detailed in the next section. Note two values, -2 (SAS: .M) and -9 (SAS: .) are used to represent missing data in flag variables in a slightly different way than they are used for standard survey variables.

⁷ SUDAAN is a trademark of the Research Triangle Institute.

Table D-3
Standard Coding Notes for Flag Variables

1. **SPECIFY FLAGS.** A flag variable (with the variable name ending in ‘SP’) is generated for each specify box. For example, Question 42 includes the flag variable GB0242SP. All specify flags are shown in the annotated survey in Appendix C. Specify flags are also discussed in Table D-5 if there are multiple responses indicating the specify box should have text entered in it.

GB0242SP variables show the result of checking the specify box for marks and checking the parent variable to see if the specify-below response option was selected.

The specify flag variables are coded with one of six values.

- 1 *Valid skip*
Assigned to the flag variable (e.g., GB0242SP EQ 1) if the respondent selected the response option not requiring a write-in (e.g., GB1042 EQ 1-5) and no text is entered in the specify-below box.
- 2 *Valid continuation*
Assigned to the flag variable (e.g., GB0242SP EQ 2) if the respondent selected the specify-below response option (e.g., GB0242 EQ 6) and the specify-below box contains text.
- 3 *Invalid continuation*
Assigned to the flag variable (e.g., GB0242SP EQ 3) if the respondent selected one of the response options not requiring a write-in (e.g., GB0242 EQ 1-5) but the specify-below box contains text.
- 4 *Invalid skip*
Assigned to the flag variable (e.g., GB0242SP EQ 4) if the respondent selected the specify-below response option (e.g., GB0242 EQ 6) but no text is entered in the specify-below box.
- 2 *Missing continuation*
Assigned to the flag variable (e.g., GB0242SP EQ -2) if the parent variable is missing (e.g., GB0242 EQ -9) and the specify-below box contains text.
- 9 *Missing skip*
Assigned to the flag variable (e.g., GB0242SP EQ -9) if the parent variable is missing (e.g., GB0242 EQ -9) and no text is entered in the specify below box.

This can also be illustrated by a contingency table that shows the value of a specify variable (e.g., GB0242SP), based on examining the values of the parent variable (e.g., GB0242) and whether the respondent entered anything substantive in the specify box. Certain types of entries are ignored: (1) unintelligible entries like lines, squiggles, or multiple XXXs; and (2) negative replies like, *nothing*, *none*, *no*, *NA*, and *not applicable*.

GB0242 value after first edit step	text in box	
	yes	no
1,2,3,4,5 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
6 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

2. **SKIP FLAGS.** A flag variable (with the variable name ending in SK) is generated for each skip pattern. For example, Question 20 has the regular variable GB0220 and the flag variable GB0220SK. Skip variables are useful for evaluating the effectiveness of the skip pattern and as a flag for screening out ambiguous response patterns during analysis. Skip flags are shown in the annotated survey in Appendix C and are discussed below.

The skip flag variables are coded with one of six values.

- 1 *Valid skip*
Assigned to the flag variable (e.g., GB0220SK EQ 1) if the parent variable shows a skip (e.g., GB0220 EQ 0) and the responses are missing for all items in the skip pattern (e.g., all of GB0221-GB0222G= -9).
- 2 *Valid continuation*
Assigned to the flag variable (e.g., GB0220SK EQ 2) if the parent variable indicates a continuation (e.g., GB0220 EQ 1) and the respondent answered at least one of the items in the skip pattern (e.g., at least one of GB0221-GB0222G NE -9).
- 3 *Invalid continuation*
Assigned to the flag variable (e.g., GB0220SK EQ 3) if the parent variable indicates a skip (e.g., GB0220 EQ 0) but the respondent answered one or more items in the skip pattern (e.g., at least one of GB0221-GB0222G NE -9).
- 4 *Invalid skip*
Assigned to the flag variable (e.g., GB0220SK EQ 4) if the parent variable indicates a continuation (e.g., GB0220 EQ 1) but the responses are missing for all items in the skip pattern (e.g., all of GB0221-GB0222G= -9).
- 2 *Missing continuation*
Assigned to the flag variable (e.g., GB0220SK EQ -2) if the parent variable is missing (e.g., GB0220 EQ -9) and the respondent answered one or more items in the skip pattern (e.g., at least one of GB0221-GB0222G NE -9).
- 9 *Missing skip*
Assigned to the flag variable (e.g., GB0220SK EQ -9) if the parent variable is missing (e.g., GB0220 EQ -9) and the responses are missing for all items in the skip pattern (e.g., all of GB0221-GB0222G= -9).

This can also be shown by a contingency table showing the value of a skip variable (e.g., GB0220SK) based on examining the values of the parent variable (e.g., GB0220) and the variables in the skip pattern (e.g., GB0221-GB0222G) after the first edit step.

GB0220 value after first edit step	GB0221-GB0222G values after first edit step	
	At least one NE -9	All EQ -9
0 (No, direction to skip)	3 (Invalid continuation)	1 (Valid skip)
1 (Yes, direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

3. **CONSISTENCY FLAGS.** A flag variable (with the variable name ending in CN) is generated to check the logical consistency of responses between two or more related items. For example, Question 13 has the regular variable GB0213 and the flag variable GB0213CN. The flag is a consistency check for GB0213 with GB0208.

The consistency flag variables are coded with the following values.

- 1 Consistent
Assigned to the flag variable (e.g., GB0213CN EQ 1) if the value of GB0213 is greater than or equal to the value of GB0208.
 - 2 Inconsistent
Assigned to the flag variable (e.g., GB0213CN EQ 2) if the value of GB0213 is less than the value of GB0208.
 - 9 Missing
Assigned to the flag variable (e.g., GB0213CN EQ '.') if any of the related items (e.g., GB0213 and/or GB0208) are missing or invalid.
-

Special Codes for Skip Patterns

Coding steps 3 and 4 involve editing data to resolve discrepancies in skip patterns. Skip flags are created in step 3. Table D-3 introduced the general outline of the skip flags, but the specific flags for each skip pattern are specified in Table D-5.⁸ After the creation of all the skip flags in step 3, variables within the skip patterns are forward coded in step 4 to make them consistent with the variables that start the skip patterns. To preserve all data, the variables within skip patterns are first copied to a set of confidential variables. The naming convention for these variables is to start the name with “U” for Unedited. Table D-5 specifies how to assign the special values, listed in Table D-4, to variables within the skip patterns. While Table D-5 is organized to show all the edits for a skip pattern together, all step 3 edits are made prior to making any step 4 edits. The remainder of this section describes the logic behind coding of skip patterns.

While an analyst can ignore discrepancies between a respondent’s answer on an item containing a conditional direction to skip items and answers to those items, it is generally better to resolve the discrepancies. Two ways of resolving the discrepancies can be termed *backward* and *forward* coding. Backward coding involves correcting the discrepancy by editing back from the skip pattern items to make the initial question conform. Forward coding involves correcting the discrepancy by editing forward from the initial question to make the skip pattern items conform. Data for this survey are forward coded with data on the starting question accepted as marked and data for the items within the skip pattern edited to be consistent with the starting question.⁹

If a starting item is marked in such a way that the respondent should skip, items within the skip pattern have certain *not applicable* values assigned regardless of what the respondent marked on the items within the skip pattern. These values differentiate items with data missing because the item should have been skipped from items where data are missing because the respondent should have answered them but did not.

Table D-4 lists specific special values that are assigned when the reason for an item not being applicable can be defined and used across multiple items. A single item might have multiple codes for not applicable—each uniquely identified with a separate reason identified in nested skip patterns. These special codes require an analyst to produce frequencies and examine the not-applicable values to make situation-by-situation decisions on which not-applicable codes to use in the calculation of percentages.

⁸ Table D-5 also provides special coding notes for other non-obvious codings. The coding note numbers are keyed to the Notes annotated on the survey instrument contained in Appendix C.

⁹ Much of Form 2002GB is identical to the Department of Defense 1995 Sexual Harassment Survey. However, the 1995 dataset was created using backward, not forward, coding. Appendix I contains SAS code to convert 1995 Form B data to Form 2002GB specifications, including comparable incidents rates.

Table D-4
SAS and Flat File Not Applicable Codes

SAS File	Flat File	Description
.N	-6	<i>Not applicable</i> Used when NAs are typically <i>not</i> counted as valid responses.
.C	60	<i>Not applicable—although person marked they reported the behavior (GB0266A through GB0266E) they marked “No” in Question 67 (used for GB0267 - GB0273)</i>
.D	61	<i>Doesn't apply—I marked "Never" to every item in Question 55 (used for GB0257A through GB0275L)</i>
.H	63	<i>Not applicable—I DID NOT report the behavior to someone specified in Question 66 (used for GB0268A - GB0273)</i>
.J	64	<i>Not applicable—I DID report ALL the behavior to someone specified in Question 66 (used for GB0274A through GB0274S)</i>
.K	65	<i>Not applicable—The action is still being processed (used for GB0271A through GB0271H, GB0272)</i>
.L	66	<i>Not applicable—I haven't received any training (used for GB0281 through GB0282G)</i>
.P	67	<i>Not applicable—No children aged 10 or older with whom I talk about careers, jobs, education (GB0221 through GB0222G)</i>
.R	68	<i>Not applicable – Do not currently have a mentor but would have liked one. (GB0242, GB0243, GB0244A-GB0244P)</i>
.S	69	<i>Not applicable – Do not currently have a mentor and never wanted one. (GB0242, GB0243, GB0244A-GB0244P)</i>
.T	70	<i>Not applicable – Do not currently have a mentor and do not know what one is. (GB0242, GB0243, GB0244A-GB0244P)</i>
.U	71	<i>Don't know, have been in the military less than 4 years (GB0286 and GB0287)</i>

Table D-5
Special Coding Notes

Note	Coding instructions and codebook specifications
------	---

1. **SRHISPA1, SRHISPA2.** SRHISPA1 has been the standard DMDC variable for Hispanic descent, appearing in surveys such as the 1999 Active Duty Survey and 2000 Reserve Components Survey. Its values are: 1 (No, not Spanish/Hispanic/Latino), 2 (Yes, Mexican, Mexican American, Chicano), 3 (Yes, Puerto Rican), 4 (Yes, Cuban), 5 (Yes, other Spanish/Hispanic/Latino), and the standard codes for missing.

SRHISPA2 is a newly constructed variable, also appearing in the 2000 Reserve Components Survey and other DMDC surveys in 2000. It indicates simply whether a respondent did/did not indicate Hispanic descent, and is inclusive of cases where more than one Hispanic type may have been marked. The codebook page for SRHISPA2 should note: “This item differs from DMDC standard items SRHISP and SRHISPA1 in that it permits multiple responses when all the responses marked are for different Hispanic types.” SRHISPA2 is coded as follows:

1 = respondent marks “No, not Spanish/Hispanic/Latino”

2 = respondent marks one or more of the “Yes” responses, but not the “No” response

. = respondent does not mark any response

.A = respondent marks the “No” response, but also one or more of the “Yes” responses (unlike SRHISPA1 where .A is also assigned for multiple “Yes” responses even if “No” is not marked)

2. **SRRACEA-SRRACEF, SRRETH1.** The codebook pages for SRRACEA- SRRACEF should note: “These items are consistent with the ‘1997 Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity’ and the 2000 Decennial Census.” SRRACEA-SRRACEF are coded as “Mark all that apply” items, where 1=Not marked and 2=Marked. SRRACEA indicates whether the “White” response category was marked, SRRACEB indicates whether the “Black or African-American” response category was marked, SRRACEC indicates whether “American Indian or Alaska Native” was marked, SRRACED indicates whether “Asian” was marked, SRRACEE indicates whether “Native Hawaiian or other Pacific Islander” was marked, and SRRACEF indicates whether “Some other race” was marked. If none are marked, then all of SRRACEA-SRRACEF are assigned -9 (missing).

SRRETH1 implements the October 1997 standards for reporting Federal data on race and ethnicity. SRRETH1 groups the responses to SRRACEA-SRRACEF into racial/ethnic categories, which include multi-racial combinations. The categories are broken down by whether or not the respondent indicates Hispanic descent (from variable SRHISPA2, described above). Each verbal description in the “RACIAL CATEGORY” column of the chart below is preceded by an H for “Hispanic” if the respondent has a value of 2 for

SRHISPA2, and by a NH for “Non-Hispanic” if SRHISPA2 has the value of 1. The columns to the right of the descriptions show the Hispanic and race/ethnicity codes matching each description.

The coding for SRRETH1 follows the coding provided in the chart. For example, Hispanic single-race respondents who mark only one of SRRACEA-SRRACEF are assigned the corresponding code (1 to 6) from the racial/ethnic categories. Hispanics selecting more than one race are coded 7. The categories for Non-Hispanics are similar, except that some specific racial combinations form their own categories (codes 15-18). The remaining racial combinations reported by Non-Hispanics are coded 19. Non-Hispanics reporting no race are coded as missing (-9).

CODE	RACIAL CATEGORY (SRRETH1)	SR-HISPA2	SR-RACEA	SR-RACEB	SR-RACEC	SR-RACED	SR-RACEE	SR-RACEF
1	H American Indian or Alaska Native	2	1	1	2	1	1	1
2	H Asian	2	1	1	1	2	1	1
3	H Black or African American	2	1	2	1	1	1	1
4	H Native Hawaiian or Other Pacific Islander	2	1	1	1	1	2	1
5	H White	2	2	1	1	1	1	1
6	H Some other race	2	1	1	1	1	1	2
7	Hispanic/Latino reporting more than one race	2	(Any combination of more than one 2 in SRRACEA-F)					
8	H Unknown race	2	-9	-9	-9	-9	-9	-9
9	NH American Indian or Alaska Native	1	1	1	2	1	1	1
10	NH Asian	1	1	1	1	2	1	1
11	NH Black or African American	1	1	2	1	1	1	1
12	NH Native Hawaiian or Other Pacific Islander	1	1	1	1	1	2	1
13	NH White	1	2	1	1	1	1	1
14	NH Some other race	1	1	1	1	1	1	2
15	NH American Indian or Alaska Native & White	1	2	1	2	1	1	1
16	NH Asian & White	1	2	1	1	2	1	1
17	NH Black or African American & White	1	2	2	1	1	1	1
18	NH American Indian or Alaska Native & Black or African American	1	1	2	2	1	1	1
19	NH Balance of individuals reporting more than one race	1	(Any other combination of more than one 2 in SRRACEA-F)					

3. **SRRACESP**. SRRACESP is a specify flag.

SRRACEF value after first edit step	text in box	
	yes	No
1	3 (Invalid continuation)	1 (Valid skip)
2 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

4. **GB0208**. GB0208 is coded as the entry in the grid. GB0208 is not edited and the codebook page for GB0208 should note: “The field is neither checked for unlikely values nor checked against record data.”
5. **GB0209SK, UB0210, GB0210**. GB0209SK is a skip flag indicating whether GB0210 is answered consistently with Question 9.

GB0209 value after first edit step	GB0210 value after first edit step	
	NE -9	EQ -9
1 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
2-4 (continuation)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0210 is equal to GB0210, but is Unedited for forward coding of not applicable response values. After creating the unedited variables:

If GB0209 = 1 then GB0210 = -6 (Not applicable)

6. **GB0213, GB0213CN**. GB0213 is coded as the entry in the grid. GB0213 is not edited and the codebook page for GB0213 should note: “The field is not checked for unlikely values.” GB0213CN is a consistency check for GB0213 and GB0208, and is coded as follows:

Consistent	GB0213CN EQ 1 if the value of GB0213 is greater than or equal to the value of GB0208
Inconsistent	GB0213CN EQ 2 if the value of GB0213 is less than the value of GB0208
Missing	GB0213CN EQ -9 if any of the related items (i.e., GB0213 and/or GB0208) are missing or invalid

7. **GB0220SK, UB0221, UB0222A-UB0222G, GB0221, GB0222A-GB0222G.**
 GB0220SK is a skip flag indicating whether GB0220 is answered consistently with Questions 21 and 22

GB0220 value after first edit step	GB0221 to GB0222G values after first edit step	
	at least one NE -9	all EQ -9
0 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
1 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0221-UB0222G are equal to GB0221, GB0222A-GB0222G, but are Unedited for forward coding of not applicable response values. After creating the unedited variables:

If GB0220 = 0 then GB0221, GB0222A-GB0222G = 67 (Not applicable— No children aged 10 or older with whom I talk about careers, jobs, and education)

8. **GB0223SP, GB0223CD.** GB0223SP is a specify flag.

GB0223 value after first edit step	text in box	
	yes	no
2-7 (skip)	3 (Invalid continuation)	1 (Valid skip)
1 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for GB0223CD should note: “This field is not edited for impossible values.”

9. **GB0225SK, UB0226, UB0227A-UB0227K, UB0228, GB0226, GB0227A-GB0227K, GB0228.** GB0225SK is a skip flag indicating whether GB0225 is answered consistently with Questions 26-28.

GB0225 value after first edit step	GB0226-GB0228 values after first edit step	
	at least one NE -9	all EQ -9
0 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
1 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0226, UB0227A-UB0227K UB0228 are equal to GB0226, GB0227A-GB0227K, GB0228, but are Unedited for forward coding of not applicable response values. After creating the unedited variables:

If GB0225 = 0 then GB0226-GB0228 = 0 (None).

10. **GB0229.** GB0229 is coded as the entry in the grid. GB0229 is not edited and the codebook page for GB0229 should note: “The field is neither checked for unlikely values nor checked against record data.”

11. **GB0241SK, UB0242, UB0242SP, UB0243, UB0244A-UB0244P, GB0242, GB0242SP, GB0243, GB0244.** GB0241SK is a skip flag indicating whether GB0241 is answered consistently with Questions 42-44.

GB0241 value after first edit step	GB0242-GB0244 values after first edit step	
	at least one NE -9	all EQ -9
1,2 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
3,4, 5 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0242, UB0242SP, UB0243, UB0244A-UB0244P are equal to GB0242, GB0242SP, GB0243, GB0244A-GB0244P, but are Unedited for forward coding of not applicable response values.

If GB0241= 3 then GB0242, GB0242SP, GB0243, GB0244A-GB0244P = 68 (Not applicable - Do not currently have a mentor but would have liked to have one.)

If GB0241= 4 then GB0242, GB0242SP, GB0243, GB0244A-GB0244P = 69 (Not applicable - Do not currently have a mentor and never wanted one.)

If GB0241= 5 then GB0242, GB0242SP, GB0243, GB0244A-GB0244P = 70 (Not applicable - Do not currently have a mentor and do not know what a mentor is.)

12. **GB0242SP.** GB0242SP is a specify flag.

GB0242 value after first edit step	text in box	
	yes	No
1,2,3,4,5	3 (Invalid continuation)	1 (Valid skip)
6 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

13. **GB0254LS, UB0254M, GB0254M.**

GB0254LS is a skip flag indicating whether GB0254L is answered consistently with Question GB0254M.

GB0254L value after first edit step	GB0254M values after first edit step	
	NE -9	EQ -9
3	2 (Valid continuation)	4 (Invalid skip)
1,2	3 (Invalid continuation)	1 (Valid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0254M is equal to GB0254M but is Unedited for forward coding of not applicable response values. After creating the unedited variables:

If GB0254L is equal to 1 or 2 then GB0254M = -6 (Not Applicable)

14. **GB0254SP.** GB0254SP is a specify flag.

GB0254N value after first edit step	text in box	
	Yes	No
1	3 (Invalid continuation)	1 (Valid skip)
3,2 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

15. **GB0255CN, UB0256, UB0256SK, GB0256, GB0256SK,**

GB0255CN is a consistency flag indicating whether GB0255A-GB0255S are answered consistently with Questions 56.

GB0255A-GB0255S values after first edit step	GB0255CN values after first edit step		
	GB0256 EQ 61	GB0256 EQ 0,1,2	GB0256 EQ -8, -9
None > 0	1 (Consistent)	2 (Inconsistent)	-9 (Missing)
At least one in the range of 1-4 (direction to continue)	2 (Inconsistent)	1 (Consistent)	-9 (Missing)
All -8 or -9	-9 (Missing)	-9 (Missing)	-9 (Missing)

UB0256, and UB0256SK are equal to GB0256, GB0256SK, but are Unedited for forward coding of not applicable response values. After creating the unedited variables:

If none of GB0255A-GB0255S > 0 then GB0256 and GB0256SK= 61 (Doesn't apply – I marked “never” to every item in Question 55) [See Notes below on Question 56.]

16. **GB0255SP.** GB0255SP is a specify flag.

GB0255S value after first edit step	text in box	
	yes	no
0 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
1,2,3,4	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

17. **GB0256SK, UB0257A-UB0257S, UB0257SP, UB0258A-UB0258F, UB0259A-UB0259D, UB0260, UB0261A-UB0261N, UB0262, UB0263, UB0264, UB0265A-UB0265R, UB0265SP, UB0266A-UB0266CN, UB0267, UB0267SK, UB0268A-UB0268E, UB0269A-UB0269E, UB0270, UB0270SK, UB0271A-UB0271H, UB0272, UB0272SP, UB0273, UB0273SK, UB0274A-UB0274S, UB0275A-UB0275L, GB0257A-GB0257S, GB0257SP, GB0258A-GB0258F, GB0259A-GB0259D, GB0260, GB0261A-GB0261N, GB0262, GB0263, GB0264, GB0265A-GB0265R, GB0266A-GB0266CN, GB0267, GB0267SK, GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK, GB0274A-GB0274S, GB0275A-GB0275L**

GB0256SK is a skip flag indicating whether GB0256 is answered consistently with Questions 57-75.

GB0256 value after first edit step	GB0257A-GB0275L values after first edit step	
	at least one NE -9	all EQ -9
61 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
0,1,2 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0257A-UB0257S, UB0257SP, UB0258A-UB0258F, UB0259A-UB0259D, UB0260, UB0261A-UB0261N, UB0262, UB0263, UB0264, UB0265A-UB0265R, UB0265SP, UB0266A-UB0266CN, UB0267, UB0267SK, UB0268A-UB0268E, UB0269A-UB0269E, UB0270, UB0270SK, UB0271A-UB0271H, UB0272, UB0272SP, UB0273, UB0273SK, UB0274A-UB0274S, UB0275A-UB0275L, are equal to GB0257A-GB0257S, GB0257SP, GB0258A-GB0258F, GB0259A-GB0259D, GB0260, GB0261A-GB0261N, GB0262, GB0263, GB0264, GB0265A-GB0265R, GB0265SP, GB0266A-GB0266CN, GB0267, GB0267SK, GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK, GB0274A-GB0274S, GB0275A-GB0275L but are unedited for forward coding of not applicable response values. After creating the unedited variables:

If GB0256= 61 then GB0257A-GB0257S, GB0257SP, GB0258A-GB0258F, GB0259A-GB0259D, GB0260, GB0261A-GB0261N, GB0262, GB0263, GB0264, GB0265A-GB0265R, GB0265SP, GB0266A-GB0266CN, GB0267, GB0267SK, GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK, GB0274A-GB0274S, GB0275A-GB0275L= 61 (Doesn't apply – I marked “never” to every item in Question 55).

18. **GB0257SP** is a specify flag.

GB0257S value after first edit step	text in box	
	yes	no
1 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
0	3 (Invalid continuation)	1 (Valid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

19. **GB0266CN, GB0267, GB0267SK, GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK.**

GB0266CN is a consistency flag indicating whether GB0266A-GB0266E are answered consistently with Questions 67.

GB0266A-GB0266E values after first edit step	GB0266CN		
	GB0267 EQ 0	GB0267 EQ 1	GB0267 EQ -8, -9
None EQ 1	1 (Consistent)	2 (Inconsistent)	-9 (Missing)
At least one EQ 1	2 (Inconsistent)	1 (Consistent)	-9 (Missing)
All -8 or -9	-9 (Missing)	-9 (Missing)	-9 (Missing)

If (none of GB0266A-GB0266E EQ 1) and (GB0266CN EQ 1) then GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK = 63 (Not applicable – I DID NOT report the behavior to someone specified in Question 66.)

If (at least one of GB0266A-GB0266E EQ 1) and (GB0266CN EQ 2) then GB0267, GB0267SK, GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK = 60 (Not applicable—although person marked they reported the behavior (GB0266A through GB0266E) they marked “No” in Question 67.)

If (none of GB0266A-GB0266E EQ 1) and (GB0266CN EQ 2) then GB0267 = 0. [This coding is applied prior to implementing Note 21.]

20. **GB0267SK, UB0268A-UB0268E, UB0269A-UB0269E, UB0270, UB0270SK, UB0271A-UB0271H, UB0272, UB0272SP, UB0273, UB0273SK, GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK.**

GB0267SK is a skip flag indicating whether GB0267 is answered consistently with Questions 68-73.

GB0267 value after first edit step	GB0268A-GB0273 values after first edit step	
	At least one NE -9	all EQ -9
0 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
1 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

If GB0267= 0 then GB0268A-GB0268E, GB0269A-GB0269E, GB0270, GB0270SK, GB0271A-GB0271H, GB0272, GB0272SP, GB0273, GB0273SK= 63 (Not applicable – I DID NOT report the behavior to someone specified in Question 66.)

21. **GB0270SK, UB0271A-UB0271H, UB0272, UB0272SP, GB0271A-GB0271H, GB0272, GB0272SP.**

GB0270SK is a skip flag indicating whether GB0270 is answered consistently with Questions 71-72.

GB0270 value after first edit step	GB0271A-GB0272 values after first edit step	
	at least one NE -9	all EQ -9
0 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
1 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

If GB0270 = 1 then GB0271A-GB0271H, GB0272, GB0272SP= 65 (Not Applicable – The action is still being processed.)

22. **GB0272SP.** GB0272SP is a specify flag.

GB0272 value after first edit step	text in box	
	yes	no
3,4,5	3 (Invalid continuation)	1 (Valid skip)
1,2 (direction to specify)	2 (Valid continuation)	4 (Invalid skip)
-8,-9	-2 (Missing continuation)	-9 (Missing skip)

23. **GB0273SK, UB0274A-UB0274S,GB0274A-GB0274S.**

GB0273SK is a skip flag indicating whether GB0273 is answered consistently with Question 74.

GB0273 value after first edit step	GB0274A-GB0274S values after first edit step	
	at least one NE -9	all EQ -9
1 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
0 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

If GB0273 = 1 then GB0274A-GB0274S= 64 (Not applicable – I DID report ALL the behavior to someone specified in Question 66.)

24. **GB0280SK, UB0281, UB0282A-UB0282G, GB0281, GB0282A-GB0282G.**

GB0280SK is a skip flag indicating whether GB0280 is answered consistently with Questions 81-82.

GB0280 value after first edit step	GB0281-GB0282G values after first edit step	
	at least one NE -9 (GB0281 may equal 0)	all EQ -9
0 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
1 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

UB0281, UB0282A-UB0282G are equal to GB0281, GB0282A-GB0282G, but are Unedited for forward coding of not applicable response values. After creating the unedited variables:

If GB0280 = 0 then GB0281 = 0

If GB0280 = 0 then GB0282A-GB0282G = 66 (Not applicable – I haven’t received any training.)

25. **GB0281.** GB0281 is coded as the entry in the grid. GB0281 is not edited and the codebook page for GB0281 should note: “The field is neither checked for unlikely values nor checked against record data.”
26. **REQUEST.** Request has two codes.
 - 1 Text not entered is assigned if nothing is written in the space provided for e-mail address or if what is written is an unintelligible entry (e.g., lines, squiggles, or multiple *XXXs*) .
 - 2 Text entered is assigned if something substantive is written in the space provided for e-mail.
27. **SRDATE.** See Table D-2.
28. **COMMENT.** Comment has two codes.
 - 2 Text entered
is assigned if something substantive is written in the space provided for comments.
 - 1 Text not entered
is assigned if nothing is written in the space provided for comments, or if what is written is either an unintelligible entry (e.g., lines, squiggles, or multiple *XXXs*) or a negative reply (e.g., *nothing, none, no, NA, or not applicable*).

APPENDIX I

NOTES ON ANALYSIS

Notes on Analysis for the 2002 Workplace and Gender Relations Survey

This section is focused on the analytic variables contained on the survey analysis files that were used in reporting the results of the survey. The section describes basic crossing variables that were constructed, the race/ethnicity variables based on OMB guidelines, and variables constructed for sample design.

Analytic Variables

The most important variables constructed for analyses have been preserved on the survey analysis files. Where possible these variables are on the public-release file. In every case where a crossing of demographic variables would allow the isolation of one or two respondents, however, either a variable was collapsed into broader categories or some variables were set to missing in the public-release variables in order to preserve respondents' confidentiality.

Key Demographic Variables

Demographic data are obtained both from respondents' self-reports on the questionnaire and from the ADMF for Active Duty personnel. Self-reported race/ethnicity, gender, Service, and paygrade were used when available in the analyses reported. Where self-reported data were missing, values were imputed through the use of master file data extracted from the May 2001 ADMF for active-duty personnel. These imputed variables are referred to as X (crossing) variables. The only variables that were imputed are those crucial to the tabulation of data. Figure I.1 provides SAS code for the imputation and creation of the DMDC standard for reporting Federal data on race and ethnicity. Figures I.2 – I.5 contain either the SAS code or pseudo code of the crossing variables for Service, gender, and paygrade. Code is also provided for the five- and seven-category race and ethnicity variables and the seven-category paygrade variable.

Race and Ethnicity. XRETH1 implements the U.S. Office of Management and Budget Bulletin 00-02 (2000) standards for reporting Federal data on race and ethnicity. XRETH1 groups the responses to SRRACEA-SRRACEF into racial/ethnic categories, which include multi-racial combinations. The categories are broken down by whether or not the respondent indicates Hispanic descent (from variable SRHISP). Each description in the "RACIAL CATEGORY" column of the chart below is preceded by an H for "Hispanic" if the respondent has a value greater than or equal of 2 for SRHISP, and by a NH for "Non-Hispanic" if SRHISP has the value of 1. The columns to the right of the descriptions show the Hispanic and race/ethnicity codes matching each description. The coding for XRETH1 follows the coding provided in the chart. For example, Hispanic single-race respondents who mark only one of SRRACEA-SRRACEF are assigned the corresponding code (1 to 6) from the racial/ethnic categories. Hispanics selecting more than one race are coded 7. The categories for Non-Hispanics are similar, except that some specific racial combinations form their own categories (codes 15-18). The remaining racial combinations reported by Non-Hispanics are coded 19. This variable was imputed using values RACETH and CRACECAT from the DMDC ADMF for

active-duty members. The variables R1XRETH1 and R2XRETH1 collapse XRETH1 into seven or five categories, respectively.

CO DE	RACIAL CATEGORY (XRETH1)	SR- HIS P	SR- RAC EA	SR- RAC EB	SR- RAC EC	SR- RAC ED	SR- RAC EE	SR- RAC EF
1	H American Indian or Alaska Native	>=2	1	1	2	1	1	1

Figure I.2.
SAS Code Service Component

Service Component. This variable denotes the member's service component and was used as a crossing variable for tabulations. It is created from self-reported information from Question 6. The values for this constructed variable were filled in for members from CSERVICE if SRSVC was missing and the member record is found on the DMDC ADMF.

```

/***** Creation of XSVC *****/
If srsvc = 1 then xsvc = 1; /*army*/
Else if srsvc = 2 then xsvc = 2; /*navy
Else if srsvc = 3 then xsvc = 3; /*marine corps*/
Else if srsvc = 4 then xsvc = 4; /*air force*/
Else if srsvc = 5 then xsvc = 5; /*coast guard*/
Else xsvc = .;

If xsvc = . then do;
  xsvc = cservice;
  xsvcf = 1;

```

Figure I.3.
SAS Code for Gender

Gender. This variable denotes the member's gender. It is created from Question 1. The values for this constructed variable were filled in for members from SEX_M if XSEX is missing.

```
/****** Creation of XSEX *****/

If srsex = 1 then xsex = 1; /*male*/
Else if srsex = 2 then xsex= 2; /*female*/
Else xsex = . ;

If xsex = . & (CSEX = 1 or CSEX =2) then do;
    xsex = CSEX;
    xsexf = 1;
End;
Else xsexf = 0;
```

Figure I.4. SAS Code for Paygrade.

Paygrade. This variable denotes the member's paygrade. It is created from self-reported information from Question 7. Missing values were imputed from the ADMF variable, PAYGRDE.

```
/****** Creation of XGRADE *****/  
If srgrade = 1 then xgrade = 01; /*Enlisted E-1 */  
Else if srgrade = 2 then xgrade = 02; /*Enlisted E-2 */

***Coding Notes to Convert 1995 Form B Data
to Form 2002GB Specifications***

When feasible, Form 2002GB was coded for easy comparison to the 1995 Form B survey. For example, where possible special missing value codes were chosen to be consistent with the values used for the 1995 survey. Two major changes were made however. The first change is that skip pattern items in 2002 were forward coded while the 1995 survey had been backward coded. Table I-1 shows the change as coding notes while Figure I.6 shows how to use SAS to change the 1995 Form B dataset to make it compatible with the 2002 dataset.

The third major change was in the construction of key indicators given the changes in the core items measuring gender issues.

Table I-1***Special Coding Notes to Convert 1995 Form B Data to Form 2002GB Specifications*****Note Coding instructions**

1. **GB95072.** Corrects 1995 Note 6. If GB95072 EQ -2 or 62, then recode to 61. If GB95072 in range of 10-12, then recode to 0-2.
2. **GB9571CN, GB95071A-GB95071Y, GB95072, GB9572SK**
Corrects 1995 Note 6; see 2002 Note 15.

GB9571CN is a consistency flag indicating whether GB9571A-GB9571Y are answered consistently with Question 72.

GB9571A-GB9571Y values after first edit step	GB95072 values after first edit step		
	GB95072 EQ 61	GB95072 EQ 0,1,2	GB95072 EQ -8, -9
None > 0	1 (Consistent)	2 (Inconsistent)	-9 (Missing)
At least one in the range of 1-4 (direction to continue)	2 (Inconsistent)	1 (Consistent)	-9 (Missing)
All -8 or -9	-9 (Missing)	-9 (Missing)	-9 (Missing)

If (none of GB9571A-GB9571Y > 0) then GB95072 and GB9572SK = 61

3. **GB9572SK, , GB95073A-GB95073Y, GB95074-GB95077, GB95078A-GB95078N, GB95079-GB95083, GB95084A-GB95084D, GB95085A-GB95085D, GB95086-GB95096, GB95097A-GB95097E, GB95098, GB95099A-GB95099L, GB95099SP, GB95100A-GB95100J, GB9500SP, GB9500SK, GB95102A-GB95102M, GB9502SP, GB95102, GB95103A-GB95103F, GB95104A-GB95104H, GB9504SK, GB95105-GB95106, GB95107A-GB95107T, GB9507SP, GB9507CN, GB95108.**

Corrects 1995 Note 6; see 2002 Note 17.

GB9572SK is a skip flag indicating whether GB95072 is answered consistently with Questions 73-108.

GB95072 value after first edit step	GB95073A-GB95108 values after first edit step	
	at least one NE -9	all EQ -9
61 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
0, 1, 2 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

If GB95072 = 61 then GB95073A-GB95073Y, GB95074-GB95077, GB95078A-GB95078N, GB95079-GB95083, GB95084A-GB95084D, GB95085A-GB95085D, GB95086-GB95096, GB95097A-GB95097E, GB95098, GB95099A-GB95099L, GB95099SP, GB95100A-GB95100J, GB9500SP, GB9500SK, GB95102A-GB95102M, GB9502SP, GB95102, GB95103A-GB95103F, GB95104A-GB95104H, GB9504SK, GB95105-GB95106, GB95107A-GB95107T, GB9507SP, GB9507CN, GB95108 = 61

4. **GB95100A-GB95100J.** If any of GB95100A-GB95100J EQ -2, then recode to 0. Corrects 1995 Note 11.

5. **GB9500SK, GB95102A-GB95102M, GB9502SP, GB95102, GB95103A-GB95103F, GB95104A-GB95104H, GB9504SK, GB95105-GB95106, GB95107A-GB95107T, GB9507SP, GB9507CN, GB95108.**

GB9500SK is a skip flag indicating whether GB95100A-GB95100J are answered consistently with Questions 102-108.

GB95100A-GB95100J values after first edit step	GB95102A-GB95108 values after first edit step	
	(at least one of GB95073A-GB95108 NE -9)	All of GB95073A-GB95108 EQ -9
None in range of 1-3 (direction to skip)	3 (Invalid continuation)	1 (Valid skip)
At least one in the range of 1-3 (direction to continue)	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

After creating the unedited variables:

If (none of GB95100A-GB95101J are in the range of 1-3) then GB95101A-GB95101M, GB9501SP, GB95102, GB95103A-GB95103F, GB95104A-GB95104H, GB9504SK, GB95105-GB95106, GB95107A-GB95107T, GB9507SP, GB9507CN, GB95108 = 63

6. **GB95104A-GB95104H, GB95105.** To correct 1995 Note 14.

If GB95104A = -2 then GB95104B-GB95104H, GB95105 = 65
If GB95104A = -2 then GB95104A = 1

APPENDIX J

SOFTWARE APPLICATIONS FOR THE ANALYSIS OF THE 2002 WORKPLACE AND GENDER RELATIONS SURVEY (FORM 2002GB)

Appendix J

Software Applications for the Analysis of the Armed Forces 2002 Workplace and Gender Relations Survey

Variance estimation procedures have been developed to account for complex sample designs. Using these procedures, factors such as the selection of the sample and the use of differential sampling rates to oversample a targeted subpopulation can be appropriately reflected in estimates of sampling error. The two main methods for estimating variances from a complex survey are known as Taylor series variance estimation and replication. Wolter (1985) is a useful reference on the theory and applications of these methods. Shao (1996) is a more recent review paper that compares these methods.

Standard statistical software packages that assume a simple random sampling design may not properly compute variance estimates from weighted data collected under a design other than simple random sampling. Analyzing the Armed Forces 2002 Workplace and Gender Relations (*WGR*) Survey (*Form 2002 GB*) data file with the proper use of the variable PSW0 as the weighting factor in standard statistical programs will result in accurate point estimates¹ but will not result in accurate variance estimates.

This appendix gives guidance for analyzing² the data from WGR Form 2002 GB using three software packages (WesVar, SUDAAN, and SAS) that take into account the sampling design of the survey. In general, SUDAAN, WesVar, and SAS produce the same point estimates.³ The differences are in the methods used to compute the variances. While WesVar uses only replication methods and SUDAAN can use both replication methods and Taylor series expansions, SAS uses only Taylor series expansions. While SAS has a more limited set of statistics available at this time, it can still produce most of the statistics typically reported from survey data. In version 7, SAS first introduced procedures for estimating variances in data with complex variance structures. However, in Version 8 an important option was added with the *DOMAIN* statement.

For reference, Table J-1 lists some of the features available in SUDAAN, SAS, and WesVar that are relevant to DMDC survey analysis. This list is not exhaustive, particularly for SUDAAN and WesVar. SUDAAN and WesVar have additional analysis features that may be of interest to some data users.

¹ Differences may occur in point estimates (e.g., means, percentages, and correlations) for different statistical packages as the result of different methods of handling missing data by some procedures.

² While two of the three packages can handle at least some regression functions for sample designs other than simple random sampling, this introduction is limited to estimating percentages.

³ Because the programs may handle missing values differently, estimates may be different when missing values are present.

Table 7.
Some Features of Three Software Packages for the Analysis of Survey Data

Feature	SUDAAN	SAS	WesVar
Estimation features reflected in variance estimates			
Stratification	x	x	x
Ineligible cases in poststratification frame	x	x	x
Differential weights among cases	x	x	x
Nonresponse adjustments (unknown eligibility, eligible nonrespondents)	x*	NA	x
Poststratification	x	NA	x
Raking	NA	NA	x
Finite population correction factors	x	x	x**
Tables			
Totals/standard errors	x	x	x
Means/standard errors	x	x	x
Proportions/standard errors	x	x	x

Differences of cell estimates/standard errors	x	NA	x
Ratios of cell estimates	x	NA	x
Linear regression			
Parameter estimates/standard errors	x	x	x
Confidence intervals for parameters	x	x	x
Logistic regression			
Parameter estimates/standard errors	x	NA	x
Confidence intervals for parameters	x	NA	x
Odds ratios/confidence intervals	x	NA	x
Multinomial logistic regression (unordered categories)			
Parameter estimates/standard errors	x	NA	x
Odds ratios/confidence intervals	x	NA	x
Multinomial logistic regression (ordered categories)			
Parameter estimates/standard errors	x	NA	NA
Odds ratios/confidence intervals	x	NA	NA

Note: NA= not available.

* Available in SUDAAN when estimates of variance based on replication methods are used

** Common fpc's at the replicate level

Structure of Datasets

The public-release WGR Form 2002 GB file contains 60,415 records, one for every sampled individual. These 60,415 records can be divided into three subgroups, which are used for different analytic purposes and may be required by different analytic packages. The primary analytic subgroup (records with ELIGFLGW = 1) is comprised of the records for eligible respondent members and these records are typically all that are required for analyses.

The second subgroup (ELIGFLGW = 2) includes the self-reported ineligibles not identified in the frame and these records are used along with the eligible respondents to develop weights that sum to the population total. Records for the respondents and the self-reported ineligibles (ELIGFLGW = 1 and 2, respectively) are used to compute variance estimates based on the Taylor series linearization method implemented in SUDAAN and SAS Version 8. All 19,982 records with ELIGFLGW equal to 1 or 2 should be used in the analytic dataset for SUDAAN and SAS.⁴ The records for known ineligibles are not used in the point estimates, but they are used in computing variances.

The last subgroup (ELIGFLGW = 3) is composed of nonrespondents and ineligibles identified by the frame. These records are needed only to analyze response rates to the survey and are not retained for any other analysis.

The effect of excluding the records for ineligible members may be small on Taylor series variance estimates. However, additional steps to further subset the dataset before passing it to SUDAAN may lead to more serious errors in the variance estimates because SUDAAN would not properly treat the subset as an estimation domain. In this particular situation, SUDAAN could still estimate the variances though they would be different than the same estimates computed using the full dataset of 19,982 records.

Analysis of the WGR Form 2002 GB Using WesVar

This section describes the use of WesVar to analyze data for the WGR Form 2002 GB survey in order to compute sample estimates and their corresponding standard errors.

WesVar is a package developed by Westat that uses replication methods to compute variance estimates. Through the use of replicates, adjustments made during the weighting process (e.g., nonresponse, raking) can be taken into account by applying the same adjustments to each replicate separately. Replication is computer intensive, but powerful personal computers have largely eliminated this as an issue. However, it is still possible that for very large datasets the computations will exceed the capacity of the machine or take a long time. Although replication can be used for most estimates, replication techniques are not necessarily appropriate for all sample statistics of interest. Special care is needed when trying to estimate the median, quartiles, or any other quantiles. Direct estimates of sampling errors for quantiles are available in version 4.2, while an alternative method due to Woodruff (1952) is available in that and earlier versions of WesVar.

⁴ SUDAAN could also process all records in the file. It would simply skip the 40,433 records with zero weights (PSW0 = 0).

WesVar is an interactive program centered on sessions called “workbooks.” A workbook is a file linked to a specific WesVar dataset. In a workbook, the user can request descriptive statistics, as well as analyze and create new statistics. The information about the design is incorporated into the replicate weights when the WesVar data file is created. For descriptive statistics and analysis variables, “requests” are defined within a workbook. Regression requests support both linear and logistic models. Output listings include statistics such as the sum of weights, means, and percentages, along with their corresponding standard errors, design effects, coefficients of variation (CV), and confidence intervals.

Creation of WesVar Files

WesVar uses special files to compute statistics.⁵ The first step is to transform the SAS files into a WesVar data file known as a VAR file. It is recommended that users include only the 19,960 eligible records (ELIGFLGW=1) during the creation of the VAR file. In this way, there is no need to use a subpopulation option to run statistics for the eligible population. During the creation of the VAR file, additional information about the design is required. In the case of the WGR Form 2002 GB, the information about the design (variance strata and weight adjustments) has been incorporated when the replicate weights were created. The variance estimation method used in WGR Form 2002 GB is called JK_n and requires two additional files: 1) a file with the finite population factors (FPC.DAT) and 2) a file with the JK_n factors (JKN.DAT).

Creating a Workbook and Running a Simple Table

To create a workbook, select the button “New WesVar Workbook” on the opening WesVar screen, which brings up the screen shown in Figure J-1.⁶ The “Add Table Set (Single)” and “Add Table Set (Multiple)” buttons are two ways of defining tables. The first example discussed here will be to create a one-way table of the numbers of persons in each level of the computed service component determined by variable XSVC in the data file.

To define this table, click the button “Add Table Set (Single),” which brings up the screen shown in Figure J-2. From the Source Variables list box on the right-hand panel, select and drag the variable XSVC to the Selected box. Then click the button “Add as New Entry” to add the table as a new node to the workbook tree on the left-hand panel. In the column labeled “Sum of Weights,” the checked boxes indicate that estimated totals (Value) and the cell percentages (Percent) associated with each cell total will be printed in the output.

You can give more descriptive labels to the nodes of the workbook tree if desired. For example, you can highlight the “Table Request One” node in the left-hand panel in the screen shown in Figure J-1 and change the request name to “Simple Tabulations” in the right-hand panel.

⁵ These files are available on CD-ROM for the WGR Form 2002 GB.

⁶ The examples and screenshots in this section were done using WesVar Version 4.1. Version 3 and 4.2 are similar.

A WesVar Workbook

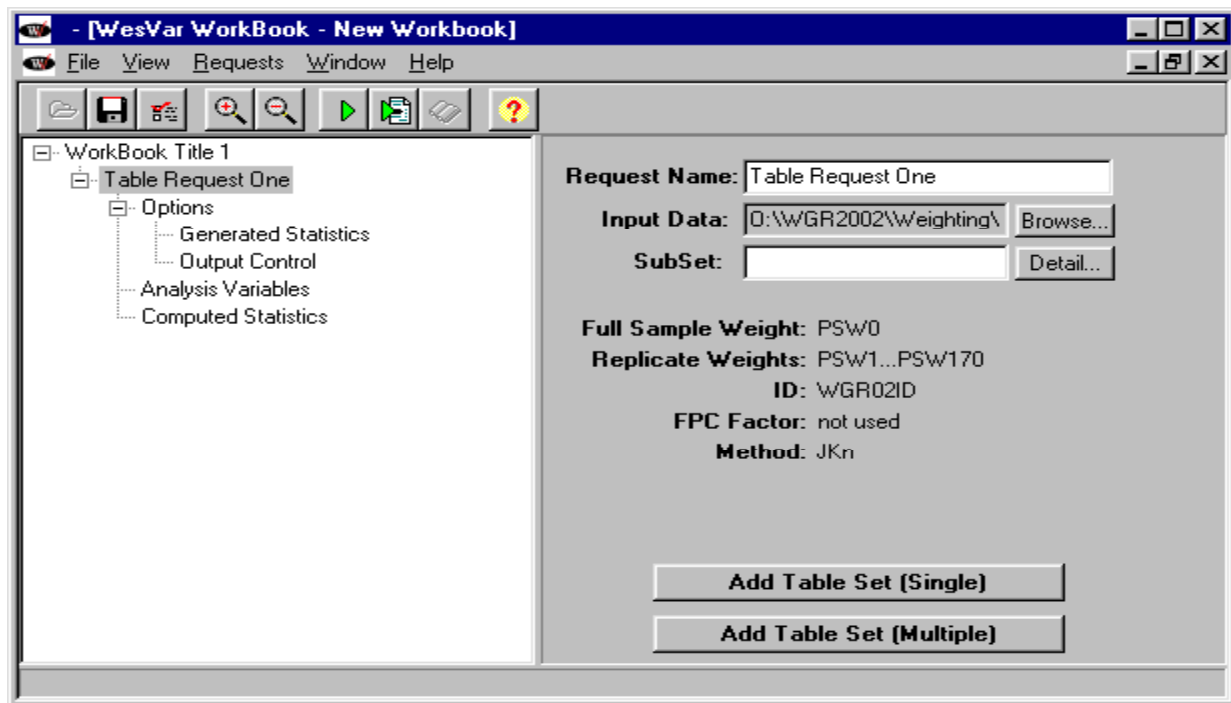

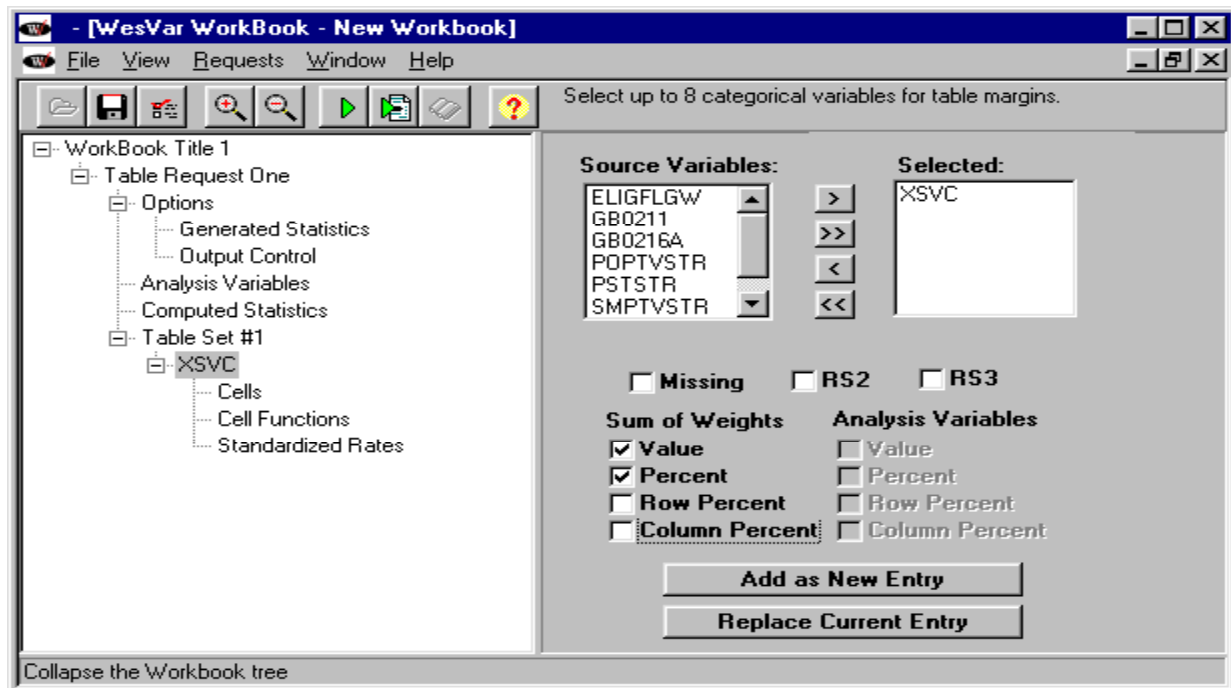

Figure J-2.
Defining a WesVar Table Request

To run the XSVC table, select the menu items “Requests/Run Workbook Requests” or click the green triangle button in the toolbar. When the calculation has been completed, the book icon in the toolbar will no longer be gray. You can then view the output by selecting the menu items “Requests/View Output” or by clicking the book icon. The output of this run is shown in Listing J-1. The particular statistics to be printed are selected in the “Options/Generated Statistics” node in the screen shown in Figure J-2. The statistics shown in Listing J-1 are the estimate, standard error, CV (%), numerator and denominator sample sizes for percentages (CELL_n and DENOM_n in the output), and design effect. Other choices are confidence intervals (computed using either the t approximation or the Wilson method for percentages), the effective sample size (defined as the actual sample size divided by the design effect), and the p -values for testing whether parameters are zero.

Comparing Two Subgroups Using WesVar

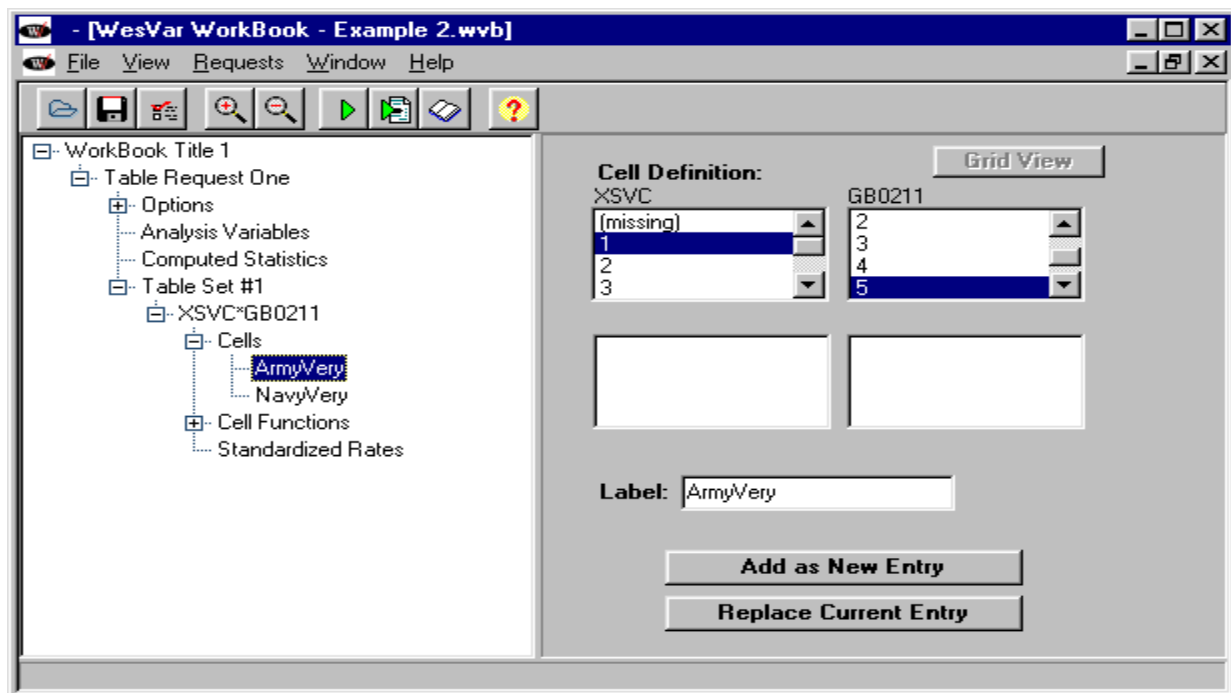

The second example discussed here will compare the percentages of two subgroups of members who reported being very likely to stay on active duty (Question 11, variable GB0211). The subgroups are the Army members and the Navy members.

To compare the two subgroups, create a workbook as in the previous example. Then, create a two-way table comparing the service branches' (XSVC) responses to question GB0211. To define this table, click the button "Add Table Set (Single)" in the screen in Figure J-1, which brings up the screen shown in Figure J-2. From the "Source Variables" list box in the right-hand panel, select the variables XSVC and GB0211 and drag them to the "Selected" box. Then click the "Add as New Entry" button to add the table as a new node in the workbook tree on the left-hand panel.

The levels of the variable XSVC define the rows of the table while the levels of GB0211 define the columns. The values of XSVC equal to 1 and 2 identify the Army and Navy members, respectively. The value of GB0211 equal to 5 indicates that the member reported being very likely to stay on active duty. The following discussion illustrates how to compute the difference between the percentages of Army and Navy members who reported being very likely to stay on active duty.

At this point, the workbook tree will have a node labeled "XSVC*GB0211" as shown in Figure J-3. Notice that the node XSVC*GB0211 has three branches labeled "Cells," "Cell Functions," and "Standardized Rates." To calculate the desired difference in percentages, you must define the cells of the table and then combine the estimates for the cells with a cell function.

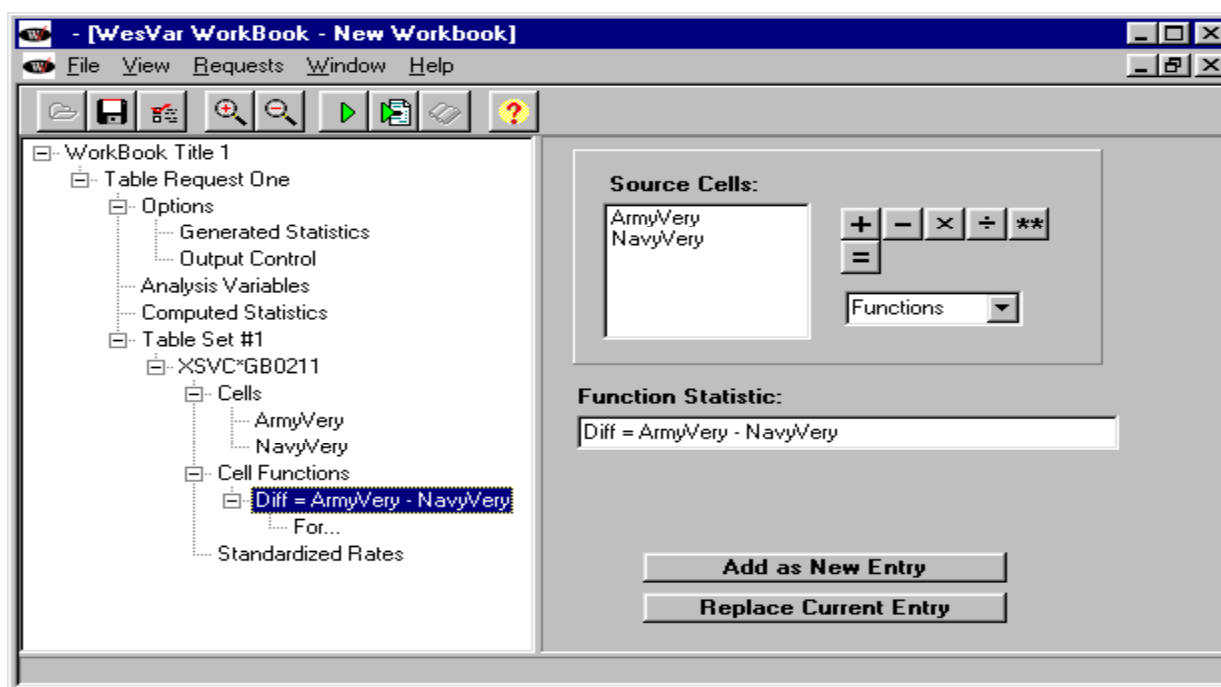

Figure J-3.
Defining a Cell in a Workbook

Click the node “Cells” in Figure J-3. From the XSVC list box in the right-hand panel, select the value 1 for Army members and from the GB0211 box list select the value 5 for members who answered “they are very likely to stay on active duty.” A default name for the cell will appear in the “Label” box. By selecting the “Label” box, you can give the cell a more descriptive name (e.g., ArmyVery) as shown in Figure J-3. Then click the “Add as New Entry” button to add the cell to the workbook tree. Repeat this step but instead of selecting the value 1 for Army members in the XSVC list box, select the value 2 for Navy members. From the GB0211 list box select 5 again and give the cell a more descriptive name (e.g., NavyVery). Click the button “Add as New Entry” to add the cell as a new node in the workbook tree on the left.

To compare the new cells you have created, click the node “Cell Functions” in the workbook tree, which brings up the screen shown in Figure J-4. In the “Function Statistic” box, type “Diff =”. “Diff” is a user-specified name that will be printed in the output. Then, from the “Source Cells” list box, select and drag ArmyVery into the “Function Statistic” box. Click (or type) the minus sign. Select and drag NavyVery into the “Function Statistic” box and click the “Add as New Entry” button to add the function as a new node in the workbook tree. The screen should now look like Figure J-4.

Figure J-4.
Defining a Cell Function

In the “For” node under the “Cell Functions” node, the statistic SUM_WTS (sum of weights) will be selected by default, which is the appropriate choice in this example. With the “For” node selected, check the boxes for “Value” and “Row Percent” under “Sum of Weights.” By selecting the check box for “Value,” the differences in the estimated numbers in the Army members and Navy members who said they were very likely to stay on active duty will be computed and printed in the output along with its standard error. Selecting the check box for “Row Percent” will give the difference in the percentages for the Army members and Navy members and the standard error of the difference. Other statistics, such as a confidence interval, can be requested in the “Generated Statistics” node of the workbook tree shown in Figure J-2.

To run the table, select “Requests/Run Workbook Requests” from the menu or click the green triangle button in the toolbar. When the calculation has been completed, the book icon in the toolbar will no longer be gray (inactive). You can then view the output by selecting the menu items “Requests/View Output” or by clicking the book icon. The output is shown in Listing J-2. The last line of the listing shows the estimate of the difference to be –1.46 percent, with a 95% confidence interval from –4.44 to 1.52 percent. The *t*-statistic for testing if this difference is significantly different from zero is –0.967, which is not significant.

Comparing Two Analysis Variables Using WesVar

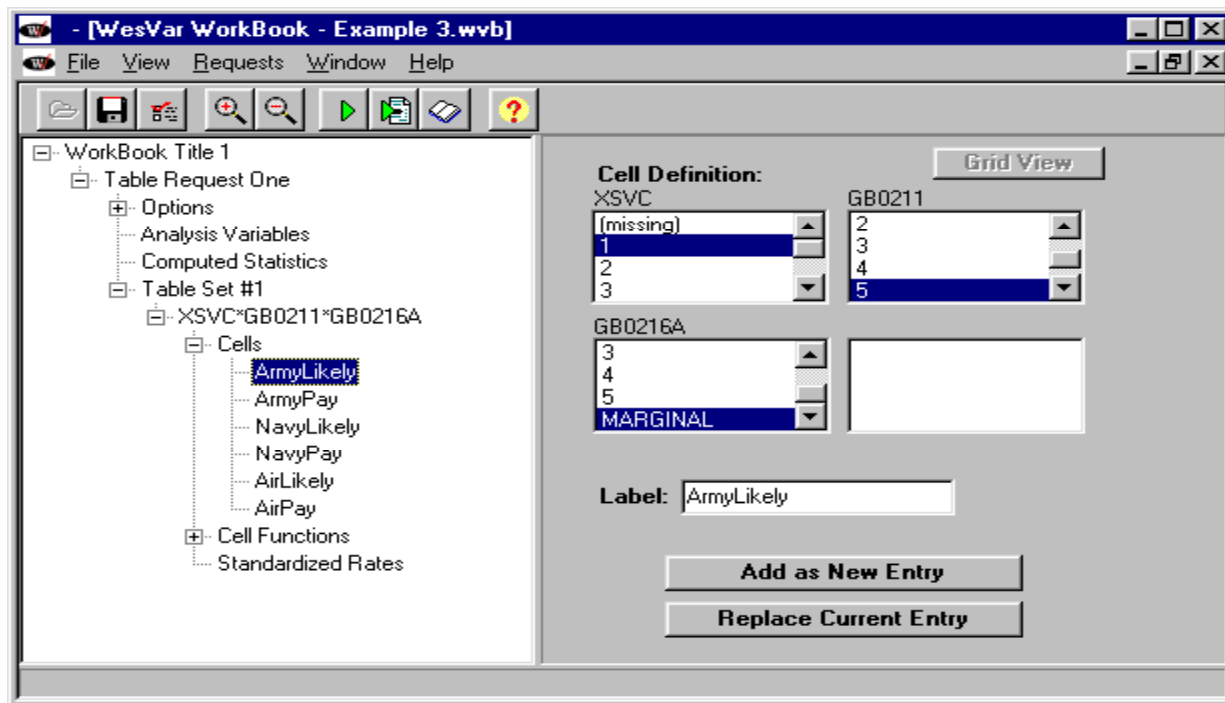

The third example discussed here will compare the response to two questions within subgroups defined by branch of service. The questions are: (1) the member's likelihood of staying on active duty (Question 11, variable GB0211) versus (2) the member's level of satisfaction with their basic pay (Question 16A, variable GB0216A). The subgroups will be the Army, the Navy, and the Air Force.

To compare the two questions within subgroups, create a workbook as in the previous two examples. Then define a three-way table comparing the two questions (GB0211 and GB0216A) within each branch of service (XSVC). The output will be three sub-tables, one for each subgroup, comparing the percentages of members who report being very likely to stay on active duty versus being very satisfied with their basic pay. To define this table, click the button "Add Table Set (Single)" in the screen in Figure J-1, which brings up the screen in Figure J-2. From the "Source Variables" list box in the right-hand panel, select the variables XSVC, GB0211 and GB0216A in that order and drag them to the "Selected" box. Then click the "Add as New Entry" button to add the table as a new node to the workbook tree on the left panel.

The levels of the variable XSVC define the sub-tables while GB0211 define the rows and GB0216A define the columns. The values of XSVC = 1, 2, and 4 identify the members of the Army, the Navy, and the Air Force, respectively. The value of GB0211 = 5 indicates that the member reported being very likely to stay on active duty. The value of GB0216A = 5 indicates that the member reported being very satisfied with their basic pay.

The workbook tree will now have a node labeled "XSVC*GB0211*GB0216A" as shown in Figure J-5. Notice that the node for the table XSVC*GB0211*GB0216A has three branches labeled "Cells," "Cell Functions," and "Standardized Rates." To calculate the desired difference in percentages, you must define the cells of the table that will be used and then combine estimates for the cells with a cell function.

Figure J-5.
Defining a Cell in a Workbook

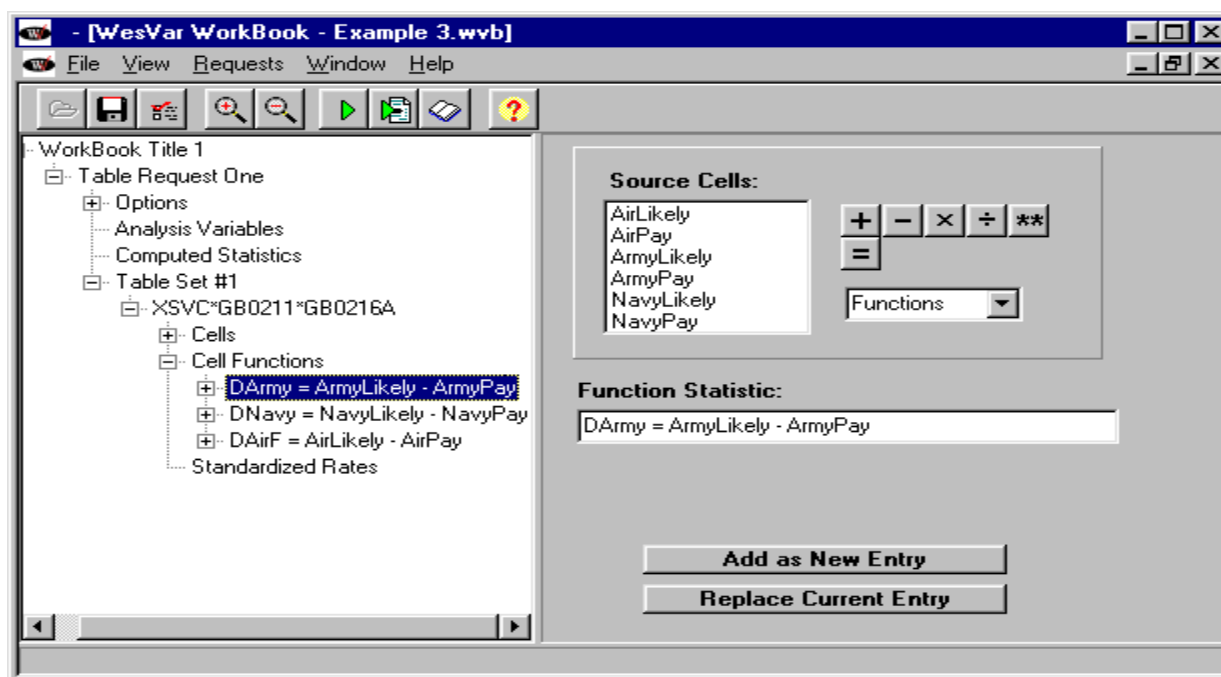

Click the node “Cells” in the screen shown in Figure J-5. From the XSVC list box in the right-hand panel, select the value of 1 for all the Army members. From the GB0211 list box, select the value of 5. From the GB0216A list, select MARGINAL. The cell (GB0211, GB0216A) = (5, MARGINAL) for the Army members will be used to obtain the percentage of the Army members who reported being very likely to stay on active duty. A default name for the cell will appear in the “Label” box. By selecting the “Label” box, you can give the cell a more descriptive name (e.g., ArmyLikely) as shown in Figure J-5. Then click the button “Add as New Entry” to add the cell to the workbook tree. Now, from the XSVC list box in the right-hand panel, select 1 again for all the Army members. From the GB0211 list box, select the item MARGINAL. From the GB0216A list box, select 5. The cell (GB0211, GB0216A) = (MARGINAL, 5) will be used to get the percentage of members who reported being very satisfied with their basic pay. By selecting the “Label” box, you can also give this cell a more descriptive name (e.g., ArmyPay) also shown in Figure J-5. You then click the button “Add as New Entry” to add the cell as a new node in the workbook tree. Repeat these steps for the Navy (XSVC = 2) and the Air Force (XSVC = 4).

To compare the new cells you have created, click the node “Cell Functions” in the workbook tree. This brings up the screen shown in Figure J-6. In the “Function Statistic” box, type “DArmy =”. “DArmy” is a user-specified name for the difference in the two questions for the Army and will be printed in the output. Then, from the “Source Cells” list box, select and drag the item ArmyLikely into the “Function Statistic” box. Click (or type) the minus sign. Select and drag the item ArmyPay into the “Function Statistic” box and click the “Add as New Entry” button to add the function to the workbook tree. In the “Function Statistic” box, type

“DNavy =.” Then, from the “Source Cells” list box, select and drag the item NavyLikely into the “Function Statistic” box. Click (or type) the minus sign. Select and drag the item NavyPay into the “Function Statistic” box and click the "Add as New Entry" button. Finally, in the “Function Statistic” box, type “DAirF =.” From the “Source Cells” list box, select and drag the item AirLikely into the “Function Statistic” box. Click (or type) the minus sign and then, select and drag the item AirPay into the “Function Statistic” box. Click the “Add as New Entry” button. The screen should now look like Figure J-6.

Figure J-6.
Defining a Cell Function

In the “For” node under the “Cell Functions” node, the statistic SUM_WTS (sum of weights) will be selected by default. This is the appropriate choice in this example. With the “For” node selected, check the boxes for “Value” and “Percent” under Sum of Weights. By selecting Value, the differences in the estimated numbers for the two questions GB0211 and GB0216A will be computed and printed in the output listing along with their standard errors. Selecting the check box for Percent will produce the difference in percentages for the two questions and the standard error of such difference. Other statistics, such as a confidence interval, can be requested in the “Generated Statistics” node of the workbook tree shown in Figure J-2.

To run the table, select the menu items “Request/Run Workbook Requests” or click the green triangle button in the toolbar. When the calculation has been completed, the book icon in the toolbar will no longer be gray (inactive). You can then view the output listing by selecting the menu items “Requests/View Output” or by clicking the book icon. An extract of the output listing is shown in Listing J-3. In this example, a significantly smaller percentage of members were satisfied with basic pay than reported they were very likely to remain on active duty in the Army, the Navy and the Air Force.

Comparing Estimates from Different Surveys Using WesVar

The fourth example uses a t -statistic to compare an estimate from one survey with an estimate from an independently selected sample from another survey. The surveys used in this example are the Armed Forces 2002 Workplace and Gender Relations (*WGR*) Survey (*Form 2002 GB*) and the 1995 Sexual Harassment Survey (SHS), which are independent of one another. This example will compare the proportion of Army members who reported being very likely to stay on active duty in the WGR Form 2002 GB (Question 11) with the proportion of Army members who reported being very likely to stay on active duty in the 1995 SHS (Question 10).

To compare the proportions of Army members, who reported being very likely to stay on active duty, first use WesVar to compute the proportion and standard error for this group using the WGR Form 2002 GB data. Specify a workbook as in the previous examples; and create a two-way table comparing the service branches' (XSVC) by members who reported being very likely to stay on active duty (GB0211), as in the second example. After creating the table XSVC*GB0211, run the table as described before. The output will look like the top section in Listing J-2. Then obtain the proportion estimate of Army members who reported being very likely to stay on active duty in the 1995 SHS and the standard error of that estimate. In the 1995 SHS, the proportion of Army members who reported being very likely to stay on active duty was 37.71 percent with a standard error of 1.133.

The difference between the Army members in the WGR Form 2002 GB and the Army members in the 1995 SHS is $35.15 - 37.71 = -2.56$ percentage points. To compare the proportions p_{Army02} and p_{Army95} , use the following formula to compute the standard error of the difference:

$$se_{Army02-Army95} = \sqrt{se_{Army02}^2 + se_{Army95}^2}$$

and this formula to compute the t -statistic for testing the difference:

$$t = \frac{p_{Army02} - p_{Army95}}{se_{Army02-Army95}}.$$

In the example above, $se_{Army02 - Army95} = \sqrt{(0.926)^2 + (1.13)^2} = 1.46$ percent and $t = \frac{-2.56}{1.46} = -1.75$, which shows there is a significant difference between Army members in the WGR Form 2002 GB and Army members in the 1995 SHS.

Analysis of the WGR Form 2002 GB Using SUDAAN

This section describes how to use SUDAAN for the analysis of the WGR Form 2002 GB data and details which options are appropriate to use.

SUDAAN (Software for the Statistical Analysis of Correlated Data) is a statistical package developed by Research Triangle Institute (RTI) to analyze data from complex sample surveys. Like WesVar, SUDAAN computes the standard errors of the estimates taking the survey design into account. While SUDAAN can also use replication methods, it is most often used for computing variances based on the first-order Taylor series approximation also known as linearization.

Linearization variance estimates in SUDAAN can properly account for poststratification but not raking. When raking is used, one possibility is to identify one raking variable that has the most effect on standard errors and tell SUDAAN that the weights were poststratified on that variable. The WGR Form 2002 GB weights were raked to five dimensions. In this case dimension 1 (DIM 1, Table 10 in the Armed Forces 2002 Workplace and Gender Relations Survey weighting report) had the most effect on standard errors.

As mentioned above, all weighted cases are typically kept in the analysis file, even cases not in the subpopulation of interest, because all weighted cases should be used to estimate variances. This applies in the general case of ineligibility but it is most important for analyses focused on a subgroup of the population. See below for an example of use of the *SUBPOPN* statement.

Required Variables

The variables that provide information about the sample design in SUDAAN are:

- **Variable TVSTR** (Taylor's series variance strata). The variable TVSTR indicates the variance strata to be used for computing the estimates of variance using the Taylor series method. The variable TVSTR was created using the sampling strata. Strata with fewer than 25 records with positive final weights were collapsed with similar strata.
- **Variable ELIGFLGW** (final eligibility indicator). The variable ELIGFLGW indicates the final eligibility of the member. Eligible members have ELIGFLGW = 1 while ineligible members have ELIGFLGW = 2. Records with zero final weight have ELIGFLGW = 3.
- **Variable PSW0** (final full sample weight). The variable PSW0 contains the final weight for the full sample. This weight is positive for all the records where ELIGFLGW = 1 or 2.

- **Variable POPTVSTR** (total population in variance strata). The variable POPTVSTR contains the total population for the variance stratum defined by the variable TVSTR. It is required to compute the finite population correction factors (*fpc*) for the estimates of variance.
- **Variable PSTSTR** (final poststratification cell). The variable PSTSTR indicates the final poststratification cell. As mentioned before, in the last weighting adjustment the final weights were created by raking the nonresponse-adjusted weights to 10 dimensions. Since SUDAAN cannot reflect the variance reduction due to raking we assume that the weights were poststratified to dimension 1 (DIM 1). The value of this variable is a sequential number from 1 to 40 corresponding to the levels of DIM 1. In SUDAAN, the control totals are hardcoded in the program and correspond to totals for cells 1 to 40 in this order.
- **Variables PSW1- PSW170** (final replicate weights). The variables PSW1-PSW170 contains final weights for the 170 replicates created for the WGR Form 2002 GB. These variables are required when variance estimates based on replication methods are computed.

SUDAAN Keywords

The statements and keywords needed to run SUDAAN to compute variance estimates based on the Taylor Series approximation are:

- **DESIGN=STRWOR** (required). The WGR Form 2002 GB is a stratified simple random sample selected without replacement. In some strata the sampling fraction is so large that the *fpc* used in the variance estimation formula is not negligible.
- **NEST TVSTR/ MISSUNIT** (required). The keyword NEST lists the variables whose values identify the sampling stages. In this case, the sample was drawn within strata. The Option /MISSUNIT instructs SUDAAN to compute the variance contribution of any stratum with only one primary sampling unit (PSU) using the difference of that unit's value and the overall mean value of the population. The dataset must be sorted by the variable listed in the NEST statement. In the examples that follow this list of statements and keywords, the datasets are already sorted by the variable TVSTR.
- **WEIGHT PSW0** (required). The keyword WEIGHT lists the final weight to be used in the analysis. In this case, the variable for the weight is the final full sample weight PSW0.
- **TOTCNT POPTVSTR** (required if DESIGN=STRWOR). The keyword TOTCNT lists the variable containing the total population count of the strata. In this case, the variable POPTVSTR contains the population count for the variance stratum TVSTR.

- **SUBPOP** **ELIGFLGW=1** (typically required). The keyword SUBPOP lists the variables and conditions that define the population of interest. The WGR Form 2002 GB data file includes ineligible members with a final positive weight. To compute the correct fpc's, the ineligible members should be included in the file. Analyses, however, should be limited to eligible members only (ELIGFLGW=1). Additional conditions can be included. For example if members in the Navy (XSVC = 2) are to be excluded, the statement should be SUBPOP ELIGFLGW=1 & XSVC <>2.
- **POSTVAR** **PSTSTR** (required but valid only in PROC DESCRIPT and PROC RATIO). The keyword POSTVAR lists the variable that indicates the cells for poststratification. SUDAAN performs an internal poststratification of the weight using the control totals in the POSTWGT statement. If the data does not have any missing values, the point estimate obtained in SUDAAN will be the same as the one obtained in WesVar. If there are missing values, SUDAAN will compute a new weight different than the final weight given in the WEIGHT statement. This statement cannot be used in the PROC CROSSTAB. Also, when the statement POSTVAR is used, the design effect cannot be computed.
- **POSTWGT** 126614 76328 61577 89797 25785 13819 9886 13279 100379 56880 47822 82523 21653 9056 5581 9863 80182 25513 14936 19909 5642 1512 859 962 75219 50549 45270 92783 25423 13708 8975 13747 8288 5707 4672 10130 1237 747 440 755 (required if POSTVAR is used). This statement follows the statement POSTVAR and lists the control totals for the cells indicated by the variable PSTSTR. These totals correspond to the totals for the raking dimension DIM 1.

The additional statements and keywords needed to run SUDAAN to compute estimates of variance based on replication methods are:

- **DESIGN= JACKKNIFE** (required). The WGR Form 2002 GB data file include replicate weights that can be used in SUDAAN. The replication method used to create the weights is a form of the jackknife method. If estimates of variance based on replication methods are computed, the option JACKKNIFE should be used in the design statement.
- **JACKWGTS** **PSW1- PSW170** (required). The keyword JACKWGTS lists the variable names for the 170 replicate weights created for the WGR Form 2002 GB data.
- **JACKMULT** 30*0.60549120879 30*0.73232758586 30*0.87000030000 80*0.98493250000 (required). The keyword JACKMULT lists the 170 replicate factors to be applied to each replicate weight. The factors are computed by multiplying separately the finite population factors found in the file FPC.DAT by the JK factor found in the file JKN.DAT for each replicate. Special care is needed so that the order of the factors and the weights are the same in the JACKWGTS and JACKMULT statements and in the files containing the factors.

Estimates Using SUDAAN based on the Taylor Series approximation

Listing J-4 shows an example of running SUDAAN's PROC CROSSTAB to compute totals, percentages and standard errors for the variable XSVC based on the Taylor Series approximation. The procedure CROSSTAB produces weighted frequencies and percentage distributions for univariate and multivariate (single variable or multiple variable) tabulations. The following statements were used to produce the output in Listing J-4:

```
proc crosstab data=rmret design=strwor def2;  
  weight PSW0;          /* final fs weight */  
  nest TVSTR /missunit; /*taylor series strata */  
  totcnt POPTVSTR ;     /*total population in taylor series strata */  
  subpopn ELIGFLGW = 1; /*eligibles only*/  
  subgroup XSVC ;  
    levels 5 ;  
    tables XSVC ;  
  title 'proc crosstab sample';  
  print nsum wsum sewgt deffwgt totper setot defftot /style=nchs ;
```

Listing J-4.

5	1654.000	32228.154	294.835	2.564	0.025	0.048

Note: The standard errors of both the estimated totals and percentages in Listing J-4 are much larger than the replication standard errors in Listing J-1. This is because the effect of raking cannot be accounted for in PROC CROSSTAB.

Listing J-5 shows an example of running SUDAAN's PROC DESCRIPT to compute totals and percentages for XSVC.⁷ In this procedure, the statements POSTVAR and POSTWGT are being used and the estimates will reflect the reduction in variance due to poststratification. The standard errors estimated by DESCRIPT are smaller than the CROSSTAB estimates (Listing J-4) and are closer to those estimated by WesVar (Listing J-1). If poststratification is ignored, PROC DESCRIPT's estimates of variance are identical to those from PROC CROSSTAB. The output in Listing J-5 was produced by the following statements:

```
proc descript data=rmret design=strwor def2;
weight PSW0;          /* final fs weight */
nest TVSTR /missunit; /*taylor series strata */
totcnt POPTVSTR ;     /*total population in taylor series strata */

Comparing Two Subgroups Using SUDAAN

For comparing two subgroups within a survey (e.g., Army vs. Navy), contrasts can be performed in the PROC DESCRIPT⁸ procedure. The following statements were used to produce the output in Listing J-6. This example assumes that the SAS callable version of SUDAAN is used.

```
proc descript data=rmret design=strwor;
  weight PSW0;                /* final fs weight */
  nest TVSTR /missunit;       /*taylor series strata */
  totcnt POPTVSTR;            /*total population in taylor series strata */
  subpopn ELIGFLGW=1;         /*eligibles only */

  postvar PSTSTR;
  postwgt
  126614 76328      61577      89797      25785
  13819  9886       13279      100379     56880
  47822  82523      21653      9056       5581
  9863   80182      25513      14936      19909
  5642   1512       859        962        75219
  50549  45270      92783      25423      13708
  8975   13747      8288       5707       4672
  10130  1237       747        440        755;

  subgroup GB0211 XSVC PSTSTR _ONE_;
  levels   5      5      40      1 ;
  var GB0211 ;
  catlevel 5 ;
  /* the catlevel statement acts as a where statement restricting the analysis to the fifth level
     (in this case) of the variable GB0211 (How likely is it that you would stay active duty?)*
  contrast XSVC = (1 -1 0 0 0) / name = "Army vs Navy";
  table _ONE_ ;
  print ;
run ;
```

As can be seen in comparing Listings J-2 and J-6, the estimate of the difference in percentages between the groups is the same at -1.46 , although the t -test values, which depend on variances, differ slightly. For example, WesVar using JK n replication method $t = -0.967$ while SUDAAN using linearization $t = -1.09$.

⁸ The procedure DESCRIPT was designed to produce descriptive statistics for continuous variables, but it can also be used for discrete (categorical) variables through combinations of the statements CATLEVEL and VAR and the use of SUDAAN's variable _ONE_.

Comparing Two Analysis Variables Using SUDAAN

To compare two questions within subgroups requires that you work with the data to compute a statistical test. SUDAAN does not have an option that will easily allow you to compare two analysis variables. If the missing data patterns are the same for the two variables then you can use SAS to create a new variable containing the differences between the two questions and, by using the new variable on the VAR statement of the SUDAAN PROC DESCRIPT, produce the t -statistic in SAS.

To illustrate this, we used the same questions shown in the WesVar example (Listing J-3): Question 11, variable GB0211 versus Question 16A, variable GB0216A. In addition, we limit our analysis to the Army, the Navy, and the Air Force subgroups. The SAS code to compute the differences between the two variables (those members who were very likely to stay on active duty versus those who were very satisfied with their basic pay) consists of the following statements:

```
if GB0211 = 5 then a=1; else if GB0211 gt 0 then a=0;
if GB0216A = 5 then b=1; else if GB0216A gt 0 then b=0;
DIFF=a-b;

if XSVC in (1) then RXSVC =1;
    else
if XSVC in (2) then RXSVC=2;
    else
if XSVC in (4) then RXSVC=3;
/*recodes Army to 1, Navy to 2, and Air Force to 3 because SUDAAN requires no breaks in code*/
```

To obtain the total and mean differences between the two variables of each subgroup and their standard errors, use the following statements:

```
proc descript data=temp design=strwor;
  weight PSW0;          /* final fs weight */
  nest TVSTR /missunit; /*taylor series strata */
  totcnt POPTVSTR;      /*total population in taylor series strata */
  subpopn ELIGFLGW=1;   /*eligibles only */

  postvar PSTSTR;
  postwgt
  126614 76328      61577   89797   25785
  13819  9886       13279   100379  56880
  47822  82523      21653   9056    5581
  9863   80182      25513   14936   19909
  5642   1512       859     962     75219
  50549  45270      92783   25423   13708
  8975   13747      8288    5707    4672
  10130  1237       747     440     755;

  subgroup RXSVC PSTSTR;
  levels 3      40;
  tables RXSVC;
  var DIFF ;          /*computed difference-GB0216A vs GB0211*/

  print total setotal mean semean/meanfmt=f10.7 semeanfmt=f10.7;
                        /*output total and mean differences by subgroups*/
  output total setotal mean semean/meanfmt=f10.7 semeanfmt=f10.7
  filename = means filetype = SAS ;
```

The mean and standard error of the mean produced by SUDAAN are written to a SAS dataset to facilitate the analysis. Next, to compute the t -value, i.e., the difference in the proportions:

```
data means ;  
  set means ;  
  mean2 = mean * 100;  
  semean2 = semean * 100;  
  label mean2 = "% estimate";  
  label semean2 = "% stderror";  
  tdiff = mean2 / semean2;  
  label tdiff = "t value";  
  proc print label;  
  var RXSVC total settotal mean2 semean2 tdiff;  
run ;
```

As shown in Listing J-7, the estimated total and percentage differences match the output from the WesVar Listing J-3. Standard error estimates and t -values are similar.

Listing J-7.

Comparing Estimates from Different Surveys Using SUDAAN

This example compares the percentage of Army members who reported being very likely to stay on active duty in the WGR Form 2002 GB with the Army members in the 1995 SHS. Similar to the WesVar example, comparing estimates from different surveys, a t -statistic will be used.

To compare the proportions of Army members who reported being very likely to stay on active duty, first use SUDAAN to compute the proportion and standard error for this group using the WGR Form 2002 GB data. Change the following statements in the code for the PROC CROSSTAB example in SUDAAN to get the proportion and standard error:

```
Subgroup RXSVC    PSTSTR ;
levels      3      40 ;
tables     RXSVC
var        a ;
```

Then obtain the proportion estimate of Army members who reported being very likely to stay on active duty in the 1995 SHS and the standard error of that estimate. In the 1995 SHS, the proportion of Army members who reported being very likely to stay on active duty was 37.71 percent with a standard error of 1.133.

The difference between the Army members in the WGR Form 2002 GB and the Army members in the 1995 SHS is $35.15 - 37.71 = -2.56$ percentage points. Use the same formula as in the WesVar example to calculate a standard error of the difference of 1.44 and a t -statistic of -1.78 . The point estimate of the difference between the Army members in the WGR Form 2002 GB and the 1995 SHS is the same for both WesVar and SUDAAN but the t -statistics, which depend on variances, are slightly different. In WesVar using the JK_n replication method $t = -1.75$ while in SUDAAN, using linearization, $t = -1.78$.

Estimates Using SUDAAN based on Replication

The following SUDAAN statements produce a table for the variable XSVC similar to the WesVar table in Listing J-1.

```
proc crosstab data = appendj2 design = JACKKNIFE ;
  weight PSW0; /* final fs weight */
  JACKWGTS PSW001-PSW170 ;
  JACKMULT 30*0.60549120879 30*0.73232758586 30*0.87000030000 80*0.98493250000;
  subpopn ELIGFLGW = 1 ; /* eligibles only */
  subgroup XSVC ;
  levels 5;
  tables XSVC ;
  title 'proc crosstab sample';
  print nsum wsum sewgt deffwgt totper setot defftot /style=nchs ;
run ;
```

Analysis of WGR Form 2002 GB Using SAS

This section describes how to use SAS Version 8.0 or later to analyze the WGR Form 2002 GB data files⁹. As mentioned above, because all weighted cases should be used to estimate the variance, all weighted cases should be kept in the analysis file, even cases not in the subpopulation of interest. This applies both in the general case of ineligibility and specific cases of analyses focused on a part of the population. See below for an example of the use of the *DOMAIN* statement.

Required Variables

The variables that provide information about the sample design in SAS are:

- Variable TVSTR (Taylor's series variance strata). As in SUDAAN, the variable TVSTR indicates the variance strata to be used for computing the estimates of variance using the Taylor series method
- Variable ELIGFLGW (final eligibility indicator). The variable ELIGFLGW indicates the final eligibility of the member. Eligible members have ELIGFLGW =1 while ineligibles have ELIGFLGW=2. Records with zero final weight have ELIGFLGW=3.
- Variable PSW0 (final sample weight). The variable PSW0 contains the final weight for the full sample. This weight is positive for all the records where ELIGFLGW = 1 or 2.
- Variable _TOTAL_. SAS requires that the reserved variable name _TOTAL_ be used for the variable that was saved on the dataset as POPTVSTR. This variable contains the population counts for the variance strata (variable TVSTR). It is required to compute the fpc for the estimates of variance.

The following statements¹⁰ are available in PROC SURVEYMEANS:

```
PROC SURVEYMEANS < options > < statistic-keywords >;  
  CLASS variables;  
  DOMAIN variables < variable*variable variable*variable*variable ... > ;  
  STRATA variables < / option > ;  
  VAR variables ;  
  WEIGHT variable ;
```

⁹ Examples given in this report were produced using SAS Version Release 8.2.

¹⁰ A CLUSTER statement can also be used to specify cluster identification variables in a clustered sample design. A BY statement can be used with PROC SURVEYMEANS to obtain separate analyses for groups defined by the BY variables. Note that using a BY statement provides completely separate analyses of the BY groups unlike the variance estimates when using a DOMAIN statement that takes into account the full variance structure. When a BY statement appears, the procedure expects the input data sets to be sorted in order of the BY variables. The variables are one or more variables in the input data set. If you specify more than one BY statement, the procedure uses only the latest BY statement and ignores any previous ones.

The PROC SURVEYMEANS statement invokes the procedure. It optionally names the input datasets and specifies statistics for the procedure to compute. The PROC SURVEYMEANS statement is required.

The VAR statement identifies the variables to be analyzed. The CLASS statement identifies those numeric variables that are to be analyzed as categorical variables. The STRATA statement lists the variables that form the strata in a stratified sample design. The DOMAIN statement lists the variables that define domains for subpopulation analysis. The WEIGHT statement names the sampling weight variable. All statements can appear multiple times except the PROC SURVEYMEANS statement and the WEIGHT statement, which can appear only once.

In order to take into account finite population correction factors, a dataset has to be named that includes the reserved variable `_TOTAL_`. This dataset can either be the same dataset as the one containing the variables to be analyzed, or a new condensed dataset that is created to speed processing. The following statements can be used to create a working dataset (main) and a condensed dataset (tots4fpc) with the stratum population counts. Note that in creating this condensed dataset, the class statement has to contain the stratification variable (i.e., TVSTR) and any variables that are subsequently used in a WHERE statement (e.g., ELIGFLGW).¹¹

```
data main ;
  set rmret
  (keep = ELIGFLGW TVSTR POPTVSTR XSVC PSW0 GB0211 GB0216A) ;
  *limited variables kept to speed processing ;
  if ELIGFLGW in (1,2) ; *keeps all weighted records ;
  _TOTAL_ = POPTVSTR ; * creates the variable with the SAS required name ;
run ;
proc means data = main noprint;
  var _TOTAL_;
  output out=tots4fpc max=;
  class TVSTR ELIGFLGW;
run ;
```

Point Estimates Using SAS

The following statements can be used to compute the proportions of the Services using the variable XSVC.

```
proc surveymeans data = main total = tots4fpc mean stderr;
  strata TVSTR;
  var XSVC;
  class XSVC;
  domain ELIGFLGW;
  weight PSW0 ;
run ;
```

The output is shown in Listing J-8. The procedure SURVEYMEANS produces proportions and standard errors of proportions, both of which can be converted to percentages by

¹¹ The class statement also has to contain any variables to appear in a BY statement to be used in PROC SURVEYMEANS.

multiplying by 100. The percentages for eligibles match those produced by WesVar (Listing J-1) and SUDAAN (Listings J-4 and J-5).

As mentioned above, the dataset could be subset to just those who are eligible in a data step or by using a WHERE statement. The following statements can be used to compute the proportion of the members in each of the services using the variable `XSVC`.¹²

```
proc surveymeans data = main total = tots4fpc mean stderr;
  strata TVSTR;
  var XSVC;
  class XSVC;
  where ELIGFLGW=1;
  weight PSW0 ;
run;
```

The output is shown in Listing J-9. The percentages match those produced by the other procedures, but the variances are often smaller than those estimated by SAS when the DOMAIN statement is used so that all weighted cases are used to estimate the variance structure. This method of using the WHERE statement is not appropriate because it does not take into account the complete probability structure—it is not equivalent to using the SUBPOPN statement in SUDAAN.

¹² ELIGFLGW would have to have appeared on the CLASS statement of the PROC MEAN that created the file tots4fpc.

Comparing Two Subgroups Using SAS

When comparing two subgroups within a survey (e.g., Army vs. Navy), SAS can be used to estimate the difference and variance components but the *t*-test has to be manually calculated because it is not possible to request a contrast. The following statements were used to produce the output in Listing J-10.

```
proc surveymeans data = main total= tots4fpc mean stderr;
  strata TVSTR;
  domain XSVC*ELIGFLGW;
  var GB0211;
  class GB0211;
  weight PSW0 ;
run ;
```

The difference between the Army and the Navy is $100*(0.351548 - 0.366162) \approx -1.4614$ percentage points. To compare the proportions p_{Army} and p_{Navy} , use the following formula to compute the standard error of the difference:

$$se_{Army-Navy} = \sqrt{se_{Army}^2 + se_{Navy}^2}$$

and this formula to compute the t -statistic for testing the difference:

$$t = \frac{P_{Army} - P_{Navy}}{se_{Army-Navy}}.$$

In the example above, $se_{Army-Navy} = 100 * \sqrt{(0.009078)^2 + (0.010192)^2} = 1.3649$ percent and $t = \frac{-1.4614}{1.3649} = -1.0707$, which is the same as the t -value of the SUDAAN estimate. Again, the t -value using linearization is slightly higher than using replication methods (WesVar).

Comparing Two Analysis Variables Using SAS

To compare two questions overall or within subgroups will require that you work with the data to compute the statistical test. If the missing data patterns are the same for the two variables then you can use SAS to create a new variable containing the differences between the two questions and produce the t -statistic in SAS.

To illustrate this, we use the same questions shown in the WesVar example in Listing J-3 and the SUDAAN example in Listing J-6, Question 11, variable GB0211 versus Question 16A, variable GB0216A. We do not limit our analysis to the Army, Navy, and the Air Force subgroups as was done for WesVar and SUDAAN because SAS needs all the weighted cases for variance computation but does not have a SUBPOPN statement like SUDAAN. The SAS code to compute the differences between the two variables (those members who reported being very likely to stay on active duty versus those who were very satisfied with their basic pay) consists of the following statements:

```
if GB0211 = 5 then a=1; else if GB0211 gt 0 then a=0;
if GB0216A = 5 then b=1; else if GB0216A gt 0 then b=0;
DIFF=a-b;

proc surveymeans data = main total = tots4fpc mean stderr df t;
  strata TVSTR;
  domain XSVC*ELIGFLGW ;
  var DIFF ;
  weight PSW0 ;
run;
```

The output is shown in Listing J-11. The estimated percentages match those produced by the other procedures (Listings J-3 and J-7), with the variances being very close to those produced by SUDAAN and WesVar.

Comparing Estimates from Different Surveys Using SAS

This example compares the percentage of Army member's who reported being very likely to stay on active duty in the WGR Form 2002 GB with the Army member's in the 1995 SHS. Similarly to the previous WesVar and SUDAAN examples, comparing estimates from different surveys, a t -statistic will be used.

To compare the proportions of Army members, who reported being very likely to stay on active duty, obtain the proportion and standard error for each survey. For this group in the WGR Form 2002 GB data, look at Listing J-10. The proportion Army members who reported being very likely to stay on active duty was 35.15 percent with a standard error of 0.9078.

Then obtain the estimate of the percentage of Army members who reported being very likely to stay on active duty in the 1995 SHS and the standard error of that estimate. In the 1995 SHS, the proportion of Army members who reported being very likely to stay on active duty was 37.71 percent with a standard error of 1.133.

The difference between the Army members in the WGR Form 2002 GB and the Army members in the 1995 SHS is $35.15 - 37.71 = -2.56$ percentage points. Use the formula in the WesVar example to calculate a standard error of 1.45 and a t -statistic of -1.77 .
